Admission to Northeastern is selective, and the complexity of the admission process is not one that can be defined through a formula. At Northeastern, we are shaping a community of students who bring a diversity of experiences and interests. Each year, about 2,800 new freshmen and 550 new transfer students enroll in September and an additional 500 new students enroll each January. In building a diverse and talented incoming class, the Admissions Committee seeks to enroll students who have been successful academically and who have been actively involved in school activities and in their communities.

The typical student admitted to Northeastern has been extremely successful in a challenging course load. When considering applicants for freshman admission, the committee considers whether the applicant’s high school transcript reflects the various academic opportunities offered such as honors, advanced placement, international baccalaureate, or college-level courses. Northeastern also seeks to enroll students who have positively contributed to their school and larger community.

When reviewing transfer students, the committee takes into consideration such factors as the candidate’s academic transcript; letters of recommendation; résumé; essay; academic preparation for major of choice; and, in certain cases, high school GPA and standardized test scores. Transfer applicants are encouraged to submit a completed application and all supporting materials well before the deadline, as the number of students admitted to each program is limited.

Northeastern accepts the Common Application and a required Northeastern Supplement. Students may apply online at www.commonapp.org. The application and the supplement must be submitted simultaneously.

**Deadlines and Decisions**

Interested freshman and transfer applicants may apply for entrance into either the fall or spring semester.* Visit www.admissions.neu.edu for application deadlines.

- Northeastern has an Early Action Program for freshman applicants who consider Northeastern among their top choices. Early action decisions are released by December 31.
- Northeastern also offers a regular decision program for freshman applicants, and decisions are released by April 1.

* Decisions for all transfer applicants and for spring freshman applicants are released on a rolling basis, depending on space availability.

**Required Materials**

The committee will begin to evaluate an applicant’s candidacy for admission only when all application credentials have been received. We strongly encourage students to submit their credentials in a single complete package. Please ensure that all appropriate identification information is on every piece of your application package (name, date of birth, and NU ID).

**FRESHMAN APPLICANTS**

Each year, more than 35,000 students apply for a space in the freshman class. As the vast majority of applicants are academically eligible for admission, the committee has the responsibility of selecting applicants for admission that it believes will contribute to Northeastern’s diverse and vibrant community. The committee is particularly interested in applicants who have challenged themselves academically, are highly motivated, have a strong work ethic, or who have demonstrated excellence in leadership, creativity, diversity, engagement, global perspective, and resiliency. We encourage applicants to spend time to thoughtfully prepare their application in order to make sure their strengths and qualities resonate with the Admission Committee. In addition to the Common Application and required Northeastern Supplement, prospective freshmen must submit the following:

- Official secondary school transcripts. Midyear senior grades should be sent when available. Admitted students planning to enroll are required to send final transcripts prior to matriculation. General Equivalency Diploma (GED) recipients should provide their official score reports as well as any official secondary school transcripts.
- Students who received schooling at home should submit an academic portfolio consistent with their state guidelines and provide a list of all textbooks used. Home-schooled applicants must also provide proof they will have met by the end of May of the year of graduation all requirements for an official high school diploma and submit an official final transcript, a General Equivalency Diploma (GED), or a certificate of completion from their local school district or state board of education by the end of July of the year of matriculation. Home-schooled students must submit either the American College Testing Program (ACT) with Writing exam or the College Board’s SAT (with Writing) and two SAT subject tests, including mathematics and an additional subject test of their choice. Students who are applying for science-based majors should take

* Throughout this catalog, the word semester refers both to full semesters and to half semesters, except in cases where there is a cost or timeline difference. In such cases, the terms “full semester” and “half semester” are used.
a science subject test. Applicants to the College of Engineering must take the physics subject test.

- List of all current or in-progress high school classes or college courses (if applicable).
- Official transcripts for any college-level course work taken while a secondary school student.
- Portfolio. The portfolio is required for music technology and SMFA applicants and recommended for other BFA-in-studio-art applicants. Please see “Admission Requirements for Art + Design” and “Admission Requirements for Music” on page 5 for more information.
- Written recommendations from their secondary school guidance counselor and a teacher.
- Results of the American College Testing Program (ACT) with Writing exam or the College Board’s SAT (with Writing). Northeastern’s CEEB College Code is 3667 and 1880 for ACT.
- Essays.
- Résumés/activities list. Activities should be listed in order of importance to the applicant. Please provide a brief description of each, and highlight any leadership positions held.
- Application fee.

TRANSFER APPLICANTS

Our most successful candidates for transfer admission typically have a minimum grade-point average of 3.000. Students may transfer up to 60 semester hours of credit from a two-year college, or up to 80 semester hours from a four-year college, or a combination of the two types of colleges. If you have been admitted to the College of Business Administration and your college or university is not AACSB accredited, the maximum number of credits that you can transfer to NU is 60.

In addition to the application for admission, prospective transfer students must submit the following:

- Official transcripts for all college courses at all colleges and universities attended. There is no exception to this requirement. All academic credit with a C average or better will be considered for transfer credit. Course work taken more than ten years ago will not be granted transfer credit.
- All final transcripts.
- A copy of an official course registration form for any in-progress course work.
- Two recommendations from academic advisors, professors, or employers, on official letterhead and submitted in sealed envelopes.
- Official high school transcripts or an official GED score report and SAT/ACT scores (only if the transfer applicant has completed fewer than 24 semester hours of college-level academic work). If a GED score report is submitted, the incomplete high school transcript must also be submitted.
- Portfolio. The portfolio is required for music technology and SMFA applicants and recommended for other BFA-in-studio-art applicants. Please see “Admission Requirements for Art + Design” and “Admission Requirements for Music” on page 5 for more information.
- Midterm grades for the current term can be substituted for the high school transcript and SAT/ACT requirement if the applicant has completed at least one full semester of academic work.

All transfer-credit documents should be received prior to matriculation and must be received within one semester of matriculation. These documents include, but are not limited to, Advanced Placement, International Baccalaureate, and National Education exam scores and official transcripts from colleges and universities. These documents should be submitted whether or not you wish to receive transfer credit from this work. Transfer credit will not be granted for work prior to matriculation if the official credential is received after the completion of the first semester. Transfer credit will not be granted if the equivalent course is completed with a grade at Northeastern. Transfer applicants who have earned credits at an international university must have a recognized agency evaluate their transcripts and translate them into English.

INTERNATIONAL APPLICANTS

Northeastern accepts the Common Application and a required Northeastern Supplement. Students may apply online at www.commonapp.org.

International student applications are reviewed considering their performance in their particular academic environments. As a result, SAT or ACT scores are not required for international applicants. However, applicants who attend a high school in the United States, who will graduate from an international school that follows a U.S. high school curriculum (i.e., offers Advanced Placement courses and exams), or who are student-athletes who must meet NCAA eligibility requirements are required to submit test scores.

In order to maintain lawful student status in the United States, international students must be very mindful of the rules and regulations that govern their nonimmigrant visa classification. Numerous U.S. federal mandates and regulations implementing the Student and Exchange Visitor Information System (SEVIS) make it especially important for students in the “F” (student) and “J” (exchange visitor) categories to consult regularly with an international student advisor at the International Student and Scholar Institute (ISSI) before taking any action that might affect their immigration status and educational endeavors in the United States.

International students must register as full-time students, on time (within the appropriate registration period) during the regular academic year. In addition, international students must not begin or resume any type of employment without first obtaining proper employment authorization or verification from the ISSI. Any exceptions from full-time registration requirements must be preapproved by the ISSI in accordance with specified federal regulations.
Requirements for Applicants Whose Primary Language Is Not English

Students whose native language is not English are required to take one of the following tests: Test of English as a Foreign Language (TOEFL) (passing score of 213 on the computer-based test; 550 on the paper-based test; 79–80 on the Internet-based test) or the International English Language Testing System (IELTS) (passing score of 6.5). This requirement is waived if your SAT critical reading and writing scores/ACT equivalent are at least 500. It is your responsibility to ensure that your test scores are either submitted directly to Northeastern by the testing service or are included on your official high school transcript.

College, Major, and Length of Program Selection

Applicants to Northeastern University apply to one of our six undergraduate colleges.

Although an “undeclared” or “open option” category has been made available in most colleges, we encourage you to select a major that reflects your current academic interests and aspirations. Northeastern offers advisory programs for students interested in preprofessional programs, including medical, dental, law, and veterinary. Transfer students may not apply with “undeclared/open option” as their academic interest.

The five-year model allows students to maximize experiential learning opportunities, including research, study abroad, and our signature co-op program. Most majors offer a four-year option, with at least one experiential learning option. You are not required to make a decision on the four-year option upon entry. Some curricular options (architecture; clinical doctorate programs in health sciences; combined bachelor’s/master’s programs) require more than five years’ study to complete. In general, these have been structured so that students are considered to be undergraduates for their first five years, and students then transition to graduate status within the program contingent on successful completion of the undergraduate component. See the detailed curricula in this catalog for more information.

Students who begin in the January term may not follow the same curricula sequence as those who start in the fall. Your schedule of courses may be affected based upon your semester of matriculation. Summer courses may be required to help students complete their degree requirements in a reasonable amount of time.

Early Admission

Early admission provides an opportunity for students to enroll at Northeastern before the expected year of their high school graduation. Before enrolling at the University, all applicants for early admission must have completed all units required for high school graduation (including senior English) or must have earned the General Equivalency Diploma (GED). In addition to the required materials for freshman applicants, early admission applicants must provide written endorsement from the school principal, guidance counselor, and parents; exceptional records and standardized test scores; and a 200-word personal statement outlining his or her educational and/or career aspirations. The endorsements should speak directly to the applicants’ academic readiness and emotional maturity for college. An interview may also be required.

Advanced Credit

You may enter the University with advanced credit on the basis of your test scores on certain specific examinations (listed below) or on successful completion of accredited college-level courses that you took before you enrolled at Northeastern. For consideration, students should submit transcripts or test results before matriculation and must submit official score reports for credit evaluation within one semester of matriculation.

Northeastern currently awards advanced credit for the following examinations:

• Advanced Placement
• British System GCE A-Level Examination
• German Abitur
• French Baccalaureate
• International Baccalaureate
• Swiss Federal Maturita Diploma

ADVANCED PLACEMENT EVALUATIONS

The University awards credit for test scores of 4 and 5. Please visit www.northeastern.edu/admissions for an up-to-date AP listing.

Credit awarded: 4–10 semester hours or up to two courses per exam (refer to AP listing). AP scores must be received by Northeastern prior to matriculating in order to receive credit.

BRITISH SYSTEM GCE A-LEVEL EXAMINATION

The University awards credit for A-level courses with final exam grades of C or better. Students who have completed only O levels are not eligible for advanced credit.

GERMAN ABITUR

The University awards credit for intensive subjects with scores of 7 or higher on a 15-point scale and 4 or higher on a 6-point scale only for subjects that required a written exam.

FRENCH BACCALAUREATE

The University awards credit for any series A–E on the Baccalauréate de l’Enseignement du Second Degré with a coefficient of 4 or above (4, 5, 6) and a score of 10 or better on a 20-point scale.

INTERNATIONAL BACCALAUREATE

The University generally awards credit for exam scores of 5, 6, or 7 on higher-level exams only. Please visit the Admissions Web site at www.northeastern.edu/admissions for an up-to-date IB grid.

SWISS FEDERAL MATURITA DIPLOMA

The University awards credit for a final score of 4 or higher on a 6-point scale or 6 or higher on a 10-point scale.
Admission Requirements for Art + Design

ADMISSION WITH A PORTFOLIO
Applicants interested in being admitted directly into the Department of Art + Design programs are strongly encouraged to submit a portfolio for review. For updated guidelines for admission and for creating a portfolio, go to the Department of Art + Design Web site, www.art.neu.edu.

Applicants for the studio art major, a joint program of Northeastern University and the School of the Museum of Fine Arts, Boston, are required to submit a portfolio and should also go to www.art.neu.edu for admissions and portfolio guidelines.

PORTFOLIO GUIDELINES
Send fifteen images of original artwork. The portfolio may include work in a variety of media; no particular subject matter or style is required. Rather, students should select work that best shows their personal style, creativity, and commitment to innovation. Check the Department of Art + Design Web site, www.art.neu.edu, for more information.

ADMISSION WITHOUT A PORTFOLIO
Applicants who fulfill the requirements for admission, but do not have a portfolio of work, may be accepted into the department as undeclared majors. At the end of the freshman year, any student who wants to advance further in the department must submit a portfolio of work that is completed primarily at Northeastern in the foundation studio courses.

The portfolio review committee is made up of three or more faculty members. Students present between ten and fifteen pieces of work. Students who do not pass will be given clear directives to assist them in reapplying. Students cannot take upper-level courses until they pass their portfolio review. Upon successful completion, students will gain full status and access to courses within their major.

Admission Requirements for Music

MUSIC TECHNOLOGY
For candidates applying for admission into the music technology concentration, a portfolio is required and will be reviewed by a committee of faculty. The portfolio must include:
• Three representative examples of your creative work in a form that best represents the project, including lead sheets of original songs or printed scores of original compositions or arrangements; digital format, which might include MIDI or digital audio files on floppy disk, data CD, or Zip disks (PC and Mac formats are acceptable); or URLs for Web sites that include original music or sounds. Audio recordings of compositions are highly recommended (audio CD or cassette preferred). Videotape recordings of live performances of your music are also acceptable. (Supply a self-addressed, stamped envelope if you wish to have your materials returned.)
• A short statement explaining your involvement in the creation of the work. The statement should note whether you are the sole creator or a collaborator; the composer, arranger, or remixer; and whether you are performing the work on the recording(s).
• A separate, typed one-page statement of your musical background, influences, and goals.

Should music technology faculty determine that they would like additional information, they may arrange an interview with the applicant. Visit www.musictech.neu.edu for more information.

MUSIC PERFORMANCE
Once enrolled, students in any music concentration may also audition to pursue a minor in musical performance. This program is highly competitive and therefore requires evaluation by the Department of Music. To schedule an audition contact Arthur Rishi, events coordinator, at 617.373.2671 or via e-mail at a.rishi@neu.edu. Auditions are typically scheduled during a student’s first semester at Northeastern. For specific questions regarding the program or audition requirements, contact Professor Joshua Jacobson at j.jacobson@neu.edu or 617.373.3635.

MERIT SCHOLARSHIPS
Scholarships reward academic excellence. Northeastern has established several highly selective scholarship programs to reward and recognize outstanding academic achievement. You must apply by the regular deadline to be considered for these scholarships. No additional applications are necessary, as consideration for merit scholarships is automatic when the application is completed by the deadline, except for Phi Theta Kappa Scholarships (see below).

Trustee Scholarships
Award: Our most prestigious award includes full tuition, campus room and board (for academic semesters, based on double occupancy). Recipients who maintain normal progress toward a degree, with the minimum grade-point average, may renew the award for the full four- or five-year program.

Eligibility: The top 1 percent of freshman applicants may be considered for this award.

National Merit Finalists Scholarships
Award: Up to a full-tuition scholarship for admitted freshman applicants who are designated National Merit/National Achievement Finalists.

Eligibility: Admitted freshman applicants who are designated National Merit/National Achievement Finalists by the National Merit Scholarship Corporation (NMSC).
Dean's, Excellence, and Achievement Awards

Awards: Partial tuition scholarships ranging from $5,000 to $16,000. Recipients who maintain normal progress toward a degree, with a minimum grade-point average of 3.000, may renew these awards.

Eligibility: The top 25 percent of freshman applicants may be considered for these highly selective awards.

Phi Theta Kappa Scholarships
(Transfer Students Only)

Award: $5,000 grant. Recipients who maintain normal progress toward a degree, with a minimum grade-point average of 3.000, may renew the award.

Eligibility: Applicants for full transfer admission who have earned a 3.500 grade-point average in 32 semester hours or equivalent quarter hours or units of college-level course work. For eligibility, you must be a U.S. citizen or a permanent resident enrolling directly from a two-year institution. A letter of recommendation from a Phi Theta Kappa advisor is required. The deadline to apply for this award is April 1.

Please contact the Office of Undergraduate Admissions if you have any questions about the application process.

NEW STUDENT ORIENTATION

It is mandatory for all undergraduate students entering the University to participate in an orientation program. Students beginning in September will participate in the summer. Those starting in January will participate in the winter. Students will meet their classmates and learn their way around campus and Boston. They’ll also prepare for the start of the academic year by exploring their college and major, meeting with an academic advisor, learning more about co-op, and experiencing what makes Northeastern unique. They also register for classes and get their Husky ID. Registration information will be posted on the Admitted Student Portal for those who have paid their tuition deposit. Contact the Office of New Student Orientation and Programs toll-free at 800.696.6516 or visit www.northeastern.edu/orientation for more information.

PARENT AND FAMILY SERVICES

The Office of Parent Programs and Services serves as a resource to parents and families of Northeastern University students. Through active participation in internal and external University events and programs, this office outlines its services and programs and begins to develop a relationship with the NU parent and family population. Ongoing newsletters, online chats, parent message board, and programs keep parents and family members connected to the University and informed of deadlines, events, and services. The office also maintains the Parent Portal, which is a resource for news, dates, and important information related to the student’s experience. With permission of the student, parents may create an account by visiting the myNEU Web Portal (www.myneu.neu.edu). During the academic year, parents and family members are invited to contact the office as they seek information or assistance in addressing concerns related to their student’s enrollment.

Contact the Office of Parent Programs toll-free at 800.696.6516, or visit www.northeastern.edu/parents for more information.

ORIENTATION FOR INTERNATIONAL STUDENTS

The International Student & Scholar Institute (ISSI) organizes more than three months of orientation and acculturation programming throughout the year for newly arrived international students and U.S. citizens from abroad. ISSI orientation provides a unique forum for intercultural interaction and learning, with activities that include an “airport welcome,” cultural enrichment programming, information sessions, immigration advising, regional excursions, and educational seminars that bring a cross-cultural focus to topics such as academic success, student life, and the dynamic of diversity. The ISSI orientation program begins prior to the start of the fall and spring semesters, comprising several weeks of activities that provide international students (and others who have lived abroad) an opportunity to gain familiarity with Northeastern in a cross-cultural context while also serving to facilitate the formation of friendships across cultures.

International students should plan to arrive several days before the start of the semester as outlined in their ISSI orientation schedule. All matriculating international students will have access to a preliminary schedule from the ISSI prior to their arrival in the United States. Immediately prior to the start of the fall semester, the Office of New Student Orientation conducts a two-day “Academic Orientation” session as part of the ISSI orientation program, which parallels—and substitutes for—the mandatory orientation program held earlier in the summer for domestic (U.S.) students.

RESIDENCE LIFE

The Department of Residence Life strives to create a community for our residents by planning programs and activities that help students get to know others on their floor and in their residence hall. We also provide services that support our residents in accomplishing their academic and personal goals. Residence Life staff are trained in counseling, crisis intervention, conflict resolution, as well as interpersonal communications in order to assist our students to achieve their aspirations.

Each hall is supervised by a residence director and resident assistants, individuals who maintain close contact with students and who serve as administrators for the buildings.

The University offers a variety of housing options tied to specific programs of study. These Living Learning Communities offer students a supportive, achievement-oriented environment...
with opportunities for friendship around common interests as well as continued learning and sharing outside the classroom. Living Learning Communities commonly feature tutoring, advising, and study groups as well as unique programs designed to promote student growth and advancement. The University also recognizes that some students prefer to live in an environment of shared values and choices, which our lifestyle and cultural options housing also provides.

THE UNIVERSITY

HEALTH REQUIREMENTS—UNIVERSITY HEALTH AND COUNSELING SERVICES (UHCS)

A Health Report from University Health and Counseling Services (UHCS) is included with confirmation of the new student orientation session date. It must be completed and returned by the stated deadline. The required record of immunity section is necessary for compliance with the Massachusetts College Immunization Law. Failure to meet the requirement will prevent future course registration. Additionally, further documentation of immunity is mandatory for students in Bouvé College of Health Sciences.

Visit www.uhcs.neu.edu to access the Health Report online.

ENGLISH LANGUAGE CENTER

The English Language Center (ELC) conducts English language testing for incoming international students. This testing is mandatory for undergraduate conditionally admitted students. The testing takes about three hours.

From the testing, four scores are derived: global, reading/grammar, listening, and writing. Based on these scores, conditionally admitted students may be (1) cleared for full-time academic studies, (2) required to take English as a second language classes only, or (3) assigned a hybrid schedule of both academic and ESL classes. At the end of each academic session, all students are retested, and conditionally admitted students’ schedules are adjusted according to their improvement.

The Office of New Student Orientation automatically assigns conditionally admitted students a test day and time. However, any department may refer students for testing. Students must come on time on designated test days with a completed referral form in hand. Students without referral forms will not be tested. Referral forms and a schedule of test dates are available to departments by request through the ELC. There is a test fee of $50.

The ELC also offers a variety of language support courses for students who need assistance. Advisors and departments are encouraged to contact the ELC with any questions regarding testing or language support for international students.

For further information about the English Language Center, visit the ELC Web site at www.northeastern.edu/cps/elc or contact the ELC office, 206 Ell Hall, 617.373.2455.

ACCOMMODATIONS FOR STUDENTS WITH DISABILITIES

The University encourages students who seek an accommodation for a documented disability or disabilities that are substantially limiting, including “invisible” disabilities such as chronic diseases or learning disabilities, to register with the Disability Resource Center (DRC, 20 Dodge Hall, 617.373.2675, www.access-disability-deaf.neu.edu/). Students should register as soon as possible upon arriving on campus. The information provided will be kept confidential except that relevant faculty and staff will be informed if they are expected to provide accommodations. The University is committed to providing reasonable accommodations for students with documented disabilities that are substantially limiting. When services are approved, the DRC will provide the student with a letter of introduction to faculty, which indicates the service(s)/accommodation(s) for which the student has been approved. To initiate the recognition that service(s)/accommodation(s) have been approved and are being provided, students are encouraged to furnish a copy of the letter of introduction to their instructor(s) before the start of classes and no later than the second week of the term.
Northeastern University is eager to assist you in developing a plan for financing a Northeastern education. Through a variety of options—financial aid, Northeastern’s Monthly Payment Plan, supplemental loans, and your own resources—a plan can be designed that will make your education costs affordable. Visit the Office of Student Financial Services on the Web at www.financialaid.neu.edu or call 617.373.3190.

FINANCIAL AID

For many families, financial aid is a major element in making Northeastern University affordable. The Office of Student Financial Services provides a full range of options that help undergraduate and graduate students establish a comprehensive plan to finance their educations. To take advantage of Northeastern’s financial aid programs, freshmen and transfer students must submit the FAFSA and CSS PROFILE forms. Returning students must submit the FAFSA every year. Meeting priority filing dates will allow the review of your eligibility for all available financial aid programs. For information regarding your financial aid application, please visit the myNEU Web Portal (www.myneu.neu.edu), click on the “Self-Service” tab, and select “My Financial Aid Status.”

Satisfactory Academic Progress

Starting at the end of the spring semester of sophomore year, student GPAs are reviewed annually to evaluate eligibility for aid. A 2.000 GPA is required to retain eligibility. Students must also meet certain quantitative requirements. Completed credits are reviewed as a percentage of attempted credits after each academic year.

Return of Title IV Aid

Northeastern is required by federal statute to recalculate federal financial aid eligibility for students who withdraw, drop out, are dismissed, or take a leave of absence prior to completing 60 percent of a term. Recalculation is based on the percentage of earned aid using the Federal Return of Title IV funds formula. Federal regulations require students to obtain at least an A, B, C, D, S, or F in at least one course for the term; students who receive all unsuccessful grades for a term (NE, W, I, *, U) will be considered unofficially withdrawn from the term. For unofficial withdrawals, the withdrawal date used for aid recalculation is the midpoint of the term.

Northeastern’s Monthly Payment Plan

All full-time students have the option to enroll in Northeastern’s Monthly Payment Plan. This plan allows students and families to spread their annual tuition costs (less the financial aid) over nine, ten, or eleven months. Visit www.northeastern.edu/registrar/billing.html for additional information.

STUDENT/PARENT LOANS

There are a number of attractive educational loan programs available to assist you in covering your expenses over and above any financial aid that may be awarded to you from Student Financial Services. Most private lenders have credit and income requirements that must be met before being approved for these programs. Additional information regarding private loans is available on our Web site at www.financialaid.neu.edu/loans/supplemental.php. When researching the loan and lender that best meet your needs, make sure you take into consideration the interest rate, origination, disbursement, or repayment fees and the quality of customer service.

BILL PAYMENT

Full payment of tuition, residence hall fees, and other related charges are due prior to the start of the term as specified on the original bill, or if the due date is “Upon Receipt,” please pay within fifteen days to avoid a late charge. A past-due balance may result in prevention of registration or grade release. For details on payment methods, and E-bill, visit www.northeastern.edu/registrar/billing.html.

Discrepancies in your bill should be addressed in writing to the Office of Student Accounts. Include your name, account number, dollar amount in question, date of invoice, and any other information you believe is relevant. Address the correspondence to: Office of Student Accounts, 120 Hayden Hall, Northeastern University, 360 Huntington Ave., Boston, MA 02115 or e-mail studentaccounts@neu.edu. If there is a billing problem, pay the undisputed portion of the bill to avoid responsibility for any late fees.

Tuition bills are generated electronically and are available via the myNEU Web Portal (www.myneu.neu.edu). Paper bills are not generated. Visit www.northeastern.edu/registrar/billing-ebill.html for additional information.
Overloads/Reduced Loads

Undergraduate day tuition is charged on a flat per-term basis that includes the cost of each student’s normal academic curriculum requirements for that term.

Undergraduate full-time student adjustments for reduced loads are made only when the petition is approved by the academic department and the Office of the Registrar. Adjustments will then be made if the course load falls below 12 credits during full semesters and 6 credits during summer half sessions (calculated at the per-credit-hour rate). To receive an adjustment, the Undergraduate Petition to Reduce Load must be submitted prior to the start of the term. No rebate or credit is granted when a student voluntarily drops a course.

Undergraduate full-time day student adjustments for course work greater than the prescribed curriculum for the term is calculated at the per-credit-hour rate. Students taking more than 8 credits (summer half session) or 16 credits (full semester) will be charged the per-credit-hour rate.

Undergraduate full-time day students registered for co-op and taking a class will be billed at the per-credit-hour rate.

Visit www.northeastern.edu/registrar/billing-tuition.html for a full listing of tuition rates. Also see “Overload Policy” and “Reduced Load Policies” on page 20.

Undergraduate full-time day students may register for one additional music ensemble course from the following list without added charge:

- MUSC 1904 Chorus
- MUSC 1905 Band
- MUSC 1906 Orchestra
- MUSC 1907 Wind Ensemble
- MUSC 1911 Jazz Ensemble
- MUSC 1912 Rock Ensemble
- MUSC 1913 Blues/Rock Ensemble
- MUSC 1914 Create Your Own Music
- MUSC 1915 Chamber Ensembles
- MUSC 1916 Electronic Music Ensemble
- MUSC 1917 Jazz/Blues Choir

Delinquent Balances

In cases of student default on tuition payments, the student is liable for the outstanding tuition as well as for all reasonable collection costs and any legal fees incurred by the University during the collection process. Accounts may be subject to monthly interest charges. Transcripts and other academic records will not be released until all financial obligations to the University have been met.

Refunds on Credit Balances

To submit a request for a refund on a credit balance because of overpayment, the Student Refund Request must be submitted through the student’s myNEU Web Portal (www.myneu.neu.edu) located under the “Self-Service” tab.

Visit www.northeastern.edu/registrar/billing.html#over for additional tips on expediting the processing of your request.

Note: In the event a credit card was used to pay any student charges, credit balances in the student’s account will first be applied to the credit card used, with any remaining balance paid to the student, unless otherwise indicated.

Refund for Withdrawal—General Information

Tuition credits are granted based on the date of the official withdrawal processed by the Office of the Registrar. Nonattendance does not constitute official withdrawal. Credit policies vary according to the duration of the course. Typical tuition adjustments are made according to the schedules shown below.

The first week of class is the week containing the “classes begin” date listed in the online academic calendar at www.northeastern.edu/registrar/calendars.html.

Payment options and credit policies may vary for courses that follow a schedule different from the regular full or half-semester courses. If you are unsure about a course you are taking, contact the Office of Student Accounts.

Transcripts and other academic records will not be released until all financial obligations to the University have been met. All rates are subject to revision at the discretion of Northeastern University’s Board of Trustees.

For information regarding policies that affect eligibility for federal grants and loans upon your withdrawal or adjustment to course enrollment, please visit www.financialaid.neu.edu.

Refunds for Course Withdrawals

Undergraduate day students should refer to “Overload Policy” and “Reduced Load Policies” on page 20 for information on adjustments for withdrawing from individual course(s). For withdrawals from a course after the third week of the term, please contact studentaccounts@neu.edu.

Emergency Leaves
When a student is diagnosed with a major medical illness or injury, psychiatric illness, or has a family emergency after the start of the term that significantly interferes with his or her ability to attend classes and complete requirements, the student may consider an emergency leave of absence. For possible financial implications of any emergency leave, please see “Leave of Absence” on page 23.

Disability Resource Center Adjustments
Students who are registered with Northeastern’s Disability Resource Center are eligible to petition the center for tuition adjustments directly related to their documented disability. Students who drop below 12 credit hours may be affected by the loss of full-time-student status. Further information is available from the Disability Resource Center.

TUITION, ROOM, BOARD, AND FEES PER SEMESTER
2009–2010 ACADEMIC YEAR

Full-time freshmen spend two semesters in classes and summer on vacation. Annual costs for upperclass students participating in co-op vary depending on their pattern of attendance. See “Pattern of Attendance.” The number of semesters a transfer student spends in school depends on the curriculum of the student’s college. You are advised to verify your curriculum with your student services office so that you may plan accordingly.

Please note that not all of the above patterns are available in all academic programs and that some programs follow patterns different from those shown above.

In addition to the expenses itemized above, families should plan on the normal costs of living that students incur for transportation, books, and personal expenses. These vary depending upon such things as lifestyle and distance from home, but for the purpose of approximating a student budget, the University estimates these items at $4,050 per year.

Tuition rates, room and board charges, and fees are subject to revision by the board of trustees at any time.

Fees Required of All Students
The following fees are required of all students:

APPLICATION FEE
This nonrefundable fee of $75 must accompany an application for admission.

TUITION DEPOSIT
A nonrefundable tuition deposit of $200, which is applicable toward the first semester’s tuition, is due by May 1 from all freshman students entering in September. Students entering at other times of the year and transfer students entering in September...
should note the required deposit due date on their letter of admission.

**SUMMER ORIENTATION FEES**
A nonrefundable fee of $350 will be charged to the student’s account upon registration for the mandatory orientation session. The fee for new freshman and transfer students includes program costs, housing, meals, Welcome Week activities, and the opportunity to have two guests participate in the Parent Program, which runs simultaneously with the Student Program. There are additional costs for additional guests and for all guests desiring on-campus housing. *Note:* Students who enroll at Northeastern without attending their mandatory orientation session will be billed $50 in addition to the above program costs.

**STUDENT FEES**
Students pay a student center fee of $70 per in-school full semester or $35 per in-school summer half semester to support the Curry Student Center and an annual student activities fee of $116 to support student clubs.

**CAMPUS RECREATION FEE**
All undergraduate students at Northeastern University will be assessed a campus recreation fee of $46 per in-school full semester or $23 per in-school summer half semester. This fee covers admission to home athletic events, use of the Marino Fitness Center, the SquashBusters athletic facility, and the Cabot Gym (fitness and pool). This fee will also support the future construction of athletic fields and facilities.

**HUSKY CARD (PHOTO-IDENTIFICATION CARD)**
This card is issued to new full-time students at orientation and registration. Students must have a properly validated card to use most University facilities. A replacement card costs $15.

**NORTHEASTERN UNIVERSITY STUDENT HEALTH PLAN (NUSHP)**
Since September 1989, Massachusetts law (Massachusetts General Laws, Chapter 15A, Section 18) has required every full-time and part-time student enrolled in a Massachusetts institution of higher learning to participate in a qualifying student health insurance program (QSHIP) or in a health benefit plan with comparable coverage. Students who have comparable health plan coverage may waive NUSHP by completing a waiver on the myNEU Web Portal (www.myneu.neu.edu) by the designated deadline date each academic year. Visit www.northeastern.edu/registrar/billing-nushp.html for deadlines and additional information.

**Additional Fees**
Other fees may include the following:

**HOUSING APPLICATION/DEPOSIT**
New students seeking on-campus housing must submit a nonrefundable $400 deposit along with a completed housing application form to complete the housing application process. The upperclass housing deposit is $200 for each semester or $100 for each summer session.

**RESIDENCE HALL ACTIVITIES FEE**
All students living in the residence hall system pay a full-semester $32 fee or half-semester $16 fee for activities sponsored by the Residence Student Association.

**LATE FEES**
All accounts not paid in full by the indicated due dates will be subject to a monthly late fee.

**INTERNATIONAL STUDENT FEE**
A one-time fee of $250 is charged to new undergraduate international students, payable after their admission to Northeastern University. The fee supports services available at the International Student and Scholar Institute. This charge will appear on the second or third billing statement of the student’s first term.

**Room and Board**

**ROOM RATES PER SEMESTER, 2009–2010**
Please visit the Residential Life Web site, www.housing.neu.edu, for a complete display of room rates and residence halls.

**TERMINATION FEE AND ROOM RATE ADJUSTMENT POLICY**
The University provides on-campus and leased accommodations that are assigned each semester. Students are billed at the beginning of each semester and are obligated to pay the full charge for the semester. The high demand for on-campus housing makes it necessary for Residential Life to strictly enforce its cancellation policy.

Students who withdraw from the University will have their meal plan charges prorated to the end of the week they complete the University Withdrawal Form in the Office of the Registrar. Students must also complete the official housing withdrawal form and return their keys to their resident director’s office. Housing charges for students who withdraw from the University will be prorated only through the end of the fifth week of the semester.

**TERMINATION FEE POLICY FOR WITHDRAWAL FROM THE RESIDENCE HALLS**
Failure to provide timely written notification of cancellation of housing will result in a charge to students for their assigned space. If the cancellation deadline has passed, students who can demonstrate a significant change in academic or co-op circumstances may petition for a waiver of this fee. See cancellation fee schedule that follows:

DINING SERVICES

The following students are required to participate in the 19-, 15-, or 10-meal plan operated by University Dining Services:
- All freshmen (during their first two semesters as matriculated college students) living in University housing.

The following students are required to participate in the 19-, 15-, or 10- or 5-meal plan operated by University Dining Services:
- All upperclass students living in traditional University residence halls and suites without kitchen facilities.

Students living in a meal-required residence are automatically billed for the 15-meal plan. All other students may choose to enroll in a meal plan by following the instructions on the Meal Plan link on the myNEU Web Portal (myneu.neu.edu). Students have through the first week of the term to reduce their meal plan. You are allowed to increase your meal plan at any time. Visit www.northeastern.edu/registrar/husky-mealplan.html for additional details.

**Note:** All freshmen living on campus in any residence hall are required to be enrolled in a 10-, 15-, or 19-meal plan.

Visit www.dineoncampus.com/northeastern/ for information about menus and dining locations.

Changes to the meal plan are made via the myNEU Web Portal (myneu.neu.edu). Deadlines apply. Visit www.northeastern.edu/registrar/husky-mealplan.html for details.

Husky Dollars

Students can deposit funds into a Husky Dollar account and access these funds using their Husky Card at over 100 restaurants and retail locations on and off campus, including the University’s bookstore. The account accrues no interest. Visit www.northeastern.edu/registrar/husky.html for additional information, including vendor locations and instructions on how to add funds to your account.
This section presents general information about what is expected of students and how progress toward graduation is measured. For specific details on individual degree programs, students should consult their academic advisors. The University assumes no liability for any delay in providing or failing to provide educational or related services or facilities due to causes beyond the reasonable control of the University. Causes include, but are not limited to, power failure, fire, strikes by University employees or others, weather damage, and acts of public authorities. However, when in its judgment it is appropriate to do so, the University will exert reasonable efforts to provide comparable or substantially equivalent services, facilities, or performance; but its inability or failure to do so shall not subject it to liability. No faculty member, administrator, or other representative of the University shall make any representations to, or enter into any agreements with, or act toward any student or other person in any manner that is not in conformity with established University policies, practices, and procedures as expressed in this or any other official University document.

ACADEMIC INTEGRITY POLICY

Essential to the mission of Northeastern University is the commitment to the principles of intellectual integrity.

Academic integrity is important for two reasons. First, independent and original scholarship ensures that students derive the most from the educational experience and the pursuit of knowledge. Second, academic dishonesty violates the most fundamental values of an intellectual community and depreciates the achievements of the entire University.

Accordingly, Northeastern University views academic dishonesty as one of the most serious offenses that a student can commit while in college. Academic dishonesty includes cheating, fabrication, plagiarism, unauthorized collaboration, participation in academically dishonest activities, and facilitating academic dishonesty.

All members of the Northeastern University community—students, faculty, and staff—share the responsibility to bring forward known acts of apparent academic dishonesty. Any member of the academic community who witnesses an act of academic dishonesty should report it to the appropriate faculty member or to the director of the Office of Student Conduct and Conflict Resolution.

The charge will be investigated and if sufficient evidence is presented, the case will be referred to the Northeastern University Student Judicial Hearing Board.

Visit www.osccr.neu.edu for a full description of these policies and procedures.

ACCOMMODATIONS FOR STUDENTS WITH DISABILITIES

The University encourages students who seek an accommodation for a documented disability or disabilities that are substantially limiting, including “invisible” disabilities such as chronic diseases or learning disabilities, to register with the Disability Resource Center (DRC, 20 Dodge Hall, 617.373.2675, www.access-disability-deaf.neu.edu/). Students should register as soon as possible upon arriving on campus. The information provided will be kept confidential except that relevant faculty and staff will be informed if they are expected to provide accommodations. The University is committed to providing reasonable accommodations for students with documented disabilities that are substantially limiting. When services are approved, the DRC will provide the student with a letter of introduction to faculty, which indicates the service(s)/accommodation(s) for which the student has been approved. To initiate the recognition that service(s)/accommodation(s) have been approved and are being provided, students are encouraged to furnish a copy of the letter of introduction to their instructor(s) before the start of classes and no later than the second week of the term.

ATTENDANCE REQUIREMENTS

The University expects students to meet attendance requirements in all courses to qualify for credit. Attendance requirements vary; it is the student’s responsibility to ascertain what each instructor requires. Failure to meet attendance requirements may force a student to drop the course. Classes for day students are normally scheduled from 8:00 AM to 5:40 PM, Monday through Friday. Students should not make conflicting commitments until the class schedules for each semester are final. Permission to make up work may be granted by instructors for reasonable cause. Requests must be made immediately upon a student’s return to class. Laboratory work can be made up only during the hours of regularly scheduled instruction.
Absence Because of University-Sponsored Activities

Participation in University-sponsored activities, where the students are representing their University, college, or department, may cause absences from class that qualify as excused absences. Excused absences, with appropriate prior arrangement, are not subject to penalty, and missed work may be satisfied through agreement between the student and the instructor. University-sponsored activities that may justify excused absences include athletic competition, performing arts events, and research or other presentations.

Students must discuss absence(s) with instructors at least two weeks in advance of the University-sponsored activity, or as soon as possible if the activity is at the beginning of the term or is the result of an unforeseen circumstance. Instructors may require a written statement from the administrator in charge of the activity. Instructors are expected to make reasonable accommodations for these class absences including administration of makeup assignments and exams whenever possible. It is expected that students seeking an excused absence will develop a plan and timetable to make up the missed course work with their instructor(s). Please note, however, that the requirements of some courses or programs may preclude such accommodations.

Absence Because of Religious Beliefs

Any student who is unable, because of his/her religious beliefs, to attend classes or to participate in any examination, study, or work requirement shall be provided with an opportunity to make up such examination, study, or work requirement that he/she may have missed because of such absence on any particular day; provided, however, that such make-up examination or work shall not create an unreasonable burden upon such school. No fees of any kind shall be charged by the institution for making available to the said student such opportunity. No adverse or prejudicial effects shall result to any student because of availing himself/herself of the provisions of this section (Massachusetts General Laws, Chapter 151C, Section 2B, 1985). Students should make appropriate arrangements with the instructor in advance of the absence, preferably at least two weeks before the religious observance.

Absence Because of Jury Duty

Members of the University community are expected to fulfill their obligations to serve on a jury if called upon. A student selected for jury duty should inform his or her instructors. They will provide a reasonable substitute or compensatory opportunities for any required work missed. Such an absence will not be penalized in any way.

Absence Because of Military Deployment

The policy for military leave of absence is set forth on page 24.

Other Absences

Unforeseen events or circumstances, including illness, accident, catastrophic event such as fire, and bereavement, may cause a student to be absent from class. If such events occur, students are encouraged to notify their academic advisor and instructors as soon as possible in order to apprise them of the circumstances leading to their absence as well as how much time will be missed. Students should work with their instructors to develop a plan, with a timetable, to make up missed course work. Students may be asked to provide documentation to provide perspective that the class absence is warranted. Instructors are expected to make reasonable accommodations for warranted class absences, including administration of makeup assignments and exams, whenever possible.

Extended Absences

A student who is absent from school for an extended period of time must inform his or her college by letter, e-mail, or telephone. The expected length of the absence may determine whether the student should apply for an “Emergency Leave of Absence” (see page 24). It is strongly recommended that the student alert the academic advisor and also discuss potential next steps, such as incomplete grade or withdrawal, or, in the event of an extended absence due to a chronic medical condition or disability, consultation with the Disability Resource Center to explore potential accommodation.

CLASS SCHEDULES

All classes start promptly according to the class schedule shown. Most classes at Northeastern are scheduled in the time periods listed.

Students are expected to be punctual. Students who are late for classes should attend for the balance of the period. Instructors will not tolerate habitual tardiness.

Students may leave fifteen minutes past the scheduled opening of class if the instructor is not present. In such cases, students should notify the department giving the course that the instructor was not present.

Any change of regularly scheduled classes or examinations must have the unanimous consent of the students involved unless other mutually acceptable arrangements for students to attend the alternative class or examination are worked out between the faculty member and the student(s) involved.

If never changed, the course does not count toward graduation requirements.</td>
</tr>
</tbody>
</table>

An I, IP, or X grade shows that the student has not completed the course requirements.

Pass/Fail System

The individual schools and colleges state how and when the pass/fail system may be used. An outline of the general system follows.

- Any student not on academic probation may register for one pass/fail course per semester if permission is granted by the college in which the student is enrolled and if the course is offered on a pass/fail basis.
- Pass/fail courses are normally restricted to electives outside the major field. The college faculty, however, may choose to adopt the pass/fail system of grading when it appears pedagogically sound for required courses within a program.
Before requesting a pass/fail grade from an instructor, students should meet with their academic advisor to determine whether doing so will disqualify the course from satisfying a program requirement or elective. In general, courses taken on a pass/fail basis can be used only to satisfy open electives.

Individual faculty members may decide whether any of their courses may be taken on the pass/fail system of grading, except when uniformity is necessary. In such cases, the department and/or college faculty offering the course determine whether the pass/fail system is used.

Grades recorded on the basis of the pass/fail system do not figure in the computation of the grade-point average. Satisfactory completion of all courses taken on the pass/fail system is designated on the student’s permanent record by the letter S. Unsatisfactory work is designated by the letter U. Any unsatisfactory grade must be handled according to the existing policy of the college but must never be cleared through the election of the same course pass/fail, except when this system is the only one used by the college for grading the course.

An incomplete in a course taken on a pass/fail basis is designated by the letter X on the permanent record and treated according to the normal procedure for incomplete grades.

To use the pass/fail system, students must meet all prerequisites for the course. They have until the end of the second week of the semester to declare their intention to receive a pass/fail grade. This deadline may be extended to the end of the eighth week at the option of the instructor.

Students must submit a form available at www.northeastern.edu/registrar/forms.html signed by the faculty member.

Clearing an Incomplete (I) or Changing Other Grades

An I grade may be reported by the instructor when a student has failed to complete a major component of a required course, such as homework, a quiz or final examination, a term paper, or a laboratory project. Students can make up an I grade by satisfying the requirements of the instructor or, if the instructor is absent, the chair of the department. Be aware that instructors’ policies on the granting of incomplete grades may vary, and that the final decision on an incomplete grade is up to the instructor. The period for clearing an I grade and for changing a grade other than an I or failure (F or U) is restricted to one calendar year from the date it is first recorded on the student’s permanent record.

Freshmen with multiple course deficiencies, including I grades, may be required by their student services office advisor to rectify the deficiencies within a period of time less than the normal year.

To clear an I grade, a student must obtain a form on which the precise agreement for clearing an incomplete (I or X) grade is specified and which is signed by the student and the instructor. Forms are available at www.northeastern.edu/registrar/forms.html. The student must make an appointment with the instructor to arrange for clearing the I grade. He or she must then complete the form, sign the agreement, and obtain the instructor’s signature; leave a copy with the instructor, take one copy to the college student services office, and retain a copy as a personal receipt. Any exception to this policy on change of grades must be recommended by the Academic Standing Committee of the college in which the course was offered and must be forwarded in writing by the dean to the registrar for implementation. (Finishing the agreed-upon course work must be completed within one calendar year from the end of the semester in which the course was offered.)

Commencing with grades given in the fall quarter of 1986, the University policy is that any grade outstanding for twelve or more months cannot be changed.

Any exception to this policy on change of grades must be recommended by the Academic Standing Committee of the college in which the course was offered and must be forwarded in writing by the dean to the registrar for implementation.

Credit Hours

Course credit hours (semester hours) are assigned to a course based on the established national educational standard that one credit hour is equal to approximately three hours of student learning time per week over a period of a semester (usually fifty minutes of lecture or discussion, plus two hours of individual study outside class). When much individual study is involved, as in directed study or certain graduate courses, each additional hour of credit should represent at least three hours of student work.

Repeating Courses

Courses may be repeated in order to earn a better grade. In all cases the most recent grade earned in a course is the one used in calculating the overall grade-point average; however, previous grades remain on the transcript followed by the word “Repeat.” Consult your academic advisor before repeating a course. Students are required to pay normal tuition charges for all repeated course work.

Substituting Courses

In unusual cases, it may not be possible to repeat a course if a student wishes to do so. In certain circumstances, students may petition to substitute one course for another they have already taken, as long as the subject matter of both courses is substantially alike. With the approval of the student’s academic advisor and the agreement of the department that offered the first course taken, a grade received in the new course will be labeled “Substitute” on the transcript and will be treated in the grade-point average calculation as a “repeat” grade, as described above. The original grade will remain on the student’s Northeastern transcript. Consult your academic advisor before enrolling in any proposed substitute course. Students are required to pay normal tuition charges for all substitute course work.
Clearing an Academic Deficiency

An academic deficiency occurs when a student fails to complete a course with a satisfactory grade. The deficiency may occur because the student has failed the course or because the student has passed the course but with a grade that does not meet the minimum required by the student’s program.

Students who have academic deficiencies may be required to clear them before progressing within the curriculum, especially if the course work is a prerequisite for future course work. Deficiencies can affect the student’s expected year of graduation.

With the approval of the appropriate program faculty and/or academic advisor, students can clear deficiencies in the following ways:

1. Repeat the same course at one of Northeastern’s colleges, which will result in a “repeat” grade (see “Repeating Courses” policy above).
2. Substitute a comparable course at one of Northeastern’s colleges, which will result in a “substitute” grade (see “Substituting Courses” policy above).
3. Under special circumstances, a student may be advised to take a preapproved course at Northeastern’s College of Professional Studies or at another institution outside Northeastern University. The original grade will remain on the student’s Northeastern transcript and will still be used in the calculation of the grade-point average.

Dean’s List

A dean’s list, or honors list, is issued at the end of each fall and spring semester containing the names of students who have a 3.250 grade-point average or higher with no I grade or grade below C–. Students who are on any form of probation, who are enrolled in a course on a pass/fail basis (except where there is no alternative or where required by the program), or who are not carrying a full load as determined by their undergraduate college are not eligible. With a few exceptions as approved by the respective colleges, a full load for fall and spring semesters is considered to be a minimum of four courses or 16 semester hours.

Grade-Point Average (GPA)

Numerical equivalents for scholastic averages are weighted according to the number of hours the course carries. For example, suppose a student receives a grade of B in a course carrying 4 semester hours and a grade of A in a course carrying 1 semester hour. The weightings for these example courses are as follows:

<table>
<thead>
<tr>
<th>Grade</th>
<th>Numerical Equivalent</th>
<th>Semester Hours</th>
<th>Weight</th>
</tr>
</thead>
<tbody>
<tr>
<td>B</td>
<td>3.000</td>
<td>4</td>
<td>12</td>
</tr>
<tr>
<td>A</td>
<td>4.000</td>
<td>1</td>
<td>4</td>
</tr>
<tr>
<td>Totals</td>
<td></td>
<td>5</td>
<td>16</td>
</tr>
</tbody>
</table>

The GPA for both courses would then be the total weight (16) divided by the total semester hours (5), or 3.200. Grades of X, I, IP, S, and U are not included in the calculation of the grade-point average. Please see page 16 for a complete list of grades and numerical equivalents.

Grade Reports

Grades are available to students approximately three days after the end of each semester via the myNEU Web Portal (www.myneu.neu.edu). A missing grade ("*" on grade report) means that none was received from the instructor.

Transcripts

Official transcripts are available upon request at the Transcript Office, 120 Hayden Hall, during regular business hours. Written requests for official transcripts can be mailed to: Transcript Office, 120 Hayden Hall, 360 Huntington Avenue, Northeastern University, Boston, MA 02115. Fax requests are also accepted at 617.373.5351; however, official transcripts are delivered only in person and by mail, not by fax. For further information on what needs to be included in the fax request, please visit www.northeastern.edu/registrar/trans_request.html. All questions concerning transcript requests should be directed to the above address or to 617.373.2199, TTY 617.373.5360. Currently enrolled students may obtain unofficial transcripts from the myNEU Web Portal (www.myneu.neu.edu).

EXAMINATIONS

Final examinations are held during the last week of each semester. An examination schedule is posted on the Web at www.northeastern.edu/registrar/finexsched.html. It is the student’s responsibility to know the time and location of each of his or her examinations. Final examinations are normally two hours in length.

- Students who have a final examination conflict (two examinations at the same hour or three examinations in one day) should go to the Office of the Registrar, 120 Hayden Hall, within the first two weeks of classes.
- Instructors may not give more than one half-hour examination in the week prior to final examinations.
- Final examinations must be held when scheduled by the Office of the Registrar.
- Students must adhere to instructor’s rules of conduct during examinations.
- Students who have concerns about exams scheduled during the final week of classes, rescheduling of final examinations, or conduct during an examination should report their concerns to their college student services office, who will in turn notify the vice provost for undergraduate education.
- Students have the right to see their graded papers and examinations and discuss them with the instructor even if the papers are not returned.
• Any change of regularly scheduled classes or examinations must have the unanimous consent of the students involved unless other mutually acceptable arrangements for students to attend the alternative class or examination are worked out between the faculty member and the student(s) involved.
• In order that they may be available if a question arises about the final grade in a particular course, all final examinations, term papers, or projects that are not returned to students must be retained by the instructor or by the department for a period of one year.

**ACADEMIC PROGRESSION STANDARDS**

**Academic Status**
Academic progress of all freshmen is reviewed by academic advisors at the end of each semester of the freshman year. Students are notified soon after final grades are posted if there are concerns about academic progress in any or all of the following areas: (1) overall GPA; (2) semester hours successfully completed; and (3) failing or near-failing grades in courses that are required for progress in the major.

Students at Northeastern maintain good academic standing when they meet the following criteria: (1) have an overall GPA of 1.800 at the end of each semester of their freshman year and a minimum cumulative GPA of 2.000 at the end of each semester thereafter and (2) earn at least 12 semester hours in the semester just completed. Individual colleges may have additional requirements that are specified in each college section that follows.

In addition, many programs require that specific courses be successfully completed to progress to the next year. Students who do not make satisfactory progress will not graduate with their class and may be withdrawn. For more information about additional academic progression standards for each college, program, or major, refer to the curriculum guidelines that can be found in the college sections of this catalog. For financial aid implications, see “College Expenses” beginning on page 9.

**Academic Probation**
Full-time students who fail to meet the criteria for good standing described above will be placed on academic probation effective for the following semester. The action will appear on the internal record, but not on the transcript.

**Academic Dismissal**
Students who remain on probation after two full-term academic semesters may be dismissed from the University. This action may appear on the transcript at the end of the second probationary semester. In addition, students who have below a 1.000 GPA in any semester following their first semester or cumulatively may be dismissed at the discretion of their college. Students may appeal this decision to the Academic Standing Committee of their college (see following section). International students should consult with an advisor in the International Student and Scholar Institute to discuss the impact of an academic dismissal as it relates to nonimmigrant visa status.

**Academic Standing Appeals**
Students may appeal academic standing status if they can provide evidence and/or reasons supporting an appeal. Generally, a student on probation may be granted no more than one additional full-term academic semester to meet the criteria for good academic standing. Students may appeal to the Academic Standing Committee of their college to review probation and dismissal cases.

**Academic Eligibility for Participating in Student Organizations and Athletics**
All students must have a minimum 2.000 overall grade-point average to be eligible for an elected or appointed leadership position in any student organization. Athletes must adhere to NCAA standards.

**Repeating Courses to Clear Deficiencies**
Please see “Repeating Courses” and “Clearing an Academic Deficiency” on page 18.

**GRADUATION REQUIREMENTS**
To be eligible to receive degrees, graduating seniors must meet all academic and residency requirements. They must also clear all financial, cooperative education, and disciplinary deficiencies.

University-wide academic degree requirements are:
• Minimum of 128 semester hours to graduate with bachelor’s degree. Some programs have higher semester-hour requirements.
• An overall GPA of 2.000.
• Satisfaction of the NU Core requirements.

In addition, each program of study has specific academic requirements. These are specified for each program in this catalog. Once they matriculate, students are expected to complete all course work for their degree at Northeastern, or an entity in a formal contractual, consortial, or partnership relationship with Northeastern, or at an approved Northeastern University study-abroad program. In some cases, in order to clear a deficiency, to permit students access to courses deemed by their respective advisors and colleges to be important for their educations but unavailable to them at Northeastern, or to remain on track for graduation, a student may petition their college for permission to take a course at another accredited institution.

Participation in study abroad in a student’s final semester may result in a delay in graduation due to calendar discrepancies across institutions.
Prior to completion of their program, students are expected to complete a graduation degree audit at their college’s Undergraduate Student Services Office.

Graduation with honors and selection as the class marshal (spring commencement only) are reserved for undergraduates who have completed 60 semester hours in residence. To graduate with honors, the student must meet the following GPA requirements.

<table>
<thead>
<tr>
<th>Grade-point average</th>
<th>Honor conferred</th>
</tr>
</thead>
<tbody>
<tr>
<td>3.250–3.499</td>
<td>Graduate with honor (<em>cum laude</em>)</td>
</tr>
<tr>
<td>3.500–3.749</td>
<td>Graduate with high honor (<em>magna cum laude</em>)</td>
</tr>
<tr>
<td>3.750–4.000</td>
<td>Graduate with highest honor (<em>summa cum laude</em>)</td>
</tr>
</tbody>
</table>

Attendance at commencement is optional. Information concerning commencement is provided to all graduating seniors during the spring semester for spring commencement or during the summer semester for fall commencement. Seniors who have been removed from the graduation list are notified if they fail to qualify for their degrees. No special notice is sent to students who do qualify.

**REGISTRATION PROCEDURES**

Students are expected to preregister for classes during the published registration times in the academic calendar. Freshmen may be preregistered for some or all of the courses they need. Most registration after the freshman year is accomplished through the myNEU Web Portal (www.myneu.neu.edu). Confirmations of class registrations are mailed to students prior to the start of classes. Students must complete “I Am Here” registration just prior to the start of classes in order to remain enrolled.

**Course Prerequisites**

Students are expected to meet prerequisites as listed in the course description of each course in which they enroll. Grades of F, U, I, X, or W in prerequisite courses do not normally fulfill requirements. Exceptions must be authorized by the instructor teaching the course.

**Overload Policy**

An overload occurs when a student is enrolled in more courses than prescribed by the program’s curriculum. To register for an overload, students are advised to consult their academic advisor. Students who enroll in overload courses will be billed at the per-credit-hour rate, 1/16 of the full-semester tuition for that semester per semester hour. Undergraduate full-time day students may register for an additional music ensemble course from the list of courses on page 10 without added charge as long as they are registered for a full course load.

**Reduced Load Policies**

Undergraduate full-time student adjustments for reduced loads are made only when the Undergraduate Petition to Reduce Load is approved by the academic department and by the Office of the Registrar. Adjustments will then be made if the course load falls below 12 semester hours during full semesters and 6 semester hours during summer half semesters (calculated at the per-credit-hour rate). To receive an adjustment, the Undergraduate Petition to Reduce Load must be submitted prior to the start of the term.

No rebate or credit is granted when a student voluntarily drops a course. A reduced load may impact the student’s housing, financial aid, visa status, and health insurance. Students should consult applicable departments before committing to a reduced load. Students who take a reduced load will be billed at the per-credit-hour rate, 1/16 of the full-semester tuition for that semester per semester hour.

**Declaring Majors and Minors**

Undergraduate students generally declare their majors upon admission to the University or in the spring semester of their freshman year. Majors are described under the various schools and colleges in this catalog.

Students should submit a petition form to earn a minor as early as possible, and no later than the end of the junior year, by applying to the department offering the minor.

**Double Major or Dual Major, Double Degree, Second Baccalaureate**

**DOUBLE MAJOR OR DUAL MAJOR**

Students may earn a double major or dual major by completing all requirements for two majors in one college (double major) or the dual major program specified in this catalog. Students completing a double major or dual major receive one diploma. The double major or dual major is noted on the transcript.

**DOUBLE DEGREE**

To earn two degrees from different colleges, a student must complete all the requirements for both degrees. Two diplomas will be awarded and both degrees will be noted on the transcript.

**SECOND BACCALAUREATE**

To earn a second baccalaureate, a student must complete all the requirements for the degree and must complete 30 semester hours beyond the semester-hour requirement for the first baccalaureate degree. A second diploma will be awarded and the second degree will be noted on the transcript.

**Internal Transfers**

Students wishing to transfer to another college within Northeastern University should consult the internal transfer program information located on the Office of the Registrar’s Web site (www.northeastern.edu/registrar/itp.html). Transfer to another college is not automatic but is based on a number of factors,
including academic achievement and availability of space. Deadlines are at the discretion of the colleges.

Students who wish to change majors within the same college should consult the student services office of that college.

Transfer Credits for Current Students
Once they matriculate, students are expected to complete all course work for their degree at Northeastern, or an entity in a formal contractual, consorrial, or partnership relationship with Northeastern, or at an approved study-abroad program. In some cases, in order to clear a deficiency, to permit students access to courses deemed by their respective advisors and colleges to be important for their educations but unavailable to them at Northeastern, or to remain on track for graduation, a student may petition their college for permission to take a course at another accredited institution.

With the approval of the college student services office, students may take courses in Northeastern’s graduate schools.

Students who wish to take courses at another institution and transfer the credit to Northeastern must obtain prior approval from the college student services office. The Office of the Registrar validates accredited institutions to ensure credit transferability. The student must earn a C (2.000) or better for a course to be considered for transfer. Students are responsible for providing documentation on the institution’s accreditation, course grading, and course descriptions prior to approval.

Special Students
Students who are not enrolled at Northeastern University may petition the college student services office to take courses on a semester-by-semester basis. Approval is based on the student’s academic qualifications and on the availability of class space. If the college student services office approves the course enrollment, the student pays the bill and then returns the completed forms to the Office of the Registrar.

Taking a Course while on Co-op or on Summer Vacation
Students who wish to take a course while on co-op or on summer vacation must complete an appropriate form in their college student services office before the term begins. Students on co-op should complete the petition registration form, and students on summer vacation should complete the summer-only petition registration form. Students who do not file the appropriate form will be dropped from their preregistered courses. Students who take a course while on co-op will be billed the overload tuition rate. Students who take a course while on summer vacation will be billed at the underload tuition rate. (See “Overload Policy” and “Reduced Load Policies” on page 20.)

Dropping Courses
Not attending class does not constitute withdrawal. Students receiving a grade of W or X or NE in any course are responsible for the costs associated with that course. Students must drop courses using processes described below:

IN FALL AND SPRING SEMESTERS
• Through the third week of the semester, students may withdraw without any grade being posted to the transcript. Courses may be dropped via the myNEU Web Portal (www.myneu.neu.edu).
• Between the fourth and eleventh week, students must complete a course drop form (available at the Office of the Registrar or the college student services office), and have it signed by their instructor and by a representative of either their college student services office or the department that offers the course. Students must return the original copy to the Office of the Registrar and keep a copy for themselves. Course withdrawals during this time are indicated by a W on the student’s record. A faculty member may choose not to sign a course withdrawal form if a student was involved in any kind of academic dishonesty in the class. No financial adjustment is made for courses receiving a W grade.
• After the eleventh week, no withdrawals are accepted for any reason. A letter grade for the course will be posted on the transcript.
• Dropping below full-time enrollment (12 semester hours for fall and spring semesters) may affect financial aid, health insurance eligibility, and the maintenance of proper nonimmigrant visa status.

IN SUMMER HALF SEMESTERS
• Through the second week of the half semester, students may withdraw without any grade being posted to the transcript. Courses may be dropped via the myNEU Web Portal (www.myneu.neu.edu).
• Between the third and fifth week, students must complete a course drop form (available at the Office of the Registrar or the college student services office), and have it signed by their instructor and by a representative of either their college student services office or the department that offers the course. Students must return the original copy to the Office of the Registrar and keep a copy for themselves. Course withdrawals during this time are indicated by a W on the student’s record. A faculty member may choose not to sign a course withdrawal form if a student was involved in any kind of academic dishonesty in the class. No financial adjustment is made for courses receiving a W grade.
• After the fifth week, no withdrawals are accepted for any reason. A letter grade for the course will be posted on the transcript.
• Dropping below full-time enrollment (8 semester hours for summer half semesters) may affect financial aid.
Late Admission to a Course
Students may petition to register for a course after the normal “class add” period. Permission may be granted if seats are available and at the discretion of the instructor. If students are not already registered for a full course load, late admissions may jeopardize full-time status.

Forms for late admission are available at the Office of the Registrar and at www.northeastern.edu/registrar/forms.html.

PERSONAL INFORMATION

Change of Name
Report all name changes to the Office of the Registrar immediately. This is especially important when students marry and wish to use a new name on University records.

Change of Address
Report all address changes via the myNEU Web Portal (www.myneu.neu.edu) or in person at the Office of the Registrar or Office of Student Accounts. Both the permanent home address and the local address are required. International students must also report any changes of address to the International Student and Scholar Institute within ten days in order to ensure compliance with SEVIS requirements.

FAMILY EDUCATIONAL RIGHTS AND PRIVACY ACT (FERPA)

FERPA for Students—General Information
FERPA is a federal law that applies to educational institutions. Under FERPA, schools must allow students who are 18 years or over or attending a postsecondary institution:
• Access to their education records
• An opportunity to seek to have the records amended (see the Student Handbook for this procedure)
• Some control over the disclosure of information from the records

FERPA General Guidance for Parental Disclosure
When a student turns 18 years of age or attends a postsecondary institution, the student, and not the parent, may access, seek to amend, and consent to disclosures of his or her education records.

If you are an undergraduate day student and you choose not to share information with your parents, Northeastern will, if asked, indicate that you have restricted access to your records.

Release of Directory Information
The primary purpose of directory information is to allow Northeastern University to confirm attendance for employers, health insurance companies, and loan agencies. Northeastern may disclose appropriately designated “directory information” without written consent, unless you have advised the University to the contrary in accordance with the procedures below. If you choose not to release directory information, all communications with all third parties and agencies will need to be done through your written request to the University or in person.

Northeastern Directory Information:
• College and major
• Dean’s List or other recognition lists
• Graduation degree(s) and honors
• Dates of attendance
• Sports activity participation, such as for soccer, showing weight and height of team members
• A playbill, showing your role in a drama or music production

If Northeastern currently has permission to release data and you do not want the University to disclose directory information without your prior written consent, you must notify the University by coming to the Office of the Registrar, 120 Hayden Hall.

Notification of Rights under FERPA
The Family Educational Rights and Privacy Act (FERPA) affords students certain rights with respect to their education records. These rights are:
1. The right to inspect and review the student’s education records within forty-five days of the day the University receives a request for access. Students should submit to the registrar, dean, or head of the academic department (or appropriate official) written requests that identify the record(s) they wish to inspect. The University official will make arrangements for access and notify the student of the time and place where the records may be inspected. If the records are not maintained by the University official to whom the request was submitted, that official shall advise the student of the correct official to whom the request should be addressed.

2. The right to request the amendment of the student’s education record that the student believes is inaccurate or misleading. Students may ask the University to amend a record that they believe is inaccurate or misleading. They should write the University official responsible for the record, clearly identify the part of the record they want changed, and specify why it is inaccurate or misleading. If the University decides not to amend the record as requested by the student, the University will notify the student of the decision and advise the student of his or her right to a hearing regarding the request for amendment. Additional information regarding the hearing procedures will be provided to the student when notified of the right to a hearing.

3. The right to consent to disclosures of personally identifiable information contained in the student’s education records, except to the extent that FERPA authorizes disclosure without consent. One exception, which permits disclosure
without consent, is disclosure to school officials with legitimate educational interest. A school official is defined as a person employed by the University in an administrative, supervisory, academic, or support staff position (including law enforcement unit and health staff); a person or company with whom the University has contracted (such as an attorney, auditor, or collection agent); a person serving on the Board of Trustees; or a person assisting another school official in performing his or her tasks. A school official has a legitimate educational interest if the official needs to review an education record in order to fulfill his or her professional responsibility.

4. The right to file a complaint with the U.S. Department of Education concerning alleged failures by the University to comply with the requirements of FERPA. At Northeastern, the Office of the University Registrar, 120 Hayden Hall, administers FERPA.

5. Information concerning the following items about individual students is public and the offices listed below have the most accurate and up-to-date information:

- **Office of the Registrar**
  (120 Hayden Hall)
  Full name, major field of study, dates of attendance, class year, degrees and awards received, most recent previous educational institution attended.

- **Department of Athletics**
  (219 Cabot Physical Education Center)
  Participation in formally recognized University athletics, weight and height of members of athletic teams.

- **Campus Activities**
  (434 Curry Student Center)
  Participation in officially recognized University activities and student organizations.

**Additional Information**

Additional information can be obtained at the following Web site:

or by writing to:

Family Policy Compliance Office
U.S. Department of Education
400 Maryland Avenue, SW
Washington, DC 20202-5920

**FERPA and the USA Patriot Act**

The USA Patriot Act preempts FERPA, described above. The act provides federal law enforcement agencies access to otherwise confidential student records upon the presentation of specified authority. The act also says that the University cannot notify the individual whose records or information is being sought that the request has been made. All requests for student information made under the authority of the USA Patriot Act are handled by the Office of University Counsel, 115 Churchill Hall.

---

**STUDENT RIGHT-TO-KNOW ACT**

For information about the Student Right-to-Know Act, please visit www.northeastern.edu/registrar/right-to-know.html.

**UNIVERSITY WITHDRAWAL**

Students seeking to withdraw from the University for any reason should contact the student services office of their college.

Students may be withdrawn from the University for financial, disciplinary, academic, or health reasons. In the last case, the vice president for student affairs will review the recommendations of the director of health services to determine whether the student should withdraw. Withdrawals are made only when it is determined that the student is a danger to himself or herself or to other members of the University community, or when the student has demonstrated behavior detrimental to the educational mission of the University.

International students should discuss maintenance of proper U.S. immigration status with an advisor at the International Student and Scholar Institute before requesting or after having been placed on withdrawal.

**LEAVE OF ABSENCE**

**General Leave of Absence Policy**

Students who wish to take a leave of absence are encouraged to apply for the leave by filling out the proper petition with their college one month prior to the start of the effective semester. The usual limit for a leave of absence is for one or one and a half academic semesters (a semester plus a half semester). A leave of absence, if approved, will take into account the following conditions:

- Students who do not return at the end of the leave will be withdrawn and must submit a petition for subsequent readmission to the program.
- Students must return to classes, not co-op.
- Students must be currently enrolled in academic courses or co-op. If a student is withdrawn for any reason, a request for a leave of absence cannot be considered until the withdrawal is resolved.
- Students who receive financial aid should meet with a financial aid counselor before going on a leave.
- Students in University housing should refer to the Office of Residential Life for policy information.
- Students’ enrollment status cannot include more than one academic year of consecutive nonclass enrollments.

Students returning from an approved leave of absence must submit a notification of intent to return to their college student services office no later than one month prior to the start of the semester in which they intend to return. Students are required to preregister for courses upon returning from a leave of absence.
Emergency Leave of Absence

Emergency leaves may be granted when a student cannot continue attending class after the start of the term but is confident that he or she will reenroll at the University in a future term. The University’s emergency leave policy states that all tuition charged for the term in which the leave has been granted will be held by the University and applied toward future tuition charges in the same academic program. This would not apply if the leave of absence extends more than six months. Outstanding balances (including unpaid balances) for the academic term in which the leave is taken are still due the University. Tuition adjustments are made depending on the timing of the emergency leave. The adjustments would follow the same schedule as the Official Withdrawal adjustments. See page 10 for the schedule for “Refunds for Complete Withdrawal.” Financial aid recipients must contact their financial aid counselor to understand the effects on aid received.

If the leave extends more than six months, student loans may go into repayment. After six months on leave, students will be withdrawn from the University. Students enrolled in the Northeastern University Student Health Plan (NUSHP) will remain enrolled in the plan, unless their medical leave ends in the summer term and they do not return to school in the fall term.

Emergency leave petitions are available in college student services offices and specify the conditions and procedures under which such leaves may be granted.

Medical leave petitions must be initiated at University Health and Counseling Services. Medical leave is an option available to those Northeastern students who become seriously ill or injured during the semester. A student who develops a major medical condition that precludes class attendance, completion of requirements and/or co-op, and wishes a medical leave must first contact the University Health and Counseling Services Medical Leave Team.

Students who wish to reenter the University following a medical leave must contact the Medical Leave Team to initiate reentry no sooner than four or later than two weeks before the start of classes. The reentry process will be explained, the academic program notified, and a decision made within two weeks of receipt of all required documentation.

More specific procedures and information about the medical leave and reentry, along with the application for leave, can be found at www.uhcs.neu.edu.

Leave of Absence Due to Military Deployment

When a student is activated during the semester, the University will:
• Excuse tuition for that semester. Any payment made will be credited to the student’s account.
• Expunge the student’s record of registration so that the student is not penalized for being called to active duty.

If a student is called to active duty near the end of the semester, the student and faculty members may determine that incomplete (I) grades are more appropriate. In this case, tuition will not be waived.

When a student returns to the University after completion of the tour of duty, he or she will notify the college student services office, which will in turn notify the registrar’s office. The college student services office will assist the student with reentry and registration.

Leave of Absence for International Students

International students should discuss maintenance of proper U.S. immigration status with an advisor at the International Student and Scholar Institute before requesting a leave of absence.
In April 2006, Northeastern University adopted the NU Core, an institution-wide general education requirement. Northeastern faculty, administrators, and students worked together to identify a set of shared general education goals for all students in all majors. Our intention is to develop in our students the knowledge and skills to be lifelong learners with success in many careers, thoughtful global citizens, and fulfilled human beings. The NU Core is required for all freshmen entering in fall 2007 and later. It does not apply to students already admitted with a different set of core requirements or to transfer students whose entry year falls outside the NU Core implementation date.

**THE NU CORE REQUIREMENTS ARE:**

- **First-Year Learning Communities** (a first-year experience)
- **Knowledge Domains** (four courses)
- **Writing-Intensive Instruction** (four courses)
- **Mathematical/Analytical Thinking** (two courses)
- **Comparative Study of Cultures** (one course)
- **Integrated Experiential Learning** (one course or approved activity)
- **Capstone** (one course)

**Description of NU Core Requirements**

The entry-level NU core courses (comparative cultures, level 1 knowledge domains, first-year English, and level 1 mathematical/analytical thinking) and the experiential learning requirement involve exploring broad, new ways of thinking. To ensure the intended breadth, double counting of core requirements is not allowed among those domains. Some courses fit more than one of the entry-level categories, e.g., a knowledge domain category as well as the comparative study of cultures category. These courses are listed in both appropriate NU Core categories to give students more flexibility in how they select courses to meet requirements. However, a student cannot fulfill two of the entry-level NU Core requirements by taking a single course.

The intermediate and advanced NU Core requirements involve more focused, in-depth experiences that sometimes can be combined effectively in one course, e.g., many capstone courses also satisfy the writing-intensive requirement, some level 2 mathematical/analytical thinking courses also satisfy the writing-intensive requirement, some intermediate/advanced courses outside the major might also satisfy the comparative cultures requirement.

The following sections describe in greater detail the specific NU Core requirements:

**FIRST-YEAR LEARNING COMMUNITY**

A linked set of two or more courses in the same semester in which students are cohort-registered; provides integration of subject matter and an opportunity for students and faculty with similar interests to become acquainted.

**KNOWLEDGE DOMAINS**

Complete an approved introductory-level course in each of three level 1 knowledge domains listed below and a level 2 intermediate or advanced course outside the major department. Generally, one of the introductory-level courses also satisfies a requirement for the major.

- **Arts/Humanities Level 1**
  Complete one approved course in arts/humanities level 1. Visit www.northeastern.edu/registrar/nucore.html for a list of current offerings.

- **Social Science Level 1**
  Complete one approved course in social science level 1. Visit www.northeastern.edu/registrar/nucore.html for a list of current offerings.

- **Science/Technology Level 1**
  Complete one approved course in science/technology level 1. Visit www.northeastern.edu/registrar/nucore.html for a list of current offerings.

- **Level 2 Elective**
  Complete one intermediate or upper-level course (generally level-2000 or above) outside your major.

**COMPARATIVE STUDY OF CULTURES**

Complete one approved course in comparative study of cultures or another approved approach, including study abroad. Visit www.northeastern.edu/registrar/nucore.html for a list of current offerings.

**MATHEMATICAL/ANALYTICAL THINKING**

Complete an approved introductory-level course in mathematical thinking and its application to posing and solving problems and an approved intermediate-level course in modes of thought that allow abstraction, application, and synthesis of information.

- **Level 1**
  Complete one approved course in mathematical/analytical thinking level 1. Visit www.northeastern.edu/registrar/nucore.html for a list of current offerings.

- **Level 2**
  Complete one approved course in mathematical/analytical thinking level 2. Visit www.northeastern.edu/registrar/nucore.html for a list of current offerings.

**WRITING-INTENSIVE COURSES**

Complete a first-year writing course and an advanced writing course provided by the English department and two approved writing-intensive courses in the majors, as described in greater detail below. Generally, the capstone course serves as one of the major-specific writing courses.

**CAPSTONE**

Complete one approved capstone course within your major in the final semesters. This course acts as a final integrator of the major, general education, and experiential aspects of the student’s education. Generally, this course also includes writing-intensive work and research or creative activity, and, in most cases, the
second writing-intensive-in-the-major requirement is satisfied by the capstone course. Visit www.northeastern.edu/registrar/nucore.html for a list of current offerings.

EXPERIENTIAL LEARNING
Complete one approved experiential learning activity with a reflective component, as described in greater detail below. Experiential learning opportunities are disbursed throughout each student’s undergraduate education to encourage the development of seeing connections between course work and experiential learning. Students should consult their college or their major department for advice on approved activities.

WRITING-INTENSIVE COURSES
The faculty expects all students to become effective writers. To this end, students are given opportunities to improve their writing throughout their curriculum.

First-Year Writing Requirement
All first-year students must satisfy a first-year writing requirement. Students take a placement exam on the first day of class or may take an exam online before classes begin (by August 1 for the fall semester and by December 1 for the spring semester; see www.english.neu.edu/writingprograms/placement/). Depending on the results of the placement exam, students may satisfy the requirement in one of the following ways:

- ENGL 1111, College Writing
- ENGL 1110, Introductory College Writing plus ENGL 1111
- ENGL 1102, College Writing for Speakers of Other Languages
- ENGL 1101, Introductory Writing for Speakers of Other Languages plus ENGL 1102

In addition, depending on performance in ENGL 1110, the second half of the two-course sequence may be waived, as determined by the Department of English. Students must earn a C or better in the required writing course to satisfy the first-year writing requirement.

Note: ENGL 1101 and ENGL 1110 are not credited toward graduation in the College of Engineering.

Advanced Writing Requirement
Once students have earned 56 semester hours of academic credit, they are expected to register for the second course of the University-wide requirement: Advanced Writing in the Disciplines (AWD). Students are encouraged to take AWD before they have accrued 96 semester hours. A variety of AWD courses are offered, and different courses satisfy the requirement for students in different colleges. In consultation with their advisor, students should choose the AWD course that best fits their needs from among the available options. (AWD sections for non-native speakers of English and international students are available.) Transfer credit cannot be used to satisfy this requirement. Students must earn a C or better to satisfy the advanced writing requirement.

Please see the Writing Programs site for more details: www.english.neu.edu/writingprograms/.

Attendance Requirements and Other Policies
Writing program policy requires regular attendance at class meetings. Students are allowed three unexcused absences, i.e., class cuts, in classes that meet for three days a week; they are allowed two unexcused absences in classes that meet for two days. During the summer sessions, students are allowed two unexcused absences. Please see pages 14–15 for University policy regarding attendance requirements and excused absences and http://www.english.neu.edu/writingprogram/writing_program/ for all other policies governing first-year writing and AWD.

Writing-Intensive Courses in the Major
Each major includes at least two additional writing-intensive courses. These courses are characterized by frequent and regular writing, assessment and revision of student work, and the opportunity for students to improve their work.

EXPERIENTIAL LEARNING
Experiential learning offers the opportunity for an education that is richer and more meaningful, providing students with experiences that add depth to their classroom studies and enable them to explore and transform their lives. Experiential learning is tightly integrated with our course curriculum and is supported by advising in the majors as well as advising in the experiential learning group.

The primary ways in which the experiential learning requirement may be satisfied are:

- Cooperative education
- Research or creative activity
- Service-learning
- Global experience

Only one learning experience outside the classroom is required for the NU Core. However, students have many additional opportunities for further experiential learning.

Integration of course work and experiential learning occurs in the required capstone course, as well as in earlier guided opportunities linking concepts from major courses, NU Core courses, and experiential learning.
Cooperative education is the cornerstone of Northeastern University’s experiential learning approach, in which academic study is enhanced by hands-on experience. Through co-op, students alternate periods of academic study with periods of employment in positions related to their academic or career interests. This combination provides an integrated learning experience that enhances both their studies and career development. Full-time undergraduates may complete up to three six-month co-ops in five years at Northeastern. (The design of some programs, such as nursing, pharmacy, and theatre, requires four-month co-ops.) Four-year options with one co-op and without co-op are also available.

Co-op Eligibility
Every student must meet the following eligibility requirements in order to participate in co-op. These are general requirements for all students; however, students must work closely with their cooperative education coordinator to ensure that they meet any college- or major-specific requirements and are aware of major-specific logistics, deadlines, and required paperwork. In accordance with U.S. federal regulations, international students must not begin or resume any co-op experience without first receiving employment authorization from the International Student and Scholar Institute (ISSI).

GENERAL REQUIREMENTS
Students must:
• Take and pass a preparatory course before going out on co-op.
• Satisfactorily complete the requirements and deadlines set by their specific co-op program.
• Register for co-op, either through their division pattern or through a division change, which must be approved by their cooperative education coordinator and academic advisor.
• Have received a Satisfactory (S) grade and have resolved any outstanding Incomplete (X) grades for previous co-ops.

Students who have received an Unsatisfactory (U) grade must work with their cooperative education coordinator to reestablish eligibility in accordance with the policies and requirements of their program.
• Resolve any previous disciplinary or academic probation issues, or have their cooperative education coordinator approve a plan to resolve these issues, prior to being referred to co-op jobs.
• Have any self-developed co-op approved by their cooperative education coordinator before accepting the position.
• Comply with any preemployment checks required by the employer, such as drug testing, credit checks, physical examinations, security clearance, and criminal record checks.

ACADEMIC REQUIREMENTS
Students must:
• Be making satisfactory progress toward their degree as defined by the University, their colleges, and the curricula in their major programs.
• Have a cumulative 2.000 GPA to be eligible to go on domestic co-op or a 2.750 GPA to be eligible for international co-op at the time they apply for a co-op position.

TRANSFER STUDENTS
Transfer students from other universities must have met the same requirements in their major’s co-op program as nontransfers and must have completed at least one semester of classes before doing co-op. Students transferring from one major to another within Northeastern must have completed the requisite courses and requirements as defined by their current major’s co-op program.

APPEALS PROCESS
If a student does not meet the co-op eligibility requirements and/or their cooperative education coordinator has determined they are ineligible to go on co-op, they may appeal to the director of cooperative education for their college. If the matter cannot be resolved informally, they may appeal the decision to the college academic standing committee.

International Co-op
The International Cooperative Education Program provides students with an opportunity to explore global career options, develop intercultural and political sensitivity, and utilize and strengthen foreign language skills. Northeastern students co-op on six continents with foreign and multinational employers, U.S. employers doing business abroad, and other international organizations. Students may apply for existing positions or work with an international co-op counselor to develop their own. All majors are welcome to apply. International students participating in co-op abroad should consult with the ISSI in advance of departure in order to ensure reentry to the United States in proper nonimmigrant visa status.

Registering for Co-op
Students register for co-op during the semester prior to the one when they plan to be on co-op. Just as for an academic course, they can register through the myNEU Web Portal (www.myneu.neu.edu). All co-op placements need to be approved by a co-op coordinator.

Co-op Documentation
Students who fully and successfully participate in co-op will receive a grade of Satisfactory; those who fail to complete their co-op assignment will receive a grade of Unsatisfactory. These grades will appear on the student’s academic transcript. However, no academic credit is awarded for the completed co-op assignment.
Further Information
For more detailed information about co-op policies and procedures, please see the Cooperative Education Student Handbook.

RESEARCH AND CREATIVE ACTIVITY
www.research.neu.edu/students

Pursuing research at the university level makes our students knowledge creators and develops their teamwork skills, and the discipline of mind that research requires is one of the best ways to learn to think critically. With dozens of majors and minors, many interdisciplinary research centers and institutes, and more than six hundred full-time faculty engaged in active research and scholarship, Northeastern offers countless opportunities for students to apply their classroom learning to the process of discovery.

Undergraduate students can participate in research and creative activity in a variety of formats, including the following: research courses, which generally fulfill major elective requirements; research co-ops or internships; community-based research; research-based activity as the option for work-study work; research as a volunteer activity; and junior/senior honors research projects.

Undergraduate students can apply for support for their research projects from the University-wide Provost’s Undergraduate Research Fund and from a number of other offices and programs. They often present their research findings at Northeastern's annual Research and Technology Expo, as well as at academic conferences and in scholarly journals.

SERVICE-LEARNING
www.northeastern.edu/communityservice/services/servicelearning.html

Community service is part of Northeastern’s urban mission. But more than good works, community service through structured service-learning programs on our campus is an academically rigorous educational experience that allows students to broaden their knowledge and skills through service that supports our partnerships with Boston schools, neighborhood agencies, health clinics, and nonprofit organizations.

Students participate in organized service projects, coordinated by their professor and/or a program director, which meet needs identified by the community. Before, during, and after their service, students also engage in structured reflection to help them gain further insight into course or program content, a broader appreciation of their academic discipline, and a greater sense of civic responsibility.

GLOBAL EXPERIENCE

Northeastern University strongly endorses global experience as an important dimension of learning. To foster this, it maintains an Office of International Study Programs that has developed a series of programs tailored to the interests and needs of Northeastern University students.

International Study Programs
While studying abroad in a Northeastern-sponsored program, students maintain full-time Northeastern status and earn Northeastern credits. In all cases and upon successful completion of the program, grades are calculated into students’ GPA. The minimum requirements for participation are at least 56 semester hours of credit and a GPA of at least 2.200 that also meets the requirement of the host institution abroad. The application deadlines are posted on the Office of International Study Programs’ Web site on the “Applying” page.

Students who wish to study abroad should start by researching program opportunities online at www.oisp.neu.edu or by consulting their departmental or college advisors. Information sessions are offered regularly by the Office of International Study Programs in 301 Ell Hall. Advisors in the Office of International Study Programs provide the final planning assistance. Schedules for information sessions and advisors are posted online and in 10 Belvedere.

Northeastern University offers four types of study-abroad programs, although not all types are appropriate for some majors. Please see below for a complete list of current study-abroad locations.

Traditional. Students are based at a host institution where they attend classes, participate in student activities, and organize their extracurricular schedules just as they do on campus at Northeastern. Some examples include Monash University in Melbourne, Australia; University of Edinburgh in Scotland; and Obirin University in Tokyo, Japan.

Faculty-Led Summer Programs. Open to Northeastern University students of any major, the Dialogue of Civilizations Program is a series of “global student exchanges” between students at Northeastern University and students around the world. The goal of each program is (a) to connect NU students with their peers in different national, cultural, political, and social environments and (b) to provide NU students with a “global experience” that builds upon and enhances their academic studies and training in Boston.
Internship. These programs offer a combination of classes and related work experience for which students earn academic credit. For example, students typically intern with a member of the Australian Parliament in Canberra, the European Parliament in Brussels, the British Parliament in London, or the Irish Parliament in Dublin.

International Research. The focus of a student’s time abroad is on an independent research project. In most cases, the study-abroad program organizes small group seminars and field trips that are designed to help students learn about their international environment and focus on a research topic. Students spend three to four weeks toward the end of the semester working on their individual projects. An example could be studying tropical biology in Costa Rica, history and culture in Vietnam, and oceanography while sailing in the Atlantic/Pacific Cruise Track of the SEA Semester Program.

NU Core and Major Requirements. An NU-sponsored study-abroad experience or a faculty-led summer program may fulfill the NU Core requirement for comparative study of cultures or experiential learning. A student cannot fulfill both the comparative study of cultures requirement and any other NU Core requirement by taking a single course (or completing a single global experience). Thus, each student successfully completing an approved program could elect to use it to satisfy either the comparative cultures or experiential learning NU Core requirement but could not satisfy both requirements with one experience. For the international affairs major, study abroad also fulfills the international experience requirement. Students may fulfill additional requirements, depending upon their individual academic plan and approval by their advisor.

WORLD LANGUAGES CENTER

DENNIS R. COKELY, PhD
Director

Office: 400 Meserve Hall
Phone: 617.373.2234
Fax: 617.373.3065
E-mail contact: Dennis R. Cokely, Director, d.cokely@neu.edu

The World Languages Center (WLC) is a cooperative venture between the College of Arts and Sciences and the College of Professional Studies. The primary goal of the WLC is to offer an expanding array of languages in a variety of instructional formats.
for Northeastern students and to ensure that students will be able to take at least two years of instruction (four semesters) in any language offered by the WLC.

Placement Assessment
Students with prior experience in French, German, or Spanish must take the online written placement exam if they wish to enroll in a French, German, or Spanish language class. The link for this exam can be found on the WLC or the Languages, Literatures, and Cultures Web site. Students with prior experience in any other language should contact the WLC to make an appointment for a placement assessment interview. Results of a student’s placement online or interview assessments are valid for one year only.

Any student with prior experience in a language who registers for a language class without taking the WLC online placement test or a WLC placement assessment will not receive a letter grade for that course.

Attendance in Language Classes
The development of competence in a language requires regular and structured interaction opportunities. Thus, the WLC takes attendance in language classes very seriously. Each missed class will have specific consequences and will have a negative impact on a student’s final grade. Thus, attendance in class is a matter of great significance. Because the number of students in a class is limited, a student’s absence (and presence) will be noted. Because of the interactive nature of language instruction, students cannot make up missed classroom interactions. Students should be aware that they are graded on active participation in class, not simply attendance. Routine tardiness in a class will also have negative consequences. Regular and enthusiastic participation and involvement in the class is expected.

No more than three (3) unexcused absences are permitted, after which each absence results in points deducted from the final point average used to determine a student’s final letter grade. Classes missed as a result of registering late for a class will count as unexcused absences; if students believe they have been misplaced in a language class, they should consult the WLC immediately.

Auditing Language Classes
Auditing language classes is not permitted. Students who are not on the official roster of a class may not sit in on the class and will be asked to leave by the end of the first week of classes.

Immersion Language Classes
The WLC offers off-campus language immersion classes in a variety of languages. These immersion classes are numbered 1301, 1302, 2301, 2302, 3301, and 3302 and are designed to be part of a faculty-led study trip. Typically, these classes are offered during Summer 1 and Summer 2 terms. These courses will count toward fulfillment of the College of Arts and Sciences BA language requirement, assuming a student receives a grade of C or better.

Study-Away/Abroad Classes
The WLC will authenticate credit-bearing language classes taken in study-away/abroad programs at accredited institutions in fulfillment of and as equivalent to WLC language classes numbered 1101, 1102, 2101, or 2102. Students should receive approval of language course equivalence from the WLC before embarking on a study-away/abroad program. Failure to do so may mean that the courses taken away/abroad will not be accepted in lieu of on-site Northeastern language courses and thus may not satisfy the language requirement. Credit is only granted for successful completion of the course.

BSIB Language Classes
The Bachelor of Science in International Business program is offered through the College of Business Administration. Because of the intensive expectations of the program (one semester in classes abroad, one semester international co-op), the WLC offers classes that are restricted to BSIB students only. These courses are numbered 1201, 1202, 2201, 2202, 3201, 3202, 4201, and 4202. Only BSIB majors may enroll in these BSIB-designated courses.

UNIVERSITY HONORS PROGRAM

The University Honors Program is designed to provide a rich academic experience that fosters intellectual development and achievement. The program offers honors course options for fulfilling a number of the University-wide NU Core requirements: introductory and intermediate/advanced knowledge domain courses; comparative study of cultures courses; writing-intensive courses (ENGL 1111 and ENGL 3301); and entry-level mathematics. The program partners with campus departments to provide additional honors opportunities. During the first year, students participate in the First Year Reading Project; take HONR 1101 (“Enhancing Honors”), a course team-taught with upperclass mentors; can choose from a selection of honors courses targeted to the first-year experience; and enroll in a variety of small, selected honors sections. Interdisciplinary honors seminars are offered to sophomores and middlers. Juniors and seniors complete an honors project that typically involves an independent research project or a set of courses designed for upperclass honors students. In addition, upperclass students may take honors credits in independent study and as honors teaching assistants.
The program sponsors cultural opportunities such as theatre, ballet, and music. The honors experience also includes special housing opportunities in International Village for first-year students and in West Village F for upperclass students. The Honors Program office in 150 West Village F includes a multipurpose computer lab/lounge and a conference room for student use.

Honors students may earn up to three Honors Program distinctions: Honors Course Distinction, College Honors Project Distinction, and University Honors Program Distinction. Entering freshmen are invited to join based on a combination of their high school academic preparation, SAT/ACT scores, and leadership record. Current students are eligible to apply as second-semester freshmen or rising sophomores with a 3.600 or better cumulative average. Juniors and seniors may join if they have a faculty member prepared to sponsor their Junior/Senior Honors Project.

**BIOLOGY**
Complete a lecture and lab for both Biology 1 and Biology 2:

**Biology 1**
- **BIOL 1101** Principles of Biology 1 4 SH
- with **BIOL 1102** Lab for BIOL 1101 1 SH

- or **BIOL 1113** General Biology 2 4 SH
- with **BIOL 1114** Lab for BIOL 1113 1 SH

**CHEMISTRY**

**General Chemistry**
Complete the following two courses with corresponding labs:
- **CHEM 1211** General Chemistry 1 4 SH
  - with **CHEM 1212** Lab for CHEM 1211 1 SH
- **CHEM 1214** General Chemistry 2 4 SH
  - with **CHEM 1215** Lab for CHEM 1214 1 SH

**Organic Chemistry**
Complete the following two courses with corresponding labs:
- **CHEM 2311** Organic Chemistry 1 4 SH
  - with **CHEM 2312** Lab for CHEM 2311 1 SH
- **CHEM 2313** Organic Chemistry 2 4 SH
  - with **CHEM 2314** Lab for CHEM 2313 1 SH

**PHYSICS**
Complete a lecture and lab for both Physics 1 and Physics 2:

**Physics 1**
- **PHYS 1145** Physics for Life Sciences 1 4 SH
  - with **PHYS 1146** Lab for PHYS 1145 1 SH
- or **PHYS 1151** Physics for Engineering 1 4 SH
  - with **PHYS 1152** Lab for PHYS 1151 1 SH

**Physics 2**
- **PHYS 1147** Physics for Life Sciences 2 4 SH
  - with **PHYS 1148** Lab for PHYS 1147 1 SH
- or **PHYS 1155** Physics for Engineering 2 4 SH
  - with **PHYS 1156** Lab for PHYS 1155 1 SH

**MATHEMATICS**
Complete one of the following sets of mathematics courses:
- **MATH 1241** Calculus 1 4 SH
- and **MATH 1242** Calculus 2 4 SH
- or **MATH 1251** Calculus and Differential Equations for Biology 1 4 SH
- and **MATH 1252** Calculus and Differential Equations for Biology 2 4 SH
- or **MATH 1130** College Math for Business and Economics 4 SH
- and **MATH 1231** Calculus for Business and Economics 4 SH
or MATH 1341  Calculus 1 for Science and Engineering  4 SH
and MATH 1342  Calculus 2 for Science and Engineering  4 SH

Additional courses may be required or suggested by some schools. Students should refer to individual medical school Web sites as well as the appropriate official admissions guidebook for up-to-date information: ADEA Official Guide to Dental Schools (www.adea.org/); College Information Book (www.aacom.org/); Colleges of Podiatric Medicine Admissions Requirements (www.aacpm.org/); Medical School Admissions Requirements (www.aamc.org/); Schools and Colleges of Optometry Admissions Requirements (www.opted.org/); or Veterinary Medical School Admissions Requirements (www.aavmc.org).

BA/MD Early Acceptance Program at Tufts University School of Medicine
Tufts University School of Medicine offers an early acceptance program for eligible students at participating institutions. In addition to Northeastern University, institutions currently participating in this program are: Tufts University, Brandeis University, Boston College, and the College of the Holy Cross.

PRELAW PREPARATION

www.neu.edu/prelaw/
Northeastern University adopts in full the statement of the American Bar Association on its “Preparing for Law School” page of its Web site (www.abanet.org/legaled/prelaw/prep.html):

There is no single path that will prepare students for a legal education. Students who are successful in law school, and who become accomplished professionals, come from many walks of life and educational backgrounds. Some law students enter law school directly from their undergraduate studies without having had any post-baccalaureate work experience. Others begin their legal education significantly later in life, and they bring to their law school education the insights and perspectives gained from those life experiences. Legal education welcomes and values diversity and students will benefit from the exchange of ideas and different points of view that your colleagues will bring to the classroom.

The primary goal of the Prelaw Program at Northeastern is to assist current students, staff, and alumni in navigating the law school application process. This includes identifying and researching a variety of law schools to which the person may want to apply. For current NU students, the Prelaw Program will provide academic advising that will guide course selection and activities aimed at maximizing the student’s chance of being admitted to law school. These courses must have at least one, and preferably more, core skill and values such as: analytic/problem-solving skills, critical reading, writing skills, oral communication/listening abilities, general research skills, task organization/management skills, public service, and promotion of justice.

ROTC, MILITARY OFFICERS’ TRAINING PROGRAM

www.rock.neu.edu

The Department of Military Science offers the Army Reserve Officers’ Training Corps (ROTC) program. The goal of the program is to develop leadership potential in men and women and to prepare them for an officer’s commission in the Active Army, Army Reserve, or Army National Guard. The curriculum teaches principles of leadership and personnel management and seeks to develop leadership traits such as teamwork, responsibility, initiative, self-confidence, and discipline.

Army ROTC Program

GARY M. SOLDATO, LTC, MS
Professor and Chair, Department of Military Science

Office: 335A Huntington Avenue
Phone: 617.373.2375
Fax: 617.373.8677
E-mail contact: CPT John O’Brien, Operations Officer, j.obrien@neu.edu

The Army ROTC program is conducted at Northeastern University. For more information, write the Department of Military Science, Northeastern University, 335A Huntington Avenue, Boston, MA 02115, or call 617.373.2372.

Completion of the Army ROTC program will lead to a commission as a second lieutenant in the United States Army, Army Reserve, or the Army National Guard. The program consists of the basic course (freshman and sophomore years) and advanced course (middler through senior years). The program does not conflict with co-op schedules.

Enrollment in the basic course is voluntary and is open to all full-time students. However, only cadets formally enrolled in ROTC may participate in leadership labs, physical training, and practical field exercises. Students in the basic course do not incur a military obligation. Check with your academic department to ensure credits are accepted.

The advanced course is open to all qualified students who have basic course credit or equivalent military experience, as well as meet the Army’s physical, medical, and age requirements. Contracted students (advance course and scholarship) receive a monthly cash stipend while in school. Scholarship students also receive full tuition and fees as well as $1,200 per year for books. Scholarships are merit based and are awarded as four-year, three-year, or two-year benefit packages.
In addition to ROTC classes, students have the opportunity to achieve an academic minor in leadership. See “Leadership Studies” on page 46.

**Army Nurse Corps ROTC Program**

ROTc provides an opportunity for college nursing students to receive practical, hands-on leadership experience. The courses provide a chance for students to develop management, communication, and decision-making skills. ROTC also provides nursing cadets an opportunity to participate in the Nurse Summer Training Program (NSTP). NSTP is a paid, three-to-four-week, hands-on clinical elective for Army ROTC nurse cadets. This elective is conducted at more than twenty Army hospitals in the continental United States, Hawaii, and Germany. During the NSTP clinical elective, the cadet receives experience under the direct supervision of a preceptor—an Army Nurse Corps officer who works with the cadet one-on-one. Scholarship nurse cadets receive a monthly cash stipend while in school as well as full tuition and fees and $1,200 per year for books.

**Navy ROTC Program**

The Boston Navy ROTC unit is a six-school consortium that includes students from Boston University, Boston College, Northeastern, Tufts, Harvard, and MIT. All Navy ROTC scholarships are for nursing only and cover full tuition, mandatory fees, a $375 per semester book stipend, and a $250 per month living stipend that increases by $50 each year. For students on Northeastern’s five-year program, the Navy grants “Fifth Year Benefits,” which mirror those of the fourth year. Upon graduation, there is a four-year active-duty commitment.

NROTC nursing students are required to take four naval science classes, in addition to their regular course work, and attend a leadership laboratory once a week. All classes, labs, and group workouts are conducted at Boston University. Students typically spend a total of six to eight hours per week participating in NROTC-related activities. Additionally, Navy nurses complete two summer cruises, or training sessions, prior to graduation, each of which lasts approximately four weeks. They spend one session with a medical unit at sea (on a Navy ship) and one session at a land-based Navy hospital. All lodging, transportation, meals, and uniforms are paid for by the Navy during summer training sessions. For more information, contact Lt. Lauren Majchrzak at 617.353.4232 or lbw@bu.edu.

**Air Force ROTC Program**

Air Force ROTC is an educational and leadership program designed to give men and women the opportunity to become an Air Force officer while completing a bachelor’s or master’s degree.

Through a cross-enrolled program with Boston University, interested Northeastern University students may participate in the Air Force Reserve Officer Training Corps Program. The requirements include yearly aerospace studies classes, leadership laboratory classes, and physical fitness training. The mandatory weekly commitments range from five to seven hours per week.

In addition to the leadership and management training that cadets receive, they also benefit from several scholarship programs. **High school seniors** can apply for four- and three-year scholarships plus fees. The scholarships range from full tuition, $15,000 per year, and $9,000 per year. Scholarship winners will also receive a monthly stipend, a book allowance, and uniforms. Applications for scholarships are due by December 1 of senior year.

**Freshmen and sophomores already in college** can compete for two-, three-, and three-and-a-half-year scholarships, some of which cover full tuition, while others cover $15,000 per academic year. All scholarship winners will receive a monthly stipend, a book allowance, and uniforms.

However, students do not need a scholarship to join Air Force ROTC. Meeting physical fitness, medical qualifications, and the Air Force Officer Qualifying Test requirements are the only necessary requirements to participate in Air Force ROTC. For more information, call 617.353.4705.

**ABOUT SAMPLE CURRICULA**

The University’s official repository of curricular information is the Degree Audit Reporting System. The curricula published on the following pages are derived from the Degree Audit Reporting System. In case of discrepancy, the Degree Audit Reporting System shall take precedence. Consult with your academic advising office, listed below, to make certain you have all the necessary resources before planning your own curriculum.

Special Notes
• One semester hour of credit is equal to fifty minutes of instruction per week, plus two hours of preparation.
• The Office of the Registrar, 120 Hayden Hall, maintains the official record for all courses. In the event of error in any publication, the academic record will reflect the correct semester-hours applicable to any degree requirement.
• On occasion, course titles change, while the course number remains the same. Despite such title changes, the course is still considered to be the same course. Students who have taken the course under the old title and then take the course again under the new title are considered to have repeated the course.

UNDERGRADUATE COURSE NUMBERING SYSTEM

Every semester course number at Northeastern University consists of two parts:
• A two- or four-letter subject code
• A four-digit number

For example, in the course number ECON 1115, ECON is the subject code, and 1115 is the four-digit number.

The four-digit number indicates the level of the course as follows:
0001–0999 Orientation and basic
1000–1999 Introductory level
2000–2999 Intermediate level 1
3000–3999 Intermediate level 2
4000–4999 Advanced level
5000–5999 First-level graduate
6000–6999 Second-level graduate
7000–7999 Third-level graduate
8000–8999 Graduate clinical/research/readings
9000–9999 Doctoral research and dissertation

The College of Arts and Sciences offers Bachelor of Arts, Bachelor of Science, and Bachelor of Fine Arts degrees. The college emphasizes general education through the NU Core. The college offers a large number of majors, as well as many interdisciplinary programs. These include national and international programs for study and experience; programs in field settings, both local and abroad; and programs involving affiliations in such areas as professional performing arts organizations, media organizations, and government offices. The college also emphasizes experiential education through cooperative education; service-learning; and other kinds of internships, student-faculty research collaborations, and study abroad.

Students may choose a four- or five-year experiential education plan in most programs. Either plan offers co-op opportunities, often in an area related to the student’s chosen academic area. Students are normally eligible to participate in co-op in the second semester of their sophomore year and after they have declared a major.

Students may enter the college with a declared major; however, considerable flexibility exists within the college and many students change majors during their first two years. Students not yet ready to commit to a major may choose the Program for Undeclared Students. Undeclared students are strongly encouraged to declare a major by the beginning of their sophomore year, particularly if they are interested in the co-op program or very structured programs. Entrance requirements vary by major. Please see the academic program section of the appropriate major for more information.

Many programs are flexible enough to allow students to pursue a double major, a major and a minor, or one of the college’s specific integrated dual majors. The college also offers students the opportunity to create an independent major in cases where their interests and goals are not met by a specific major program.

Academic Advising
The College of Arts and Sciences (CAS) has a multilayered academic advising system with professional dean’s office advisors located in the Center for Academic Services and faculty advisors located in the college’s departments and program offices. Detailed advising information is available on the college Web site: www.neu.edu/cas/undergraduate/support.html. Prelaw advising (www.neu.edu/prelaw/) and premedical/predental advising (www.premed.neu.edu) are also available.
Academic Progression Standards
The College of Arts and Sciences adheres to the University-wide academic progression standards described in the beginning of the catalog. Some majors have additional specific requirements in order to progress from year to year (see major requirements in departmental listings).

Graduation Clearance Process
Students in the College of Arts and Sciences are required to meet with a dean’s office advisor in 1 Meserve Hall to determine their remaining graduation requirements. Some departments also require a meeting with a faculty advisor in their major/program. This should be completed in the junior year to ensure ample time to complete any outstanding requirements.

Transferring to the College of Arts and Sciences
Students who wish to transfer to an arts and sciences major should meet with a faculty advisor in the major in which they are interested as well as the appropriate dean’s office advisor in the Center for Academic Services. Both advisors must sign a petition for the student to be admitted to the major, and the student must take the petition to the Center for Academic Services to be processed. For a list of dean’s office and faculty advisors, please consult the college Web site at: www.neu.edu/cas/undergraduate/facultyadvisors.html. For specific internal transfer requirements please refer to the academic programs section of the catalog. To declare a minor in the college, students should have a petition signed by a faculty advisor in the department/program offering the minor.

College Requirements
All students in the College of Arts and Sciences must successfully complete the University requirements of the NU Core (see page 26). In addition, students pursuing a Bachelor of Arts degree (BA) must fulfill the college BA requirements as outlined below.

CAS KNOWLEDGE DOMAIN REQUIREMENT
FOR BA STUDENTS
In the NU Core Knowledge Domain category, students pursuing a BA will complete one course in the arts domain and one course in the humanities domain (for a total of two arts/humanities core courses). Arts/humanities core courses in the following subjects are considered arts domain courses: ARCH, ARTD, ARTE, ARTF, ARTG, ARTH, ARTS, MUSC, MUSI, MUST, and THTR. All other arts/humanities core courses are considered humanities domain courses.

CAS LANGUAGE REQUIREMENT
FOR BA STUDENTS
Each BA student must complete the CAS language requirement by demonstrating proficiency at the elementary level and at the intermediate level in one of the languages offered in the University’s World Languages Center.

Elementary Level
Satisfy one of the following requirements:

a. Complete elementary-level two (course number 1102) of a language with grades of C or better in all course work (pass/fail grades cannot be used to satisfy this proficiency requirement).

b. Earn a 4 or 5 score on an Advanced Placement (AP) exam in one of the languages offered or receive transfer credit for the equivalent of elementary-level two (course number 1102). Students who have AP or transfer credit must also receive a satisfactory rating in a language-specific interview administered by the World Languages Center upon matriculation.

c. Receive a satisfactory score (as determined by the World Languages Center) on a standardized placement exam and a satisfactory rating in a language-specific interview administered by the World Languages Center upon matriculation.

Intermediate Level
Satisfy one of the following requirements:

d. Complete a course at the intermediate level (course number 2101 or higher) in the language taken at the elementary level.

e. Complete a course the subject matter of which is focused on some aspect of the culture, history, or society of a part of the world where the language taken at the elementary level is spoken or used by a significant portion of the population. For a course list, please visit the myNEU Web Portal (www.myneu.neu.edu), click on the “Self-Service” tab, then on “My Degree Audit.”

f. Demonstrate conversational proficiency by successfully completing a proficiency interview (scheduled through the World Languages Center). This option is available only for heritage speakers of a language or for students who have completed the elementary-level language requirement through (b) advanced placement or (c) standardized placement exam as outlined above.

The Center for Interdisciplinary Studies in the College of Arts and Sciences offers students the opportunity to study in a broad range of interdisciplinary programs suited to their curricular or career
objectives and also permits students to design their own independent programs of study. The center is a resource for students who want to obtain more information about the various interdisciplinary programs, apply for interdisciplinary scholarships, join our affiliated academic organizations, enroll in special courses, and participate in our innovative community partnerships.

The center also supports and coordinates the individual programs. Interdisciplinary programs consist of freestanding majors, dual majors, minors, and concentrations. This vast array permits students the flexibility to explore the boundaries at the cutting edge of existing disciplines and to explore areas of secondary or personal interest and nontraditional courses of study. For more information on the programs, contact the Center for Interdisciplinary Studies (1 Nightingale Hall) at 617.373.2427 or the individual program directors. The interdisciplinary programs of the college follow.

*A minor is also available.

**Double Majors**

Students with interests in two separate fields have traditionally pursued both by enrolling in a double major. A double major allows students to combine two majors of their choice within the College of Arts and Sciences. Students pursuing a double major must complete all requirements for each major plus the NU Core. The college allows double counting across the NU Core and major requirements for students completing a double major. Students earning two majors within the college that have different degree designations choose the degree they will earn. The major associated with that degree is then considered the first major and the other major is the second major.

**Dual Majors**

The integrated dual major allows students to link concepts across disciplinary boundaries. Dual-major options are limited to those combinations for which faculty from two majors have identified nine or more courses from each major, plus an additional one or two “capstone” or integrative courses, that specifically help students link the concepts learned in both majors. Students pursuing dual majors complete the NU Core, and the college allows double counting between the NU Core and major requirements. Currently, the following dual majors are offered within the College of Arts and Sciences:

- American Sign Language and Human Services
- American Sign Language and Psychology
- American Sign Language and Theatre
- Biology and Environmental Geology
- Biology and Geology
- Biology and Mathematics
- Cinema Studies and Communication Studies
- Cinema Studies and English
- Cinema Studies and Journalism

The following dual majors are offered by the College of Arts and Sciences in conjunction with other colleges at the University:

- Chemical Engineering and Physics (College of Engineering)
- Computer Science and Biology (College of Computer and Information Science)
- Computer Science and Cognitive Psychology (College of Computer and Information Science)
- Computer Science and Digital Art (College of Computer and Information Science)
- Computer Science and Environmental Science (College of Computer and Information Science)
- Computer Science and Game Design (College of Computer and Information Science)
- Computer Science and Interactive Media (College of Computer and Information Science)
- Computer Science and Mathematics (College of Computer and Information Science)
- Computer Science and Music with Concentration in Music Technology (College of Computer and Information Science)
- Computer Science and Physics (College of Computer and Information Science)
- Electrical Engineering and Physics (College of Engineering)
- Human Services and Criminal Justice (College of Criminal Justice)
- Information Science and Cognitive Psychology (College of Computer and Information Science)
- Information Science and Environmental Science (College of Computer and Information Science)

Students interested in these dual majors should contact the participating college or department, or consult interdisciplinary major details. Information may also be obtained at the Center for Interdisciplinary Studies, 9 Holmes Hall, 617.373.2427. Other dual majors, both within the College of Arts and Sciences and across colleges, are currently under development or undergoing the University’s review process.

**Independent Major**

Students who can demonstrate that none of the established major programs in the College of Arts and Sciences provide preparation for their academic or professional goals may petition to design an independent major. The independent major is expected to be interdisciplinary in nature, crossing two or more disciplines. Independent major proposals must be submitted to the Center for Interdisciplinary Studies at least one semester prior to the semester in which the student wishes to begin the new major. All proposals should state clearly how the student will explore linkages among the disciplines involved in the independent major. Course requirements include fourteen to fifteen full courses approved by two or more faculty advisors who will serve as the major’s sponsors as well as facilitators for the student. All independent majors must also include a major research effort.

Applicants must have attained sophomore status or above, not be on academic probation, and have two full semesters of course work or more remaining from the time the proposal is approved. In addition to these requirements, external transfer students must have completed two semesters in one of the University’s undergraduate colleges.

For proposal guidelines and submission information, contact the program coordinator in the Center for Interdisciplinary Studies (1 Nightingale Hall) at 617.373.2427.

**Teacher Preparation**

Northeastern University’s Department of Education offers teacher preparation programs that are approved by the Massachusetts Department of Education. All programs require that students complete an appropriate Arts and Sciences major along with a minor in education at the elementary or secondary level. All Arts and Sciences majors, except American Sign Language and human services, are approved majors for students seeking licensure at the elementary level. A minor in education at the secondary level requires a major in math, physics, chemistry, biology, political science, history, English, or Spanish. Completion of an Arts and Sciences major, education minor, and student teaching enables students to earn an initial teaching license in Massachusetts. Massachusetts participates in the interstate reciprocity agreement with many other states. See page 113 for details or contact the Department of Education (26 Nightingale Hall) at 617.373.4216.

**INTERDISCIPLINARY MINORS**

**Cinema Studies**

The cinema studies program at Northeastern University is unique in the Boston area, offering a broad interdisciplinary curriculum. Students who choose the cinema studies minor are exposed to a range of aesthetic, historical, international, and sociological perspectives from which to approach the film and video medium. They may also learn to integrate these analytical approaches with practical experience in videography and with internships in the Boston area. The diverse course offerings and carefully structured program have enabled our graduates to do well in the ever-expanding world of video production, distribution, and marketing, as well as to pursue careers as film scholars and teachers. Students take five courses: two required courses and three electives. See page 87 for more information on cinema studies or go to the cinema studies Web site at www.cinemastudies.neu.edu.

**Minor in Cinema Studies**

See “Minor in Cinema Studies” on page 97.

**Creative Industries**

The minor in creative industries offers an opportunity for students from any department and program at Northeastern University to
develop skills and knowledge in interactive media and/or game design to enhance their major with cutting-edge techniques and interdisciplinary collaboration.

For more information on the creative industries minor, contact the program director, Terrence Masson (321 Ryder), at 617.373.7645 or at t.masson@neu.edu.

Minor in Creative Industries
See “Minor in Creative Industries” on page 104.

East Asian Studies
East Asian Studies offers a broad interdisciplinary curriculum that is based on the course offerings of six departments. The purpose of this program of study is to provide a foundation of knowledge in an East Asian area as well as to enhance students’ understanding of Western society through the comparative insights gained from an intense examination of one non-Western region of the world. Students are encouraged to take advantage of the University’s study-abroad programs in East Asia, the Dialogue of Civilizations summer study tours to China and Japan, and the Dialogue of Civilizations intensive summer language programs.

For more information, contact the program director, Professor Christina Gilmartin, in 249 Meserve, or at 617.373.4449, or at c.gilmartin@neu.edu.

Minor in East Asian Studies
See “Minor in East Asian Studies” on page 70.

Minor in East Asian Studies—Language Track
See “Minor in East Asian Studies—Language Track” on page 70.

Environmental Studies
The minor in environmental studies is designed to provide a flexible platform for students interested in the environment. Students in the environmental studies minor have an opportunity to develop skills and knowledge in such areas as planning, regulation, policy, and compliance, depending on the upper-level course choices they make.

For more information on the environmental studies minor, contact the program director, Professor Jennifer Rivers Cole (14 Holmes Hall), at 617.373.3039 or at j.cole@neu.edu.

Minor in Environmental Studies
See “Minor in Environmental Studies” on page 126.

Human Services
The mission of the human services program is to provide students with the theoretical and skill-based background necessary to practice in macro-, mezzo-, and microareas such as political advocacy, community development, and direct service. The minor may help lead to careers in many diverse areas of the helping professions or to graduate programs in social work, counseling, rehabilitation, and law. Human services professions are among the fastest-growing occupations in the nation. Society recognizes the necessity, value, and reward of dedicating time and energy to helping people. Combining a human services minor with any major gives students the opportunity to learn about the individual community and political interventions for social change.

Minor in Human Services
See “Minor in Human Services” on page 142.

Independent Minor
The independent minor gives students who focus their energies on a traditional major or dual major an opportunity to explore the cross-disciplinary implications of their study in a formal manner. It also allows students to construct and obtain recognition for a coherent interdisciplinary content, thematic, or other focus of study supplementary to their major. An independent minor should contain at least six courses approved by a faculty advisor who will serve as the minor’s sponsor as well as facilitator for the student. The minor should include a directed study course to help the student integrate the subject matter from the disparate disciplines covered by the minor.

Applicants must have attained sophomore status and not be on academic probation.

GPA REQUIREMENT
2.000 GPA required in the minor

For proposal guidelines and submission information, contact the Center for Interdisciplinary Studies (1 Nightingale Hall) at 617.373.2427.

International Affairs
International Affairs is an interdisciplinary major in the College of Arts and Sciences. The international affairs program is designed (a) to prepare today’s students with the knowledge and skills needed to survive and to lead in this global marketplace—a marketplace not simply of products and services but also of ideas, identities, and values—and (b) to promote “global citizenship” and social responsibility among all members of the international community.

Minor in International Affairs
See “Minor in International Affairs” on page 151.

Jewish Studies
The Jewish studies program provides students with the opportunity to explore the religion, culture, and history of the Jewish people. The program offers a dual major in Jewish studies and religion and a minor in Jewish studies; it also partners with the human services program to offer a “Social Justice, Identity, and Religion” specialization within the human services major. A cooperative relationship between Northeastern University and...
Hebrew College allows cross-registration and concurrent library privileges at both institutions, as well as an integrated five-year program through which students can earn a BA from Northeastern and an MA or MJEd from Hebrew College.

For more information, contact the Jewish studies program at 617.373.7045 or visit the Jewish studies Web site at www.neu.edu/jewishstudies/.

### Latino/a, Latin American, and Caribbean Studies

The LLACS (Latino/a, Latin American, and Caribbean Studies) program offers an interdisciplinary minor. It explores the historical, cultural, political, and economic foundations of and linkages between U.S. Latino society, Latin America, and the Caribbean. It draws from the heritages of the Americas that are grounded in predominantly indigenous, African, and European cultures.

For more information, contact the program director, Professor Alan West-Duran (447 Meserve Hall), at 617.373.4292 or at d.west-duran@neu.edu.

### Law, Policy, and Society

Law, Policy, and Society (LPS) is an interdisciplinary program integrating the study of law with politics, criminal justice, economic analysis, sociology, philosophy, and history. Course work will analyze the social, political, and economic consequences of law, legal processes, and the impetus for legal change. In the LPS minor core courses, students will have the opportunity to watch a criminal and/or civil trial, participate in a moot court before a panel of “judges,” and listen to speakers from both the public and private sector (past speakers have included a superior court judge and an assistant attorney general). While the minor is well suited for students interested in pursuing a career in law and/or policy, it is invaluable for students in any field of practice, as law affects all professions and facets of everyday life. Likewise, the LPS minor courses are taught by faculty drawn from a number of fields, including criminal justice, sociology, political science, law, philosophy, and economics. For more information, contact the program director, Professor Joan Fitzgerald (205 Holmes Hall), at 617.373.3644 or at jo.fitzgerald@neu.edu.

WOMEN AND LEADERSHIP TRACK
This track aims to help develop an understanding of women as leaders in both a global and an historical context, raise awareness of how gender relates to the definitions and practices of leadership, and enhance leadership skills for all participating students.

MILITARY LEADERSHIP TRACK
This track focuses on providing students with an understanding of war and conflict in an historical, economic, social, and political context. For those who choose Reserve Officer Training Corps (ROTC), this track teaches students the principles of military leadership in an academic setting. It provides students with the opportunity to apply these principles to real-world situations through their participation in the ROTC Cadet Battalion.

PUBLIC POLICY AND LEADERSHIP TRACK
This track is designed for students interested in the functions of government, public policy making, and public administration. Students are shown how policy decisions affect populations, human and ecological environments, and the legitimacy and authority of public decision makers. Ultimately, this track offers students the opportunity to understand the dynamics of leadership and decision making and the impact that public and interpersonal communication skills have on these processes.

ORGANIZATIONS AND LEADERSHIP TRACK
This track provides a lens through which students can examine and explore organizations and the people within. What is the role of work in society and how does this change across culture and time? How does the definition of leadership effectiveness change for different types of organizations and communities? Students are exposed to practices and ideas geared to help them make a difference, work with others, and accomplish change in their leadership endeavors. Students grapple with processes, strategies, and skills at the individual and organizational level including consulting, diagnosis, communication, and working successfully in teams.

LEADERSHIP STUDIES
The leadership studies minor is designed to provide students with the knowledge, skill, and practice to become effective leaders in a variety of fields and disciplines.

The leadership studies minor, located in the Center for Interdisciplinary Studies, crafts a curriculum that works well in partnership with a broad spectrum of majors. Courses draw from over 14 departments including the Departments of Communication Studies, Political Science, Sociology, Interdisciplinary Studies, and Philosophy, providing an overarching ethical and skills base for students.

The leadership studies minor currently offers four tracks that serve a wide variety of student interests and concerns: Women and Leadership; Military Leadership; Public Policy and Leadership; and Organizations and Leadership. A foundations course, ethics course, and practicum round out the minor.

Linguistics
What is language? How do children learn to speak? How is language represented in the mind? What do all languages, including sign languages, have in common? How is language different from the communication systems used by whales, bees, and chimpanzees? What information does a machine need in order to “understand” or “produce” speech or text? How do language barriers keep people apart, and how do language ties bring them together? Do men and women speak differently? How might we think about linguistic controversies, including debates about official languages, Ebonics, gender bias, and bilingualism in education? How can language serve as a window into the mind? Linguistics attempts to answer each of these questions and covers a surprisingly broad range of topics related to language and communication. Cutting-edge work in cognitive science investigates how natural languages are learned and processed. Grammar checkers and translation programs use language parsers; search engines, browsers, and editors use results from computational linguistics. Linguistics is behind every field that involves language in any way, you’ll need to know how language works, the stuff of linguistics.

Minor in Linguistics
See “Minor in Linguistics” on page 166.

Marine Studies
The marine studies minor is designed to provide a structured program for students with an interest in the marine environment. The program allows an emphasis in either the scientific or the social science/humanistic study of the oceans.

The program draws on courses throughout the University and is affiliated with several outstanding, specialized marine programs. These include the SEA Semester Program run by the Sea Education Association, which provides a rigorous program in marine sciences at Woods Hole, Massachusetts, and aboard one of its tall ships for training cruises in the Caribbean, Pacific, or Labrador Sea. In addition to the cruises designed to explore the broad range of aspects of marine science and culture, there are specialized cruises that add a focus on Caribbean studies, Pacific island culture, and marine environmental issues. Students may also take specialized courses in marine topics through the Marine Studies Consortium.

For more information, contact the director of marine studies, Professor Peter S. Rosen (14 Holmes Hall), at 617.373.4380 or at p.rosen@neu.edu.

MARINE-RELATED SKILL
This requirement may be satisfied by completion of the following course:
ENVR 3101  Nautical Science  3 SH
or by certification in a skill such as scuba, by a Merchant Marine license, or by a comparable level of achievement determined by a marine studies advisor.

MARINE-RELATED INDEPENDENT STUDY
This requirement may be satisfied by producing a research product on a marine-related topic, either as part of another course or independently. Acceptance of product is at the discretion of the marine studies advisor.

Middle East Studies
The minor in Middle East studies at Northeastern is an interdisciplinary program, drawing on courses in international affairs; political science; history; philosophy; religion; economics; anthropology; and languages, literatures, and cultures. The program provides an in-depth study of the Middle East (Arab world, Israel, Iran, and Turkey) and aims to enhance students’ understanding of this culturally diverse and politically important region of the world. Students are encouraged to take advantage of the University’s study-abroad programs and the “Dialogue of Civilizations” programs (faculty-led summer programs) in Egypt, Morocco, Turkey, Israel and Palestine, and other approved programs in the region.

For more information, contact Professor Kimberly Jones (270 Holmes Hall) at 617.373.8203 or at k.jones@neu.edu.

Urban Studies
The urban studies minor offers undergraduates interested in urban issues an opportunity to develop a tailor-made curriculum for their minor. Following Northeastern’s tradition of practice-oriented education, the program offers opportunities to engage in urban research and to complete cooperative education placements in organizations that address urban issues (that is, community-based organizations, city government agencies, or metropolitan planning agencies). An urban studies minor complements many social science majors as well as architecture, business, and engineering. Its goal is to provide a solid background for graduate study and professional careers in urban planning and policy, social work, and related fields.

For more information, contact the program director, Professor Joan Fitzgerald (205 Holmes Hall), at 617.373.3644 or at jo.fitzgerald@neu.edu.

Women’s Studies
Northeastern offers a minor for students interested in the vibrant field of women’s and gender studies. In general, our women’s studies program draws on the humanities, arts, and social sciences to explore the broad range of intellectual questions concerning the social location of women and the ways in which gender is embedded not only in our everyday lives but in the theories and methods that guide our academic inquiries across all disciplines, including the natural sciences. Students are exposed to an ever-
evolving body of knowledge on women, gender, and feminism. Such research and scholarship explores historical and contemporary representations of women across a wide range of disciplines as well as an exploration of the intersection of race, class, religion, ethnicity, and gender.

The women’s studies program offers an undergraduate minor as well as a graduate women’s studies certificate. The program’s faculty is composed of 60-plus affiliate members from across 19 departments and programs among four colleges. Students are encouraged to supplement their course work with women’s studies modules designed to fit their particular interests and foci. We encourage students to explore our Web site to familiarize themselves with our course offerings, distinguished faculty, international visiting scholars program, internships, study-abroad opportunities, conferences, colloquia, ongoing lecture series (Gender Matters at Northeastern), and many cosponsored events.

The women’s studies program also works closely with the independent, student-run Feminist Student Organization to sponsor programs for Women’s History Month and other events of special concern to women students.

For more information, contact the program director, Professor Debra R. Kaufman, in 515 Holmes Hall at 617.373.4270 or at d.kaufman@neu.edu; or women’s studies staff in 524 Holmes Hall at 617.373.4984 or at l.wang@neu.edu.

NORTHEASTERN UNIVERSITY
An interdisciplinary media training facility located on the second floor of Shillman Hall features two television studios; twenty-two Avid and ten Final Cut Studio state-of-the-art, nonlinear, digital video-editing systems; and a professional-level digital audio recording/editing/mixing facility. One of the television studios employs “greenroom” technology for video and digital art compositing. Qualified students may enroll in courses utilizing this facility through any of its participating departments (Art +Design, cinema studies, communication studies, history, journalism, music, or theatre) or through interdisciplinary studies. Note that these courses fill quickly; some require prerequisites; and many give preference to students whose majors require them. For field production, the studio offers an array of digital cameras and peripheral equipment including lights and microphones. For students who complete elementary and intermediate training in the studio, an interdisciplinary capstone production course is offered. For details about eligibility and availability, contact one of the participating departments or the studio manager, Ron Starr, at 617.373.2314.

Students have access to a number of modern facilities, whether participating in one of seven interdisciplinary game design and interactive media dual majors or the creative industries minor. Among these are a dedicated computer music lab, an advanced music and sound synthesis facility, a graphics and media development room, and a state-of-the-art multimedia development center that is also used by students in animation courses. The interactive media development center is the site of the program’s capstone courses, in which students from all of the core game design and interactive media programs work together on team projects. In addition, the center is used by the guest speakers and lecturers who regularly appear on campus in support of the creative industries curricula.

Hardware and software in the multimedia center permit the production of interactive media creations that integrate live action and animated moving images, graphics, photographs, sound effects, and music. The center can operate independently or via networked interchange with digital art, digital music, and media production laboratories and studios on campus or through NUNET links to the Internet, with resources available elsewhere.

For more information on the creative industries program and its facilities, visit the creative industries Web site at www.ci.neu.edu or contact the program director, Terrence Masson, at t.masson@neu.edu.

**SPECIAL PROGRAMS**

Additional information is available from involved departments and the Center for Academic Services, 1 Meserve Hall.

The availability of all special programs is contingent on meeting minimum enrollment numbers and, when an outside institution is involved, continued affiliation of that institution with the University. Overseas study programs are open to qualified middlers, juniors, and seniors with a cumulative grade-point average of 3.000 or higher.

**Transfer Program with Professional Schools**

When approved for this transfer program, a preprofessional student may reduce by one year the time normally required for obtaining both the undergraduate and professional degrees. Students who have completed at least three-fourths of the work required for a baccalaureate degree in the College of Arts and Sciences and who are accepted into an approved professional school of dentistry, law, medicine, optometry, osteopathy, or veterinary medicine will be eligible for the Bachelor of Arts or Bachelor of Science degree at the end of their second year in a professional school. At least two-thirds of the work for the baccalaureate degree must be earned in residence at Northeastern, and all other College of Arts and Sciences requirements must be fulfilled. The residence requirement must be completed prior to entering the professional school.

**Northeastern University–Hebrew College Partnership**

A cooperative relationship between Northeastern University and Hebrew College allows cross-registration and concurrent library privileges at both institutions, as well as an integrated five-year program through which students can earn a BA from Northeastern and an MA or MJEd from Hebrew College. For more information contact the Jewish studies program at 617.373.7045 or www.northeastern.edu/jewishstudies/.

**Marine Science**

*The Three Seas Program (formerly East/West Marine Biology).*

The Three Seas Program allows advanced undergraduate and beginning graduate students in biology and related areas to spend a year of field study in three diverse marine environments.

The program begins in the fall at Northeastern University’s Marine Science Center in Nahant, twelve miles from the main campus. In January, students travel to the South Pacific to study tropical biology at UC Berkeley’s Gump Marine Station on the island of Moorea, French Polynesia, located ten miles from Tahiti. The final segment of the program is conducted at the University of Washington’s Friday Harbor Laboratories on San Juan Island, located approximately 70 miles north of Seattle and part of an archipelago that lies between the mainland and Vancouver Island. For more information, contact Sal Genovese at 781.581.7370, extension 311 or visit the Three Seas Program Web site at www.threeseas.neu.edu.
Marine Science Center Summer Program in Marine Biology.
The summer program allows students to participate in intensive
courses at the Marine Science Center (MSC). Students conduct
independent research at the MSC laboratory throughout the year.
Graduate students from other universities are encouraged to use
the laboratory and field sites for thesis research.

Massachusetts Bay Marine Studies Consortium. Northeastern
University students may take classes at the Massachusetts Bay
Marine Studies Consortium. The consortium’s course offerings are
interdisciplinary and seek to bridge academic disciplines and
current concerns in the marine world. For more information,
contact the marine studies program director, Professor Peter S.
Rosen, at 617.373.4380.

Sea Education Association. SEA Semester is an interdisciplinary
program focusing on the sea in which students undertake course
work ashore followed by a practical component at sea. The
program combines intensive research in the areas of
oceanography, maritime studies, and nautical science with hands-
on experience aboard a traditional sailing ship. Piloting, celestial
navigation, and practical seamanship are learned together with
oceanographic sampling techniques and marine laboratory
procedures during a six-week voyage on a ship sailing either on
the Atlantic or Pacific Oceans. Critical thinking, problem-solving,
team-building, and leadership skills are emphasized throughout
the program. Some cruises focus on specialized topics including
oceans and climate, Caribbean studies, or Polynesian studies.
Through our affiliation with the Sea Education Association, SEA
Semester courses earn Northeastern credit. The program is
appropriate for students in biology, environmental and physical
sciences, environmental studies, American studies, and most other
areas within the liberal arts and sciences. For more information,
contact the marine studies program director, Professor Peter S.
Rosen, at 617.373.4380.

The Center for the Arts
The Center for the Arts provides enrichment to the University and
the surrounding community through arts presentation. A variety of
main stage and artist-in-residency programs serve to support and
develop the arts as a vital and integral component of the
Northeastern community. With the academic arts departments, the
center provides opportunity and support to enable students to
become knowledgeable and active participants in the arts. The
center presents and produces multicultural arts programs that serve
the on-campus community as well as the general public.

The diverse experiences of black people—in the United States,
Africa, the Caribbean, South America, and other parts of the
world—are the focus of the field of African-American studies.
The curriculum is interdisciplinary in approach and includes
historical, social and behavioral, and cultural studies. International
studies and contemporary public policy issues are also integral
parts of the program. In class, in co-op, and in internships,
students have an opportunity to apply theoretical knowledge to
real-world problems and concerns. Study-abroad programs exist in
Ghana, Egypt, South Africa, the Caribbean, and Central and South
America.

Students with successful training in African-American
studies have the knowledge to meet the challenges posed by
diverse racial, cultural, and ethnic groups in the United States and
abroad. Many graduates attend professional schools or teach at the
secondary or the college level. Others work in museums, libraries,
or research centers; in business; or in public service, social
service, or law-enforcement agencies.

Transferring to the Major
Same as college standards. Acceptance into the major is based on
students’ meeting the department’s criteria for admission and
availability of space in the programs.

American Sign Language (ASL) is a language used by large numbers of people in the United States and Canada. By mastering ASL, students gain both access to the culture of Deaf America and insights into features of spoken language that are often taken for granted. Learning a modally different language gives students a new sense of the power of language and an appreciation of how it shapes their world. In this way, the mastery of ASL sharpens critical-thinking skills.

The goal of the program is to provide a firm foundation in language, linguistics, culture, and interpreting, plus a broad-based liberal arts education. American Sign Language courses are integral to degrees in human services with a specialization in Deaf studies and in linguistics with a focus on ASL.

Opportunities for ASL–English interpreters continue to increase, due to federal and state legislation. Graduates work as interpreters in such diverse areas as higher education, business, social service agencies, advanced technology, and theatre.

Northeastern’s National and Regional Interpreter Education Centers seek to enhance the skills of interpreters currently working in the field and to increase the supply of competent interpreters throughout the United States.

Architecture is the context for civic life. In an age of increasingly rapid technological and social change, architects must find ways to forge connections between our past and our future. That involves critical thinking about many complex contemporary issues, such as the relationship of public and private life, the interaction between formal and political ideas in cities, and the role of technology in contemporary architecture and design.

Because the process of designing buildings involves the synthesis of disparate elements, it can also translate into strategies for approaching a wide range of other problems not traditionally understood to be “architecture.” At Northeastern, we connect specific problem solving inherent to architectural understanding with the larger context of contemporary cities.

The curriculum teaches students to conceptualize, synthesize, and represent complex architectural and urban issues. The program focuses on core skills and critical thinking as preparation for both professional practice and advanced study. The curriculum in the design studio encompasses two major themes: first, the studio projects focus on the art of building, and second, the projects explore how buildings affect urban conditions. Buildings meet both our individual need for shelter and our shared need for cultural meaning. The art of building includes the study of building construction and technology, as well as the cultural messages created by the expression of material, structure, and form in architecture. The contemporary city is our laboratory. This urban focus requires that students integrate their own creative impulses with the future of the society of which they will be a part. By building on the practical and technical training afforded by co-op to develop core professional skills, the curriculum focuses on architecture’s fundamental aesthetic, technological, social, and political aspects.

With the effective synthesis of the art of building with urban issues, Northeastern’s program in architecture is becoming a leader in identifying opportunities for civic representation, urban development, and neighborhood design. Northeastern’s students are in demand in area offices because of their combination of professional competence and fluency in urban architectural issues. There are opportunities for interdisciplinary cooperation in urban-oriented research and creative work in areas such as GIS mapping, urban economics and development, new forms of spatial and visual communication, and public policy. Additionally, Northeastern’s urban focus is applied globally in the semester abroad in Rome in the middle year.

**Transferring to the Major**

**INTERNAL TRANSFERS**
A minimum cumulative GPA of 3.200 is necessary to transfer into architecture. In addition, students must take the following four freshman architecture courses:

ARCH 1310 History of World Architecture 1 4 SH
ARCH 1320 History of World Architecture 2 4 SH
ARCH 1110 Fundamental Architectural Representation 6 SH
ARCH 1120 Fundamental Architectural Design 6 SH

in the appropriate order and maintain a minimum of a 3.200 GPA in order to be officially admitted into the program.
EXTERNAL TRANSFERS
Full-time architecture faculty members may evaluate nonstudio courses for conformity with NU requirements using transcripts and course descriptions. Any student seeking studio course credit (drawing, technology, or design) must present a portfolio for review and evaluation.

There is no portfolio requirement for freshman applicants.

Academic Progression Standards
A minimum GPA of 2.500 is required to remain in the major. Students below these averages will not be allowed to continue in the major.

To graduate, a student must have a 2.500 GPA in architecture.

GPA REQUIREMENT

2.000 GPA required in the minor
The visual arts are our oldest form of artistic expression. Yet today, the newest digital technologies have transformed and expanded artistic practice, production, and dissemination. More than ever, the ability to understand and use visual language is an essential part of the contemporary world. The Department of Art + Design is committed to teaching visual literacy and effective communication in many forms within the context of a broad liberal arts education. Excellent faculty and facilities make for a supportive and active place to study art and design.

**BA in Art**
The art major at Northeastern University is a general studio-based program that balances art history with studio art projects and classes in drawing and painting. It focuses on a well-rounded liberal arts education with a breadth of general studies in the arts and humanities, the natural and physical sciences, and the social sciences. Art majors have the option to take introductory courses in digital art and graphic design. A selection of studio courses can also be taken at the nearby School of the Museum of Fine Arts, Boston. Art + Design currently has three faculty-led, studio art programs in Ireland, Italy, and Spain. These intensive art programs run during the summer semesters.

**BFA in Digital Art**
Digital art is an evolving field for artists who use the computer as the primary medium for exploring, creating, and distributing their works of art. The digital art major at Northeastern University comprises the three principle technologies of dynamic and static image generation—photography, animation, and video. Students have the option of either focusing on one of these areas or creating their own path by exploring courses from all the areas. An intensive studio-based program, the curriculum seeks to provide students with knowledge in the efficacy of digital media in conjunction with critical theory. Extensive computer facilities afford students an opportunity to become highly proficient in the leading-edge skills necessary to produce their work.

**BFA in Graphic Design**
Graphic design is the practice of visualizing ideas and information to enhance human understanding. The graphic design major at Northeastern focuses on the ability to create and compose visual and verbal components to construct meaning in diverse knowledge fields. An intensive studio-based program, the curriculum balances design history and theory with studio projects in both dynamic and static media to provide a broad understanding of the principles of perception and communication. As active participants in the interpretation and production of meaning itself, students have the opportunity to integrate the many facets of their University-based liberal arts experience. Extensive computer facilities afford students an opportunity to become proficient in the leading-edge skills necessary to produce their work for both the virtual and concrete worlds.

**BFA in Studio Art**
A new joint BFA degree program in collaboration with the School of the Museum of Fine Arts, Boston (SMFA). The studio art major consists predominately of studio art courses with an accompanying group of Art + Design history courses and general electives. Students in this program take their studio art classes at the SMFA (located directly adjacent to Northeastern’s campus) and their Art + Design history courses and general electives at Northeastern. The BFA in Studio Art degree is awarded by Northeastern. This program allows you to explore a wide range of media, including ceramics, drawing, film, glass, metals, painting, performance, print and paper, sculpture, and sound.

**Additional Dual Majors and Minors**
The Department of Art + Design also offers the following dual majors and minors:

- **Game design dual majors**: For specific requirements and electives, see “BFA in Digital Art and Game Design” beginning on page 63 and “BFA in Graphic Design and Game Design” beginning on page 66.
- **Interactive media dual majors**: For specific requirements and electives, see “BFA in Digital Art and Interactive Media” beginning on page 64 and “BFA in Graphic Design and Interactive Media” beginning on page 67.
- **Computer science and digital art dual major**: For specific requirements and electives, see “BS in Computer Science and Digital Art” beginning on page 263.
- **Minors in Art + Design and art history are also available.**

**Admission Requirements for Art + Design**
There are specific admissions criteria for students entering majors in the Art + Design department. See “Admission Requirements for Art + Design” in the Admission section of this catalog, page 5.
Transferring to the Major
Students already enrolled at the University may apply to transfer into the Department of Art + Design. Students wishing to transfer should do the following:

- Submit a transfer petition to the chair of the department.
- Apply with a minimum GPA of 2.500.
- Have the Art + Design chair assign them a faculty advisor.
- Fulfill the portfolio requirement at the time of application or on a schedule designated by the department chair.

Academic Progression Standards
Same as college standards.

GENERAL REQUIREMENTS

Social Science Level 1
Complete the following course:
PSYC 1101 Foundations of Psychology 4 SH

Mathematics
Complete the following course:
MATH 1260 Math Fundamentals for Games 4 SH

Computer Science
Complete the following course:
CS 2500 Fundamentals of Computer Science 1 4 SH
with CS 2501 Lab for CS 2500 1 SH
Ethics and Culture

Complete one of the following courses. This course should be taken only after the student has completed 56 semester hours:

- COMM 1220 Media, Culture, and Society 4 SH
- PHIL 1145 Technology and Human Values 4 SH
- SOCL 4528 Computers and Society 4 SH

CREATIVE INDUSTRIES ELECTIVES

Complete three courses from the following lists. If the course has prerequisites, the student must complete those first unless permission is obtained in advance from the program office. If the course requires a corresponding lab or tools course, that course must be taken as well:

**Interactive Media**
- IM 2200 Digital Narrative 2 4 SH
- IM 3200 Interactive Sound Development 4 SH
- IM 3500 Cross-Media Marketing and Communication 4 SH
- IM 3600 Market Analysis for the Creative Industries 4 SH
- IM 3700 Interface and Virtual Environments 4 SH
- IM 4992 Directed Study 4 SH
- IM 4993 Independent Study 4 SH

**Digital Art**
- ARTD 2360 Photo Basics 4 SH
  with ARTD 2361 Photo Tools 1 SH
- ARTD 2370 Animation Basics 4 SH
  with ARTD 2371 Animation Tools 1 SH
- ARTD 2380 Video Basics 4 SH
  with ARTD 2381 Video Tools 1 SH
- ARTH 2212 Survey of the Still and Moving Image 4 SH

**Computer Science**
- CS 2510 Fundamentals of Computer Science 2 4 SH
  with CS 2511 Lab for CS 2510 1 SH
- CS 2800 Logic and Computation 4 SH
  with CS 2801 Lab for CS 2800 1 SH
- CS 3200 Database Design 4 SH
- CS 3500 Object-Oriented Design 4 SH
- CS 3800 Theory of Computation 4 SH
- CS 4100 Artificial Intelligence 4 SH
- CS 4300 Computer Graphics 4 SH
- CS 4400 Programming Languages 4 SH
- CS 4550 Web Development 4 SH
- CS 4800 Algorithms and Data 4 SH
- IS 4300 Human Computer Interaction 4 SH

**Psychology**
- PSYC 3452 Sensation and Perception 4 SH
- PSYC 3464 Psychology of Language 4 SH
- PSYC 3466 Cognition 4 SH

REQUIRED GENERAL ELECTIVES

Complete two general electives. If the NU Core comparative studies of cultures requirement is to be satisfied by taking a course, then it must be one of the general electives.

GENERAL ELECTIVES

Additional courses taken beyond college and major course requirements to satisfy graduation credit requirements.

COOPERATIVE EDUCATION

If elected

UNIVERSITY-WIDE REQUIREMENTS

140 total semester hours required
Minimum 2.000 GPA required

BS in Computer Science and Digital Art

See page 263.

Minor in Art + Design

Restricted to students with majors outside the Department of Art + Design.

ART + DESIGN REQUIRED COURSES

Complete the following four courses with corresponding tools courses, as indicated:

- ARTF 1120 Drawing 1 Foundation 4 SH
- ARTF 1122 2D Foundation 4 SH
  with ARTF 1123 2D Tools: Imaging Basics 1 SH
- ARTF 1124 3D Foundation 4 SH
  with ARTF 1125 3D Tools: Form Basics 1 SH
- ARTF 2220 4D Foundation 4 SH
  with ARTF 2221 4D Tools: Motion Basics 1 SH

ART + DESIGN ELECTIVE

Complete one of the following courses with corresponding tools course, as indicated. *Note:* There is no tools course for ARTS 2340:

- ARTG 2250 Typography 1 4 SH
  with ARTG 2251 Type Tools 1 SH
- ARTS 2340 Painting Basics 4 SH
- ARTD 2360 Photo Basics 4 SH
  with ARTD 2361 Photo Tools 1 SH
- ARTD 2370 Animation Basics 4 SH
  with ARTD 2371 Animation Tools 1 SH
- ARTD 2380 Video Basics 4 SH
  with ARTD 2381 Video Tools 1 SH

GPA REQUIREMENT

3.000 GPA required in the minor
Minor in Art History

**REQUIREMENTS FOR NON–ART + DESIGN MAJORS**

Students with majors outside the Department of Art + Design should complete the following requirements:

**Art History Electives**

Complete five courses from the following list. *Note: Architectural history courses may also be used upon approval of the chair of the Art + Design department:*

- ARTE 2501 Art + Design Abroad: History 4 SH
- ARTH 1110 Art + Design History before 1400 4 SH
- ARTH 1111 Art + Design History since 1400 4 SH
- ARTH 2210 Art + Design History, 1900 to 1945 4 SH
- ARTH 2211 Art + Design History, 1945 to Present 4 SH
- ARTH 2212 Survey of the Still and Moving Image 4 SH
- ARTH 2213 Nineteenth-Century Art 4 SH
- ARTH 2214 American Art 4 SH
- ARTH 3410 Art of the African Diaspora 4 SH

**REQUIREMENTS FOR ART + DESIGN MAJORS**

Students with majors in the Department of Art + Design should complete the following requirements:

**Art History Electives**

Augment the art history courses within your major by completing four electives from the following list. *Note: Architectural history, cinema studies, or creative industries courses may also be used upon approval by the chair of the Art + Design department:*

- ARTE 2501 Art + Design Abroad: History 4 SH
- ARTH 2211 Art + Design History, 1945 to Present 4 SH
- ARTH 2212 Survey of the Still and Moving Image 4 SH
- ARTH 2213 Nineteenth-Century Art 4 SH
- ARTH 2214 American Art 4 SH
- ARTH 3410 Art of the African Diaspora 4 SH

Asian studies at Northeastern is an interdisciplinary program that provides students with a broad introduction to the history, politics, cultures, and societies of Asia, particularly China and Japan, in a global context. Our major is designed to promote an understanding of national, regional, and local cultures of the fastest-developing continent in the world and the ways that its various cultures interact with one another and the rest of the
world. Our courses are offered in the departments of English, history, modern languages, music, philosophy, religion, political science, and sociology and anthropology. Students majoring in Asian studies are strongly encouraged to accelerate their language acquisition process and gain firsthand experiences in Asia through participation in an academic study-abroad program, international co-op experience, or an experiential educational program.

**Transferring to the Major**

Same as college standards. Acceptance into the major is based on students’ meeting the department’s criteria for admission and availability of space in the programs.

**Academic Progression Standards**

Same as college standards.

BEHAVIORAL NEUROSCIENCE

DONALD M. O’MALLEY, PhD
Associate Professor, Biology, and Program Director

Office: 134 Mugar Hall
Phone: 617.373.2284
E-mail contact: Donald M. O’Malley, Associate Professor and  
  Program Director, d.omalley@neu.edu

The behavioral neuroscience major is an interdepartmental  
program for undergraduates, with a program director and advisory  
board made up of the neuroscience faculty of the College of Arts  
and Sciences. The field of neuroscience focuses on brain  
mechanisms and how they give rise to behavioral functions in  
humans and animals. Behavioral neuroscience combines the  
disciplines of biology and psychology with a strong background in  
basic physical sciences and mathematics. The goal is to achieve an  
understanding of anatomy and physiology of nerve cells, chemical  
transmission, simple neural circuits, and fundamental biological  
processes such as inheritance and development, and then to see  
how these biological events give rise to normal and pathological  
behavior. The primary objective of the neuroscience major is to  
draw together faculty and students who are interested in this  
interdisciplinary topic and to provide undergraduates with an  
education in the field. This major also seeks to prepare students  
for advancement to graduate programs in the field of neuroscience  
or to biology or psychology programs with an emphasis in  
neurobiology. An additional objective of this major is to prepare  
its students for admission to medical school, although there are  
additional science courses that should be taken as electives.  
Finally, the goal of the curriculum is to prepare students for  
employment in clinical settings or in allied fields such as the  
biontech industry.

Note: Due to overlap in course content, double majoring in  
behavioral neuroscience and psychology or behavioral  
neuroscience and biology is not permitted.

Transferring to the Major
Students must have a minimum cumulative GPA of 2.000 and  
completion of any three of the following five courses:

BIOL 1101  Principles of Biology 1  4 SH
with BIOL 1102  Lab for BIOL 1101  1 SH
or BIOL 1111  General Biology 1  4 SH
with BIOL 1112  Lab for BIOL 1111  1 SH

BIOL 1103  Principles of Biology 2  4 SH
with BIOL 1104  Lab for BIOL 1103  1 SH
or BIOL 1113  General Biology 2  4 SH
with BIOL 1114  Lab for BIOL 1113  1 SH

with CHEM 1212  Lab for CHEM 1211  1 SH

CHEM 1214  General Chemistry 2  4 SH
with CHEM 1215  Lab for CHEM 1214  1 SH

PSYC 1101  Foundations of Psychology  4 SH
with a minimum GPA of 2.000 for these courses. Acceptance into  
the major is based on students’ meeting the above criteria and  
availability of space in the program.

Academic Progression Standards

### BEHAVIORAL NEUROSCIENCE MAJOR CREDIT REQUIREMENT

Complete 83 semester hours in the major.

Due to overlap in course content, double majoring in behavioral neuroscience and psychology or behavioral neuroscience and biology is not permitted. Also, there is no minor offered in behavioral neuroscience.

### GENERAL ELECTIVES

Additional courses taken beyond college and major course requirements to satisfy graduation credit requirements.

### COOPERATIVE EDUCATION

If elected

### UNIVERSITY-WIDE REQUIREMENTS

128 total semester hours required

Minimum 2.000 GPA required

### BIOCHEMISTRY

**Kostia Bergman, PhD**

Associate Professor and Chair of the Biochemistry Steering Committee

Advising Web site: www.biology.neu.edu/bioadvising.html

Biochemistry includes nearly the entire spectrum of science—from physics and chemistry to biology and medicine. The biochemistry major, sponsored jointly by the Departments of Biology and Chemistry and Chemical Biology, provides a strong foundation in mathematics and the physical sciences as well as thorough training in biochemistry, biology, and chemistry. In addition to formal class work, opportunities are available for participation in faculty research programs on an individual basis or through the Honors Program. The large number of biotechnology
companies and biomedical facilities in the Boston area provides a rich source of opportunities through Northeastern’s program of cooperative education. Two combined BS/MS programs are also available: BS in biochemistry/MS in biotechnology and BS in biochemistry/MS in chemistry.

A Bachelor of Science degree in biochemistry allows students to enter the job market directly or go on to graduate, medical, veterinary, dental, law, or business school. Students may find positions in biotechnology companies, pharmaceutical companies, or government agencies, working in laboratory or clinical research, quality control, production, information systems, marketing, or technical sales. Students may also pursue graduate study in biochemistry, molecular biology, cell biology, biophysics, genetics, toxicology, biotechnology, clinical chemistry, animal science, nutrition, plant science, or other biomedical sciences.

Students who are interested in attending medical, dental, or veterinary school following graduation are urged to consult with the preprofessional advisory committee early in their careers at Northeastern.

Transferring to the Major

Upperclass students transferring to biochemistry must have a minimum GPA of 2.000 and have completed a year in chemistry and a year in calculus, preferably the following courses:

- MATH 1251 Calculus and Differential Equations for Biology 1
  - 4 SH
- MATH 1252 Calculus and Differential Equations for Biology 2
  - 4 SH
  with a grade of C or better.

Transferring into biochemistry requires the approval of the Biochemistry Coordinating Committee Chair. Acceptance into the major is based on students’ meeting the criteria for admission and availability of space in the program.

Academic Progression Standards

After four semesters in the major, students must have a GPA of at least 2.000 in all science and math courses and have completed at least six of the following courses:

- BIOL 1101 Principles of Biology 1
  - 4 SH
  with BIOL 1102 Lab for BIOL 1101
  - 1 SH
- BIOL 1103 Principles of Biology 2
  - 4 SH
  with BIOL 1104 Lab for BIOL 1103
  - 1 SH
- BIOL 2301 Genetics and Molecular Biology
  - 4 SH
  with BIOL 2302 Lab for BIOL 2301
  - 1 SH
- CHEM 1211 General Chemistry 1
  - 4 SH
  with CHEM 1212 Lab for CHEM 1211
  - 1 SH
- CHEM 1214 General Chemistry 2
  - 4 SH
  with CHEM 1215 Lab for CHEM 1214
  - 1 SH
- CHEM 2311 Organic Chemistry 1
  - 4 SH
  with CHEM 2312 Lab for CHEM 2311
  - 1 SH
- CHEM 2313 Organic Chemistry 2
  - 4 SH
  with CHEM 2314 Lab for CHEM 2313
  - 1 SH

Students who transfer into the biochemistry major will be allowed two semesters after entering the major to meet the minimum standards for their class. Students who fail to meet the above standards will be placed on departmental probation. Two consecutive semesters on departmental probation will result in dismissal from the major.

To graduate with a major in biochemistry, a student must have a cumulative GPA of 2.000 for all science and mathematics courses required for the major.

No double majors are offered in biochemistry and biology or in biochemistry and behavioral neuroscience due to similarity in course curricula. Students must maintain a minimum grade-point average of 2.000 to remain in this program.

FREDERICK C. DAVIS, PHD
Professor and Interim Chair

Office: 134 Mugar Life Sciences Building
Phone: 617.373.2260
Fax: 617.373.3724
Advising Web site: www.biology.neu.edu/bioadvising.html

By majoring in biology, students are exposed to the organization and the processes of life, from molecules and cells through organs and organ systems to populations, species, ecosystems, and evolution. The major offers the mathematical, chemical, and physical background necessary for understanding biology and the practical scientific skills associated with each of these areas. It allows students to begin to specialize in a subdiscipline of biology such as animal physiology, cell biology, ecology, marine biology, microbiology, molecular biology, plant biology, zoology, and so forth. Numerous opportunities for relevant positions are available through Northeastern’s program of cooperative education.

There are several interdisciplinary opportunities involving biology: BS in biochemistry; BS in behavioral neuroscience; BS in computer science and biology; BS in biology and geology; BS in biology and environmental geology; BS in biology/MS in biotechnology; and BS in biochemistry/MS in biotechnology. A marine biology concentration, designed to provide biology majors with a strong foundation in marine biology and related disciplines, is offered through the Northeastern University Marine Science Center in Nahant.

The undergraduate biology major seeks to prepare students for careers in the life sciences, including medical, dental, and other health-related fields. Students may find employment in federal, state, industrial, hospital, or university laboratories or in industries involved in the manufacture and distribution of pharmaceuticals, biological products, food, or scientific equipment. Biologists also work in fisheries, forestry services, county and state agencies, museums, aquariums, research vessels, and marine stations. Graduate study culminating in a master’s or doctoral degree can lead to careers in upper-level teaching or research in any of the life sciences.

Premedical, predental, and other preprofessional students are urged to consult with the preprofessional advisory committee early in their careers at Northeastern.

The biology department strongly encourages undergraduate research by providing opportunities and support through a number of departmental programs, including research co-ops and internships, course credit for research in faculty labs, honors theses, and work-study research positions. Undergraduates are encouraged to present their findings at Northeastern’s annual Scholarship and Technology Expo, as well as at external research conferences and in scholarly journals.
Transferring to the Major
Students transferring to biology must have a minimum cumulative GPA of 2.000 and have completed the following course:
MATH 1120  Precalculus  4 SH
or one semester of calculus with a grade of C or better.
Acceptance into the major is based on students’ meeting the department’s criteria for admission and availability of space in the programs.

Academic Progression Standards
After four semesters in the major, students must have a GPA of at least 2.000 in all science and math courses and have completed at least six of the following courses:
BIOL 1101  Principles of Biology 1  4 SH
with BIOL 1102  Lab for BIOL 1101  1 SH
and BIOL 1103  Principles of Biology 2  4 SH

with CHEM 2314  Lab for CHEM 2313  1 SH
MATH 1251  Calculus and Differential Equations for Biology 1  4 SH
and MATH 1252  Calculus and Differential Equations for Biology 2  4 SH
Students who transfer into the biology major will be allowed two semesters after entering the major to meet the minimum standards for their class. Students who fail to meet the above standards will be placed on departmental probation. Two consecutive semesters on departmental probation will result in dismissal from the major.

To graduate with a major in biology, a student must have a cumulative GPA of 2.000 for all science and mathematics courses required for the major. No double majors are offered in biology and biochemistry or in biology and behavioral neuroscience due to similarity in course curricula.

Complete a lecture/lab set for Physics 1 and for Physics 2 (PHYS 1145 and PHYS 1147 are recommended):
PHYSICS 1
PHYS 1145 Physics for Life Sciences 1 4 SH
with PHYS 1146 Lab for PHYS 1145 1 SH
PHYS 1151 Physics for Engineering 1 4 SH
with PHYS 1152 Lab for PHYS 1151 1 SH
PHYS 1161 Physics 1 4 SH
with PHYS 1162 Lab for PHYS 1161 1 SH
PHYSICS 2  
PHYS 1147 Physics for Life Sciences 2 4 SH  
with PHYS 1148 Lab for PHYS 1147 1 SH  
PHYS 1155 Physics for Engineering 2 4 SH  
with PHYS 1156 Lab for PHYS 1155 1 SH  
PHYS 1165 Physics 2 4 SH  
with PHYS 1166 Lab for PHYS 1165 1 SH

**BIOLOGY MAJOR REQUIREMENTS (MARINE BIOLOGY CONCENTRATION)**

**Required Biology**  
Complete the following three courses with corresponding labs:  
BIOL 1101 Principles of Biology 1 4 SH  
with BIOL 1102 Lab for BIOL 1101 1 SH  
or BIOL 1111 General Biology 1 4 SH  
with BIOL 1112 Lab for BIOL 1111 1 SH  
BIOL 1103 Principles of Biology 2 4 SH  
with BIOL 1104 Lab for BIOL 1103 1 SH  
or BIOL 1113 General Biology 2 4 SH  
with BIOL 1114 Lab for BIOL 1113 1 SH  
BIOL 2301 Genetics and Molecular Biology 4 SH  
with BIOL 2302 Lab for BIOL 2301 1 SH

**Experiential Education Introduction**  
Complete the following course:  
BIOL 1106 Introduction to Experiential Education 1 SH

**Cellular and Molecular Biology**  
Complete one course with corresponding lab from the following list:  
BIOL 2319 Regulatory Cell Biology 4 SH  
with BIOL 2320 Lab for BIOL 2319 1 SH  
or BIOL 2321 Microbiology 4 SH  
with BIOL 2322 Lab for BIOL 2321 1 SH  
or BIOL 2323 Biochemistry 4 SH  
with BIOL 2324 Lab for BIOL 2323 1 SH

**Organismal and Population Biology**  
Complete the following course with corresponding lab:  
BIOL 2311 Ecology 4 SH  
with BIOL 2312 Lab for BIOL 2311 1 SH

**Marine Biology Courses**  
Complete four marine biology electives within the course range below for a minimum of 16 semester hours:  
BIOL 5501 to BIOL 5531

**Marine Biology Research**  
Complete 4 semester hours of directed study/research:  
BIOL 4991 Research 4 SH  
or consult advisor for additional courses.

**Experiential Education**  
An activity related to biology and approved by the experiential education advisor must be completed before the capstone. Among the possibilities are co-op experience, junior/senior honors thesis, research project in a faculty lab, study abroad with submission of a paper, 120 hours of supervised volunteer work in a biology-related area, participation in the Three Seas Program with submission of a project paper, or other approved experiences.

**Biology Capstone**  
Complete the following course:  
BIOL 4701 Biology Capstone 4 SH

**BIOLOGY MAJOR CREDIT/GPA REQUIREMENTS (MARINE BIOLOGY CONCENTRATION)**  
Complete 85 semester hours in the major with a cumulative GPA of 2.000.

**GENERAL ELECTIVES**  
Additional courses taken beyond college and major course requirements to satisfy graduation credit requirements.

**COOPERATIVE EDUCATION**  
If elected

**UNIVERSITY-WIDE REQUIREMENTS**  
136 total semester hours required  
Minimum 2.000 GPA required

GENETICS AND MOLECULAR BIOLOGY
BIOL 2301 Genetics and Molecular Biology 4 SH
with BIOL 2302 Lab for BIOL 2301 1 SH

Chemistry Courses
Complete the following four courses with corresponding labs:
CHEM 1211 General Chemistry 1 4 SH
with CHEM 1212 Lab for CHEM 1211 1 SH
CHEM 1214 General Chemistry 2 4 SH
with CHEM 1215 Lab for CHEM 1214 1 SH
CHEM 2311 Organic Chemistry 1 4 SH
with CHEM 2312 Lab for CHEM 2311 1 SH
CHEM 2313 Organic Chemistry 2 4 SH
with CHEM 2314 Lab for CHEM 2313 1 SH

Cellular and Molecular Biology
Complete one course with corresponding lab from the following list:
BIOL 2319 Regulatory Cell Biology 4 SH
with BIOL 2320 Lab for BIOL 2319 1 SH
BIOL 2321 Microbiology 4 SH
with BIOL 2322 Lab for BIOL 2321 1 SH
BIOL 2323 Biochemistry 4 SH
with BIOL 2324 Lab for BIOL 2323 1 SH

Organismal and Population Biology
Complete one course with corresponding lab from the following list:
BIOL 2311 Ecology 4 SH
with BIOL 2312 Lab for BIOL 2311 1 SH
BIOL 2313 Plant Biology 4 SH
with BIOL 2314 Lab for BIOL 2313 1 SH
BIOL 2315 Invertebrate Zoology 4 SH
with BIOL 2316 Lab for BIOL 2315 1 SH
BIOL 2317 Vertebrate Zoology 4 SH
with BIOL 2318 Lab for BIOL 2317 1 SH

MATHEMATICS MAJOR REQUIREMENTS

Programming Skills
Complete the following course:
MATH 2250 Programming Skills for Mathematics 2 SH

Calculus 1
Complete one of the following courses:
MATH 1251 Calculus and Differential Equations for Biology 1 4 SH
MATH 1341 Calculus 1 for Science and Engineering 4 SH

Calculus 2 and Calculus 3
Complete the following two courses:
MATH 1342 Calculus 2 for Science and Engineering 4 SH
or MATH 1251 Calculus and Differential Equations for Biology 1 4 SH
MATH 2321 Calculus 3 for Science and Engineering 4 SH

Physics
Complete the following course with corresponding lab:
PHYS 1161 Physics 1 4 SH
with PHYS 1162 Lab for PHYS 1161 1 SH

Required Mathematics Courses
Complete the following three courses:
MATH 1365 Introduction to Mathematical Reasoning 4 SH
MATH 2351 Ordinary Differential Equations 4 SH
MATH 3081 Probability and Statistics 4 SH

Mathematics Electives
Complete three mathematics courses from the following list:
MATH 2331 Linear Algebra 4 SH
MATH 3000 to MATH 4899

ADDITIONAL REQUIREMENTS

Biology/Mathematics Integrative Courses
Complete two integrative courses with corresponding labs, as indicated, from the following list:
BIOL 3405 Neurobiology 4 SH
BIOL 5551 Principles of Animal Physiology 4 SH
with BIOL 5552 Lab for BIOL 5551 1 SH
BIOL 5581 Biological Imaging 4 SH
BIOL 6308 Bio IT Methods 1—Genome and Proteome Analysis 4 SH
BIOL 6309 Bio IT Methods 2—Protein Structure and Systems 4 SH
CS 2500 Fundamentals of Computer Science 1 4 SH
with CS 2501 Lab for CS 2500 1 SH
CS 2510 Fundamentals of Computer Science 2 4 SH
with CS 2511 Lab for CS 2510 1 SH
MATH 4581 Statistics and Stochastic Processes 4 SH
MATH 7343 Applied Statistics 4 SH

Experiential Education Introduction
Complete the following two courses:
BIOL 1106 Introduction to Experiential Education 1 SH
MATH 3000 Co-op and Experiential Learning Reflection Seminar 1 1 SH
or MATH 4000 Co-op and Experiential Learning Reflection Seminar 2 1 SH

Writing-Intensive in the Major
Complete one of the following courses:
BIOL 1106 Introduction to Experiential Education 1 SH
MATH 3000 Co-op and Experiential Learning Reflection Seminar 1 1 SH
or MATH 4000 Co-op and Experiential Learning Reflection Seminar 2 1 SH

NORTHEASTERN UNIVERSITY
BIOL 2323 Biochemistry 4 SH
with BIOL 2324 Lab for BIOL 2323 1 SH
BIOL 2325 Marine Biology 4 SH
with BIOL 2326 Lab for BIOL 2325 1 SH
MATH 3150 Real Analysis 4 SH

Advanced Writing in the Disciplines
Complete one of the following courses:
ENGL 3301 Advanced Writing in the Disciplines 4 SH
ENGL 3307 Advanced Writing in the Sciences 4 SH

Capstone
Complete one of the following capstone courses:
BIOL 4701 Biology Capstone 4 SH
MATH 4025 Applied Mathematics Capstone 4 SH

BIOLOGY AND MATHEMATICS DUAL-MAJOR CREDIT/GPA REQUIREMENTS
Complete 93 semester hours in the major with a cumulative GPA of 2.000.

GENERAL ELECTIVES
Additional courses taken beyond college and major course requirements to satisfy graduation credit requirements.

COOPERATIVE EDUCATION
If elected

UNIVERSITY-WIDE REQUIREMENTS
143 total semester hours required
Minimum 2.000 GPA required

BS in Computer Science and Biology
See page 260.

BS in Biology/MS in Biotechnology
APPLICATION PROCEDURES
Students should apply for the BS/MS program during their fifth academic semester. Before applying, students must have completed 80 semester hours and one co-op experience.

NU CORE REQUIREMENTS
See page 26 for requirement list.

BREADTH COURSES FOR BIOLOGY
Mathematics
Complete the following two courses:
MATH 1251 Calculus and Differential Equations for Biology 1 4 SH
MATH 1252 Calculus and Differential Equations for Biology 2 4 SH

Chemistry
Complete the following four courses with corresponding labs:
CHEM 1211 General Chemistry 1 4 SH
with CHEM 1212 Lab for CHEM 1211 1 SH
CHEM 1214 General Chemistry 2 4 SH
with CHEM 1215 Lab for CHEM 1214 1 SH
CHEM 2311 Organic Chemistry 1 4 SH
with CHEM 2312 Lab for CHEM 2311 1 SH
CHEM 2313 Organic Chemistry 2 4 SH
with CHEM 2314 Lab for CHEM 2313 1 SH

Physics
Complete a lecture/lab set for Physics 1 and Physics 2 (PHYS 1145 and PHYS 1147 are recommended):
PHYSICS 1
PHYS 1145 Physics for Life Sciences 1 4 SH
with PHYS 1146 Lab for PHYS 1145 1 SH
PHYS 1151 Physics for Engineering 1 4 SH
with PHYS 1152 Lab for PHYS 1151 1 SH
PHYS 1161 Physics 1 4 SH
with PHYS 1162 Lab for PHYS 1161 1 SH
PHYS 1147 Physics for Life Sciences 2 4 SH
with PHYS 1148 Lab for PHYS 1147 1 SH
PHYS 1155 Physics for Engineering 2 4 SH
with PHYS 1156 Lab for PHYS 1155 1 SH
PHYS 1165 Physics 2 4 SH
with PHYS 1166 Lab for PHYS 1165 1 SH

Intermediate or Advanced Science
Complete one intermediate or advanced science course from the following list:
BIOL 2311 to BIOL 5999
CHEM 2321 Analytical Chemistry 4 SH
CHEM 2341 to CHEM 5999
ENVR 2000 to ENVR 4989
MATH 2280 to MATH 4989
PHYS 2303 to PHYS 5999
PSYC 3458 Psychobiology 4 SH
PSYC 4510 Psychopharmacology 4 SH
PSYC 4608 Laboratory in Animal Behavior Research 4 SH

BIOLOGY MAJOR REQUIREMENTS
Required Biology
Complete the following three courses with corresponding labs:
BIOL 1101 Principles of Biology 1 4 SH
with BIOL 1102 Lab for BIOL 1101 1 SH
or BIOL 1111 General Biology 1 4 SH
with BIOL 1112 Lab for BIOL 1111 1 SH
BIOL 1103 Principles of Biology 2 4 SH
with BIOL 1104 Lab for BIOL 1103 1 SH
or BIOL 1113 General Biology 2 4 SH
with BIOL 1114 Lab for BIOL 1113 1 SH
GENETICS
BIOL 2301 Genetics and Molecular Biology 4 SH
with BIOL 2302 Lab for BIOL 2301 1 SH
**Experiential Education Introduction**
Complete the following course:
BIOL 1106 Introduction to Experiential Education 1 SH

**BIOLOGY MAJOR ELECTIVES**

**Cellular and Molecular Biology**
Complete the following course with corresponding lab:
BIOL 2323 Biochemistry 4 SH
with BIOL 2324 Lab for BIOL 2323 1 SH

**Organismal and Population Biology**
Complete one course with corresponding lab from the following list:
BIOL 2311 Ecology 4 SH
with BIOL 2312 Lab for BIOL 2311 1 SH
BIOL 2313 Plant Biology 4 SH
with BIOL 2314 Lab for BIOL 2313 1 SH
BIOL 2315 Invertebrate Zoology 4 SH
with BIOL 2316 Lab for BIOL 2315 1 SH
BIOL 2317 Vertebrate Zoology 4 SH
with BIOL 2318 Lab for BIOL 2317 1 SH

**Biology Capstone**
Complete the following course:
BIOL 4701 Biology Capstone 4 SH

**BIOTECHNOLOGY REQUIREMENTS—GRADUATE COURSES TAKEN AS AN UNDERGRADUATE**

**Required Courses**
Complete the following five courses for graduate credit:
BIOL 5579 Biochemistry/Molecular Biology 5 SH
Experimental Approaches
BIOL 6301 Molecular Cell Biology 4 SH
IDSC 5120 Introduction to Biotechnology 2 SH
IDSC 7245 Biotechnology Applications Laboratory 2 SH
PHSC 5100 Concepts in Pharmaceutical Science 2 SH

**Elective Course Work**
Complete one additional graduate-level biology elective course.

**BIOTECHNOLOGY REQUIREMENTS—GRADUATE COURSES TAKEN AS A GRADUATE STUDENT**

**Track**
Complete either the molecular track or the pharmaceutical track:

**MOLECULAR TRACK**
Complete the following five courses:
BIOL 7382 Research Problem Solving 2 SH
CHEM 5611 Analytical Separations 3 SH
CHEM 5612 Principles of Mass Spectrometry 3 SH
CHEM 5660 Analytical Biochemistry 3 SH
MGMT 6219 The Business of Biotechnology 3 SH

**PHARMACEUTICAL TRACK**
Complete the following seven courses:
MGMT 6219 The Business of Biotechnology 3 SH
PHSC 6210 Drug Design, Evaluation, and Development 2 SH
PHSC 6214 Experimental Design and Biometrics 2 SH
PHSC 6216 Human Physiology and Pathophysiology 2 SH
PHSC 6218 Biomedical Chemical Analysis 2 SH
PMST 6252 Pharmacokinetics and Drug Metabolism 3 SH
PMST 6254 Advanced Drug Delivery System 3 SH

**Elective Course Work**
Complete 2 semester hours of graduate electives chosen in consultation with your advisor.

**Graduate-Level Co-op**
Complete one graduate-level co-op assignment, preferably in the biotechnology industry.

**UNDERGRADUATE BIOLOGY MAJOR CREDIT/GPA REQUIREMENTS**
Complete 85 semester hours in the undergraduate major with a cumulative GPA of 2.000.

**GENERAL ELECTIVES**
Additional courses taken beyond college and major course requirements to satisfy graduation credit requirements.

**COOPERATIVE EDUCATION**

**UNIVERSITY-WIDE REQUIREMENTS**
136 total semester hours required in the undergraduate program
Minimum 2.000 GPA required for undergraduate courses
Minimum 3.000 GPA required for graduate courses

**Minor in Biology**
This minor is not available for students who major in biology, biochemistry, behavioral neuroscience, or any dual major that involves biology.

**REQUIRED BIOLOGY COURSES**
Complete five biology courses for a total of at least 23 semester hours. At least three courses must be intermediate or advanced (BIOL 2301 to BIOL 5999). Three of the five courses must contain a lab corequisite.

**BREADTH COURSE**
To provide breadth of knowledge, complete one additional science course with the BIOL, CHEM, ENVR, or PHYS subject code or from the following list:
PSYC 3458 Psychobiology 4 SH
PSYC 3510 Psychopharmacology 4 SH

**GPA REQUIREMENT**
2.000 GPA required in the minor
Minor in Marine Biology

This minor is not available for students who major in biology or any dual major that involves biology. Biology majors interested in marine biology should consider the concentration in marine biology.

REQUIRED COURSES

Complete the following two courses with labs:

- **BIOL 1101** Principles of Biology 1 4 SH
- with **BIOL 1102** Lab for BIOL 1101 1 SH
- or **BIOL 1111** General Biology 1 4 SH
- with **BIOL 1112** Lab for BIOL 1111 1 SH
- **BIOL 1103** Principles of Biology 2 4 SH
- with **BIOL 1104** Lab for BIOL 1103 1 SH
- or **BIOL 1113** General Biology 2 4 SH
- with **BIOL 1114** Lab for BIOL 1113 1 SH

ELECTIVE COURSES

Complete three courses from the following list:

- **BIOL 2315** Invertebrate Zoology 4 SH
- with **BIOL 2316** Lab for BIOL 2315 1 SH
- **BIOL 2325** Marine Biology 4 SH
- with **BIOL 2326** Lab for BIOL 2325 1 SH
- **BIOL 5501** Marine Botany 4 SH
- with **BIOL 5502** Lab for BIOL 5501 1 SH
- **BIOL 5503** Marine Invertebrate Zoology 4 SH
- with **BIOL 5504** Lab for BIOL 5503 1 SH
- **BIOL 5505** Biology of Corals 3 SH
- **BIOL 5507** Biology and Ecology of Fishes 3 SH
- **BIOL 5509** Marine Birds and Mammals 2 SH
- with **BIOL 5510** Lab for BIOL 5509 1 SH
- **BIOL 5515** Marine Ecology 4 SH
- **BIOL 5517** Oceanography 2 SH
- with **BIOL 5518** Lab for BIOL 5517 1 SH
- **BIOL 5519** Ocean and Coastal Processes 2 SH
- **BIOL 5521** Experimental Design Marine Ecology 4 SH
- with **BIOL 5522** Lab for BIOL 5521 1 SH
- **BIOL 5523** Molecular Marine Biology 3 SH
- **BIOL 5525** Marine Microbial Ecology 2 SH
- with **BIOL 5526** Lab for BIOL 5525 1 SH
- **BIOL 5527** Marine Conservation Biology 3 SH
- **BIOL 5529** Physiological and Molecular Marine Ecology 3 SH
- **BIOL 5589** Diving Research Methods 2 SH

BREADTH COURSE

To provide breadth of knowledge, complete one additional science course with the BIOL, CHEM, ENVR, or PHYS subject code or from the following list:

- **PSYC 3458** Psychobiology 4 SH
- **PSYC 3510** Psychopharmacology 4 SH

GPA REQUIREMENT

2.000 GPA required in the minor
Transferring to the Major
A GPA of 2.500 is required in all chemistry, physics, and math courses taken. Acceptance into the major is based on students’ meeting the department’s criteria for admission and availability of space in the program.

Academic Progression Standards
Students who began as freshman chemistry majors must, after four semesters, have completed 64 semester hours and the following courses with grades of C or better:
CHEM 1217 General Chemistry 1 for Chemical Science Majors 4 SH
with CHEM 1218 Lab for CHEM 1217 2 SH
CHEM 1220 General Chemistry 2 for Chemical Science Majors 4 SH
with CHEM 1221 Lab for CHEM 1220 2 SH
CHEM 2315 Organic Chemistry 1 for Chemistry Majors 4 SH
with CHEM 2316 Lab for CHEM 2315 2 SH
CHEM 2317 Organic Chemistry 2 for Chemistry Majors 4 SH
with CHEM 2318 Lab for CHEM 2317 2 SH
CHEM 2331 Bioanalytical Chemistry 4 SH
with CHEM 2332 Lab for CHEM 2331 1 SH

Students who transferred into the major must, after two semesters in the major, have completed 64 semester hours and the following courses with grades of C or better:
CHEM 1211 General Chemistry 1 4 SH
with CHEM 1212 Lab for CHEM 1211 1 SH
CHEM 1214 General Chemistry 2 4 SH
with CHEM 1215 Lab for CHEM 1214 1 SH
or equivalent courses.

BS in Chemistry

See page 26 for requirement list.

CHEMISTRY MAJOR TECHNICAL REQUIREMENTS

Mathematics
Complete the following two courses:
MATH 1251 Calculus and Differential Equations for Biology 1 4 SH
or MATH 1341 Calculus 1 for Science and Engineering 4 SH
MATH 1252 Calculus and Differential Equations for Biology 2 4 SH
or MATH 1342 Calculus 2 for Science and Engineering 4 SH

Biochemistry
Complete the following course with corresponding lab:
CHEM 5621 Principles of Chemical Biology for Chemists 3 SH
with CHEM 5622 Lab for CHEM 5621 1 SH

Physics 1
Complete one of the following courses with corresponding lab:
PHYS 1145 Physics for Life Sciences 1 4 SH
with PHYS 1146 Lab for PHYS 1145 1 SH
PHYS 1161 Physics 1 4 SH
with PHYS 1162 Lab for PHYS 1161 1 SH

Physics 2
Complete one of the following courses with corresponding lab:
PHYS 1147 Physics for Life Sciences 2 4 SH
with PHYS 1148 Lab for PHYS 1147 1 SH
PHYS 1165 Physics 2 4 SH
with PHYS 1166 Lab for PHYS 1165 1 SH

CHEMISTRY MAJOR REQUIREMENTS

General Chemistry 1
Complete the following course with corresponding lab:
CHEM 1217 General Chemistry 1 for Chemical Science Majors 4 SH
with CHEM 1218 Lab for CHEM 1217 2 SH

General Chemistry 2
Complete the following course with corresponding lab:
CHEM 1220 General Chemistry 2 for Chemical Science Majors 4 SH
with CHEM 1221 Lab for CHEM 1220 2 SH

Intermediate-Level Chemistry—Organic Chemistry 1
Complete the following course with corresponding lab:
CHEM 2315 Organic Chemistry 1 for Chemistry Majors 4 SH
with CHEM 2316 Lab for CHEM 2315 2 SH

Intermediate-Level Chemistry—Organic Chemistry 2
Complete the following course with corresponding lab:
CHEM 2317 Organic Chemistry 2 for Chemistry Majors 4 SH
with CHEM 2318 Lab for CHEM 2317 2 SH

Intermediate-Level Chemistry
Complete one of the following courses with CHEM 3404 as corresponding lab:
CHEM 3401 Physical Chemistry 1 4 SH
with CHEM 3402 Lab for CHEM 3401 1 SH

Intermediate-Level Chemistry 2
Complete one of the following courses with CHEM 3404 as corresponding lab:
CHEM 3403 Physical Chemistry 2 4 SH
with CHEM 3404 Lab for CHEM 3403 1 SH

BIOANALYTICAL CHEMISTRY
CHEM 2331 Bioanalytical Chemistry 4 SH

Intermediate-Level Chemistry 2
Complete one of the following courses with CHEM 3404 as corresponding lab:
CHEM 3403 Physical Chemistry 2 4 SH
with CHEM 3404 Lab for CHEM 3403 1 SH
Advanced-Level Chemistry
Complete the following four courses with corresponding labs:
CHEM 3501 Inorganic Chemistry 4 SH
or CHEM 5696 Organometallic Chemistry 3 SH
CHEM 3521 Instrumental Methods of Analysis 1 SH
with CHEM 3522 Instrumental Methods of Analysis Lab 4 SH
CHEM 3531 Chemical Synthesis Characterization 1 SH
with CHEM 3532 Chemical Synthesis Characterization Lab 4 SH
CHEM 5628 Spectroscopy of Organic Compounds 3 SH
with CHEM 4629 Identification of Organic Compounds 2 SH

Senior Research/Capstone
Complete the following course:
CHEM 4750 Senior Research 4 SH

EXPERIENTIAL LEARNING
Complete one course in experiential education. Please see department for approved courses.

CHEMISTRY MAJOR CREDIT REQUIREMENT
Complete 85 semester hours in the major.

Senior Research/Capstone
Complete the following course:
CHEM 4750 Senior Research 4 SH

GRADUATE REQUIREMENTS

Graduate Seminars
Complete the following (repeatable) course two times:
CHEM 8504 Graduate Seminar 1 SH

Graduate Electives
Complete six graduate electives from the following range:
CHEM 5000 to CHEM 9999

Master’s Research and Thesis
Complete 10 semester hours of master’s thesis research:
CHEM 8984 Research 1 to 4 SH

EXPERIENTIAL LEARNING
Complete one course in experiential education. Please see department for approved courses.

CHEMISTRY BS/MS MAJOR CREDIT REQUIREMENT

Minor in Chemistry

REQUIRED COURSES
Complete the following six courses with corresponding labs. Engineering students may take CHEM 1151 in place of CHEM 1211 and two other chemistry courses in place of CHEM 1214 and CHEM 3401:

General Chemistry 1
CHEM 1211 General Chemistry 1 4 SH
with CHEM 1212 Lab for CHEM 1211 1 SH

General Chemistry 2
CHEM 1214 General Chemistry 2 4 SH
with CHEM 1215 Lab for CHEM 1214 1 SH

Organic Chemistry 1
CHEM 2311 Organic Chemistry 1 4 SH
with CHEM 2312 Lab for CHEM 2311 1 SH

Organic Chemistry 2
CHEM 2313 Organic Chemistry 2 4 SH
with CHEM 2314 Lab for CHEM 2313 1 SH

Physical Chemistry 1
CHEM 3401 Physical Chemistry 1 4 SH
with CHEM 3402 Lab for CHEM 3401 1 SH

Physical Chemistry 2
Note: CHEM 3404 should be taken as corresponding lab with CHEM 3403, CHEM 3421, or CHEM 5637.
CHEM 3403 Physical Chemistry 2 4 SH
or CHEM 3421 Biophysical Chemistry 4 SH
or CHEM 5637 Foundations of Spectroscopy 3 SH
with CHEM 3404 Lab for CHEM 3403 1 SH

CINEMA STUDIES

INEZ HEDGES, PHD
Professor of French, German, and Cinema Studies
and Director of the Cinema Studies Program

Office: 225 Holmes Hall

The cinema studies curriculum is formulated upon a systematic historical, critical, and practice-oriented approach to the study of cinema. Students in the dual major are exposed to film and video as art, and become aware of the elements that comprise narrative film, such as editing, mise en scène, sound, and cinematography; explore different modes of cinematic narrative, in particular, the differences between Hollywood and art cinema; broaden their
understanding of international cinema and become conscious of the characteristics of distinctive national cinemas, with an in-depth study of at least three different cinemas; and examine the productive interchange between film and the literary text. In many of the cinema studies offerings, students are encouraged to reflect upon the crucial role of film in the art movements of the twentieth century and to make connections between the classroom and practical experience in small-group discussions. A number of screenwriting and production courses offer students the opportunity to make practical applications of their analytical skills.

Students may enroll in the dual major in cinema studies in combination with the following other dual majors: communication studies; English; journalism; languages, literatures, and cultures; philosophy; and theatre.

Cooperative education placements (arranged through the student’s other dual-major program) and internships demonstrate to students how the fundamental aspects of the cinema studies dual major—visual literacy, effective communication, collaborative teamwork, critical thinking, and analytical skills—are valuable in a variety of work settings. The cooperative education and/or internship experience assists cinema studies dual majors in assessing their short- and long-term goals in terms of undergraduate educational focus, graduate school preparation, and career aspirations. It challenges students to understand their own values, ethics, and ideas in the context of the professions that they experience while on co-op/internship. Students’ placements also serve to expose them to a variety of professional people who may serve as mentors in the present and future. The following types of organizations typically provide cinema studies dual majors with the best opportunities to develop research, writing, and visual communication skills, as well as analytical and critical skills relevant to their major(s): Web site development companies, documentary production companies, advertising agencies, Boston-based film units of commercial film productions, independent feature productions, WGBH, cable companies, film distributors, art houses, the Museum of Fine Arts film program, and area film festivals.

Students who choose the cinema studies minor are exposed to a range of aesthetic, historical, international, and sociological perspectives from which to approach the film and video medium. They may also learn to integrate these analytical approaches with practical experience in videography and the study of broadcast technology. The diverse course offerings and carefully structured program have enabled our graduates to do well in the ever-expanding world of video production, distribution, and marketing, as well as to pursue careers as film scholars and teachers.

Transferring to the Major

Students apply in the spring of their freshman year by making an appointment with the director of cinema studies.

The Department of Communication Studies is dedicated to providing a liberal arts education where critical skills, concepts, and thinking are developed in conjunction with practice and application. Through a study of processes, patterns, and media of communication, the major in communication studies from Northeastern University aims to provide an enriching background for our students, providing them with an opportunity to contribute significantly to the communication sector, whether that contribution is within organizations or in the media industries themselves. Through its students and faculty, communication studies at Northeastern is a program dedicated to critical
innovation. It strives to integrate new research into teaching and pedagogy to ensure students are connected to new developments in the field of communication.

**Transferring to the Major**

Students wishing to transfer to the major must have a cumulative GPA of 3.000 overall and must have completed:

- COMM 1101 Introduction to Communication Studies 4 SH
- and one of the following courses:
  - COMM 1112 Public Speaking (no prerequisite) 4 SH
  - COMM 1220 Media, Culture, and Society (prerequisite COMM 1101) 4 SH
  - COMM 1231 Principles of Organizational Communication (prerequisite COMM 1101) 4 SH

with grades of B or higher. Acceptance into the major is based on students’ meeting the department’s criteria for admission and availability of space in the programs. Requests to transfer into the major should be submitted to the communication studies department office by October 1, February 1, or July 1.

**Academic Progression Standards**

Departmental probation will result from a cumulative GPA below 2.750 in communication courses. No more than two grades below a C in communication studies courses can be used to fulfill degree requirements. Dismissal from the major may occur as a result of two consecutive semesters on departmental probation.

GPA REQUIREMENT
2.000 GPA required in the minor
Creative industries (CI) is a potent mix of computer programming, art, animation, storytelling, information architecture, and logic. Our dual majors in interactive media or game design provide the breadth and resources to offer all aspects of this deeply collaborative field. CI affords artists, composers, and designers new opportunities to experiment and collaborate with a wide variety of partners, such as medical researchers, mathematicians, and historians. Our modern creative economy has made specialized artistic and technical literacy necessary for the modern professional across a wide variety of professions.

The creative industries dual majors offer students in the areas of Art + Design, music, and computer science an opportunity to understand and experience the disparate disciplines that contribute to content creation. These dual majors expose students to the historical significance of changing technology and media, while encouraging students to integrate their creative work with the skills they need in the rapidly growing field of creative and technical production.

Interactive media and game design require intensive team interaction and a broad knowledge base. Our collaborative approach best allows all team members to understand the context in which their contributions are used. Creative industries students have many opportunities to collaborate with their peers and work with students in all interactive media and game design dual majors.

Transferring to the Dual Majors
Interactive media and game design dual majors require a serious dedication concentrating in one of seven separate programs of study. To be eligible to apply to the creative industries program, students must:

1. Be majors in good standing in one of the home disciplines.
2. Complete at least one semester of course work in the Department of Art + Design, Department of Music, or College of Computer Science with an overall GPA of 3.000 (or permission of the Creative Industries Committee).

Students in the program begin their work in their home department or college and then continue to develop their core discipline while exploring their interdisciplinary course work.

The curriculum comprises three components:

- Basic principles of art and design, music technology, and computer programming
- Extradisciplinary courses to provide a historical, societal, and cultural framework
- Cross-disciplinary courses specific to the program, such as the following:

<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>GAME 1110</td>
<td>Games and Society</td>
<td>4 SH</td>
</tr>
</tbody>
</table>

The student’s senior year in the program is devoted to integrating these components in a capstone project. Students work as interdisciplinary teams, drawing on their accumulated knowledge to develop and deliver a single original project.

Academic Progression Standards
Art + Design and music technology students are required to maintain a 3.000 GPA in their home department and creative industries courses. Computer science students must maintain a minimum 2.670 GPA in all CS courses.

GPA REQUIREMENT
2.000 GPA required in the minor
The Department of Earth and Environmental Sciences’ programs are designed to help students develop an in-depth understanding of the processes that affect the earth’s surface and that have the greatest impacts on society. Graduates of such programs contribute to the solution of environmental problems such as soil or groundwater contamination, flooding, slope stability, shore erosion related to changing land use, or coping with the impact of sea-level rise or changing weather patterns related to global warming. Commonly, environmental professionals are expected to work effectively as part of a multidisciplinary team containing scientists, engineers, and professionals who can evaluate the legal, economic, political, and social ramifications of complex environmental problems. Northeastern’s emphasis on experiential, off-campus learning in addition to classroom learning is designed to help our students to become well grounded in their field of study and to work effectively with others to study and address real problems, as part of their undergraduate program.

Our Bachelor of Science in Environmental Science degree is organized for students who seek a comprehensive understanding of the scientific implications of environmental issues and the ways that environmental scientists from a range of disciplines can approach their solution. Every student has an opportunity to develop core knowledge in geology, biology, chemistry, and mathematics early in the program. Students then select one of four concentrations—surficial processes; marine science; wildlife studies; or environmental geology—as a program focus for their upper-level coursework. We also provide an Open Option for students whose interests do not fall into one of these four areas. Students who elect this option work with a faculty advisor to identify a group of five mid- to upper-level science courses that are aligned with the student’s career interests. (Students who are interested in studying environmental issues from a policy-based perspective should read the description of the environmental studies major on page 118.)

A number of dual-major programs are offered; these can help focus a student’s course choices along avenues that faculty feel are particularly appropriate.

Fieldwork is a valued component of training in our programs, and many of our courses use field sites throughout New England to demonstrate environmental processes or problems in their full complexity. In addition to sponsoring local trips, we have taken students on one longer field excursion each year to Iceland, the Cascade Mountains of Washington, the island of San Salvador in the Bahamas, or the Grand Canyon. Students also have the option to complete undergraduate research experiences with a faculty member. Undergraduate research projects can involve fieldwork and/or lab work completed under the guidance of faculty.

Many of our recent graduates work for environmental or geotechnical firms or continue their studies in graduate school. Students who participate in the co-op program typically work with local engineering or environmental consulting companies or with government agencies. These jobs often involve assessing building sites, evaluating land use, and studying problems concerned with groundwater contamination and remediation.

Transferring to the Major
Same as college standards. Acceptance into the major is based on students’ meeting the department’s criteria for admission and availability of space in the programs.

Academic Progression Standards

Economics is the study of how societies produce and exchange goods and services to satisfy material needs. Undergraduates may study economics as part of a broad interest in the social sciences to develop specialized skills useful in today’s complex labor market. The major in economics is also a good foundation for graduate studies in advanced economics, public policy, law, or business.

Macroeconomics, which focuses on the overall economy, deals with such problems as inflation, unemployment, growth and instability, economic development, and governmental monetary and fiscal policies.

Microeconomics examines the economic behavior of individuals, households, firms, industries, and trade among countries. It seeks to assess the economic effects of market power and environmental damage and analyzes the economic aspects of natural resources, poverty, health, income distribution, trade unions, crime, and government regulation.

Courses in economics cover international trade; the behavior of families, firms, and industries in the market economy; the environmental costs of growth; and the economic aspects of natural resources, poverty, health, labor market discrimination, trade unions, crime, and governmental oversight. International and comparative perspectives are emphasized, most directly in courses in the economic development of the developing world and economic history.

Students may pursue a BA, a BS, or a minor in economics. Additionally, economics majors in their junior year may qualify for admission to a program that combines the BA or BS with a master’s degree in economics (requires an additional 16 semester hours of course work). The department also offers dual majors with international affairs, mathematics, and political science.

Graduates may find jobs in major corporations, financial institutions, or federal, state, and local governments. Their work may involve planning and forecasting, assessing labor needs, and undertaking financial studies. They may estimate consumer demand for new products, conduct research, teach, or provide specialized consulting services.

Transferring to the Major
Same as college standards. Acceptance into the major is based on students’ meeting the department’s criteria for admission and availability of space in the programs.
Academic Programs and Curriculum Guide

NORTHEASTERN UNIVERSITY

Academic Progression Standards
For students wishing to major in economics, the following three core courses:

- **ECON 2315** Macroeconomic Theory 4 SH
- **ECON 2316** Microeconomic Theory 4 SH
- **ECON 2350** Statistics 4 SH

should be completed within two semesters of qualifying to take them, i.e., within two semesters of completing the following courses:

- **ECON 1115** Principles of Macroeconomics 4 SH
- **ECON 1116** Principles of Microeconomics 4 SH
- **MATH 1231** Calculus for Business and Economics 4 SH

In addition, one of the following courses:

- **ECON 3520** History of Economic Thought 4 SH (for BA students)
- **ECON 3560** Applied Econometrics 4 SH (for BS students)

should be completed within two semesters of completing **ECON 2315**, **ECON 2316**, and **ECON 2350**.

For BS majors, grades earned in the six core courses (**ECON 1115**, **ECON 1116**, **ECON 2315**, **ECON 2316**, **ECON 2350**, and **ECON 3560**) must average to a 2.000 GPA or better.

For BA majors, grades earned in the six core courses (**ECON 1115**, **ECON 1116**, **ECON 2315**, **ECON 2316**, **ECON 2350**, and **ECON 3520**) must average to a 2.000 GPA or better.

After admission to the major, all required economics courses must be taken in the day college.

The mission of the education program is to prepare community-dedicated educators who foster the academic achievement and personal success of children and youth in diverse urban settings. To carry out this mission, the education program provides programs of study in which classroom course work is integrated with field experiences and in which candidates demonstrate their understanding of course content through instructional performance. Field placements provide candidates the opportunity to work with Boston Public School (BPS) students, teachers, and parents in a variety of school and community settings and to link education theory with classroom experience.

Students in the education program may select from several program options. They may pursue a minor in elementary or secondary education or a minor plus Massachusetts Department of Education endorsement for licensure (minor plus student teaching). Students who pursue an education minor with elementary licensure must also meet the Massachusetts Department of Education content requirements, which may be completed through their major and the NU Core requirements.

Undergraduate students interested in teaching careers should contact the education program in 26 Nightingale for information on how to apply. To qualify for admission students must:
• Successfully complete EDUC 1111, “Education in the Community,” including the 30-hour community field placement in one of our community partner agencies.
• Be enrolled in an appropriate major in the College of Arts and Sciences. For a minor in elementary education, all arts and sciences majors are acceptable except human services and American Sign Language. (These majors do not match the Department of Education requirements.) For students seeking careers as high school teachers, the minor in secondary education offers preparation to teach biology, chemistry, English, history, mathematics, physics, political science, and Spanish.
• Have a GPA of 2.750 or higher.

To be eligible for student teaching (a licensure requirement), a student must:
• Pass all required Massachusetts Tests for Educators Licensure.
• Maintain a 2.750 GPA and earn a C or better in all education courses.
• Earn satisfactory evaluations from three previous field experiences.
• Complete all education courses required for licensure.
• Apply for student teaching at least one semester in advance.

English studies at Northeastern comprise a range of fields: literary studies, rhetoric and composition, linguistics, film, and creative writing. The Department of English offers a major and four minors, as well as dual majors with cinema studies and linguistics.

The major in English surveys the historical and cultural contexts and contributions of English, American, and other Anglophone literatures from the Middle Ages through the present, providing exposure to a variety of theoretical and methodological approaches to the study of language, rhetoric, and literature.

The minor in literature provides students with a short but coherent overview of several areas of English studies. The minor in writing allows students to select freely from a range of offerings in creative, technical, and expository writing as well as rhetoric. The interdisciplinary minor in rhetoric draws on courses in communication studies as well as English, while the interdisciplinary minor in technical communication includes courses in rhetoric and technical communication as well as courses from other departments, such as psychology and philosophy.

Course work in English offers students the opportunity to develop skills of reading, analysis, and expression in great demand in the workplace and in graduate and professional programs: the ability to interpret and evaluate a variety of texts, to evaluate and produce arguments, and to write appropriately for an audience. The major and minors are particularly suitable for students preparing for careers or graduate school in teaching and research, writing and publishing, media and communications, and any field that demands analytical ability and well-honed writing skills, such as law or business.

Transferring to the Major
Students are required to have a 2.000 GPA to transfer to the major after the freshman year. Transfer students must have at least a 2.500 GPA in their English courses within one semester of declaring the major. Acceptance into the major is based on students’ meeting the department’s criteria for admission and availability of space in the program.

Academic Progression Standards
All majors must have at least a 2.500 GPA in their English courses by the end of their sophomore year.

The Bachelor of Arts in Environmental Studies degree is designed to provide a flexible platform for students whose primary interest is in the area of environmental policy. In their first two years, all environmental studies majors complete introductory courses in the sciences (biology, chemistry, geology), as well as introductory- to intermediate-level course work in economics, political science, philosophy, and sociology. Students then work with a faculty advisor to select a cluster composed of intermediate- to upper-level courses in an area appropriate to the student’s career objectives. These cluster areas include sustainability, urban environmental issues, water issues, international affairs, public policy, and marine studies. A senior thesis is required in the environmental studies major. (Students who are interested in studying environmental issues from a science-based perspective should read the description of the environmental science major beginning on page 105.)

A number of dual-major programs are offered; these can help focus a student’s course choices along avenues that faculty feel are particularly appropriate.

Students in the environmental studies program are prepared to work in environmental planning, regulation, policy, or compliance. These broad-based programs also aim to prepare students to go into environmental education or law. Co-op experiences in environmental planning may include government internships or work in environmental compliance offices.

Transferring to the Major

GPA REQUIREMENT
2.000 GPA required in the minor

The General Studies Program (GSP) is a full-year program for entering freshmen, offering a unique learning environment where faculty, staff, and peer leaders provide guidance and support to ensure the students’ academic success. The GSP satisfies first-year academic requirements and is geared to students’ academic and career goals. Program benefits include a low student-advisor ratio, a two-semester critical-thinking seminar taught by GSP advisors, learning communities, a prescribed curriculum, small classes in specified courses, and a nationally certified peer tutoring program. Following the successful completion of the general studies year, students enter one of the University’s six undergraduate colleges with sophomore status in a specified major. All majors have defined entrance requirements; therefore, beginning in September, GSP advisors work closely with students to guide them and keep them aware of their intended majors’ entrance requirements. GSP students should note that sophomore entrance into majors in the Bouvé College of Health Sciences, the School of Architecture, and the College of Engineering may require an additional semester to complete required freshman-level course work. In the case of the Bouvé College of Health Sciences, entrance is extremely competitive because of space limitations. There are also restrictions on specific majors. If the student’s ultimate goal is to major in one of these areas, we strongly encourage the student to consider all enrollment options before deciding on the General Studies Program.

Academic Progression Standards
GSP students must meet the following criteria to successfully transition to sophomore standing:
1. 2.000 GPA (entrance requirements to individual programs vary)
2. 28 semester hours of credit (32 recommended)
3. Successful completion of college/major transition requirements listed below.

College of Arts and Sciences
- Requirements are major-specific. Students will be advised individually.

College of Business Administration
- Cumulative GPA of 2.800 or higher.
- Successful completion of the following core courses with a cumulative GPA of 2.800 or higher:
  - BUSN 1101 Introduction to Business 4 SH
  - ECON 1115 Principles of Macroeconomics 4 SH
  - ENGL 1111 College Writing 4 SH
- MATH 1130 or higher with grade of B or higher (a grade of C or higher is required in MATH 1231). Students applying to the Bachelor of Science in International Business (BSIB) program will be advised individually.

College of Computer and Information Science
- Requirements are major-specific. Students will be advised individually.

College of Criminal Justice
- Cumulative GPA of 2.000 or higher.
- Minimum of one criminal justice course.

Bouvé College of Health Sciences
- Requirements are major-specific. Entrance to some majors is extraordinarily competitive, and admission from GSP is rare. Students will be advised individually about requirements and space availability.
College of Arts and Sciences

• Requirements are major-specific. Students will be advised individually.

Note: Major/college requirements are subject to change. GSP students work with the GSP advisors to receive the most up-to-date and accurate information.

Academic Probation
At the close of the first semester, GSP students with a cumulative GPA below 1.800 and/or semester hours below 12 are placed on academic probation.

University Withdrawal, Low Scholastic Performance
At the close of a third academic semester, GSP students with a cumulative GPA below 2.000 and/or who have earned fewer than 12 semester hours for that term are withdrawn from the University for low scholastic performance.

General Studies Program

ARTS AND SCIENCES/UNDECLARED TRACK
A cumulative GPA of 2.000 or higher with a minimum of 28 semester hours of earned credit is required (32 semester hours of earned credit is recommended). Specific program requirements vary. Consult your advisor for more information.

English Requirement
Complete the following two courses:
ENGL 1110 Introductory Writing 4 SH
ENGL 1111 College Writing 4 SH

Mathematics Requirement
Select math course(s) applicable to your major program of study. Calculus is required for most science programs; algebra may be sufficient for nonscience programs. Consult your advisor for more information.

ALGEBRA
MATH 1215 Mathematical Thinking 4 SH

CALCULUS
MATH 1120 Precalculus 4 SH
MATH 1231 Calculus for Business and Economics 4 SH
MATH 1241 Calculus 1 4 SH
MATH 1242 Calculus 2 4 SH
MATH 1251 Calculus and Differential Equations for Biology 1 4 SH
MATH 1252 Calculus and Differential Equations for Biology 2 4 SH

Strategic Thinking and Learning
Complete the following two courses:
GENS 1101 Strategic Thinking and Learning Seminar 1 1 SH
GENS 1102 Strategic Thinking and Learning Seminar 2 1 SH

NU Core Courses
Complete four major-appropriate NU Core courses. Consult your advisor for a list of approved courses.

CRIMINAL JUSTICE TRACK
A cumulative GPA of 2.000 or higher with a minimum of 28 semester hours of earned credit is required (32 semester hours of earned credit is recommended). Consult your advisor for more information.

English Requirement
Complete the following two courses:
ENGL 1110 Introductory Writing 4 SH
with ENGL 1111 College Writing 4 SH

Mathematics Requirement
A minimum of MATH 1215 is required. Students placed into MATH 1110 must complete both MATH 1110 and MATH 1215.
MATH 1215 Mathematical Thinking 4 SH
or MATH 1110 College Algebra 4 SH
and MATH 1215 Mathematical Thinking 4 SH

Strategic Thinking and Learning
Complete the following two courses:
GENS 1101 Strategic Thinking and Learning Seminar 1 1 SH
GENS 1102 Strategic Thinking and Learning Seminar 2 1 SH

Criminal Justice
Complete the following two courses:
CRIM 1100 Introduction to Criminal Justice 4 SH
CRIM 1200 Ethics, Values, and Diversity 4 SH

NU Core Courses or Arts and Sciences Courses Approved for Criminal Justice
Complete two courses from the following list or from the NU Core arts/humanities level 1 domain, as described on page 26.
CS 1100 Computer Science and Its Applications 4 SH
PSYC 1101 Foundations of Psychology 4 SH
SOCL 1101 Introduction to Sociology 4 SH

BUSINESS TRACK
A cumulative GPA of 2.800 or higher with a minimum of 28 semester hours of earned credit is required (32 semester hours of earned credit is recommended). Students applying to the Bachelor of Science in International Business (BSIB) program will be advised individually. For all business programs, specified courses and GPA are required. Consult your advisor for more information.
A cumulative GPA of 2.800 or higher is required in BUSN 1101, ECON 1115, and ENGL 1111.

English Requirement
Complete the following two courses:
ENGL 1110 Introductory Writing 4 SH
with ENGL 1111 College Writing 4 SH
Mathematics Requirement
Complete one of the following courses. Students taking
MATH 1130 must earn a grade of B or better; students taking
MATH 1231 must earn a grade of C or better:
MATH 1130 College Math for Business and 4 SH
Economics
MATH 1231 Calculus for Business and Economics 4 SH

Economics Course
Complete the following course:
ECON 1115 Principles of Macroeconomics 4 SH

Strategic Thinking and Learning
Complete the following two courses:
GENS 1101 Strategic Thinking and Learning 1 SH
Seminar 1
GENS 1102 Strategic Thinking and Learning 1 SH
Seminar 2

Management Course
Complete the following course:
BUSN 1101 Introduction to Business 4 SH

NU Core Courses
ARTS/HUMANITIES LEVEL 1
Complete one course from the NU Core arts/humanities level 1 domain, as described on page 26.

SCIENCE/TECHNOLOGY LEVEL 1
Complete one course from the NU Core science/technology level 1 domain, as described on page 26.

HEALTH SCIENCES/TECHNOLOGY TRACK
A minimum of 28 semester hours of earned credit is required
(32 semester hours of earned credit is recommended). Specific
program requirements vary or are restricted. Consult your advisor
for more information.

English Requirement
Complete the following two courses:

History is the study of the causes and consequences of changes in human events across time. Like other liberal arts disciplines, historical study trains students to think critically by reading, writing about, and discussing the human experience. History stimulates a deeper understanding of today’s cultures by considering them in a global context. The goal of the study of history is to help students develop powers of judgment and expression that will propel them to future leadership positions in education, the professions, government and public service, international organizations, communications, and business.

The Department of History offers a broad-based Bachelor of Arts major and two Bachelor of Science options. One BS option emphasizes training in the social sciences and includes requirements in research methods as well as a minor in fields such as English, economics, political science, sociology, cinema studies, East Asian studies, or women’s studies. The other BS option seeks to prepare students for public history fields such as museum administration, archival management, or historic preservation. The Department of History participates in numerous interdisciplinary programs, including East Asian studies; cinema studies; environmental studies; international affairs; Jewish studies; Latino/a, Latin American, and Caribbean studies; and women’s studies.

All history majors take introductory courses in European, world, American, Middle Eastern, or East Asian history; an introductory course in historical methods; as well as advanced courses in a range of historical themes, periods, and regions. Students focus their studies by choosing a cluster of four courses in a particular geographical area, time period, or theme. The program emphasizes undergraduate research in the major and trains students to conduct research in archives and primary sources and to write research papers. Honors study is strongly encouraged for eligible students, as is study abroad. Advanced undergraduates have the opportunity to participate in individual directed study with members of the faculty on topics of mutual interest.

Cooperative education placements, fieldwork, internships, and other experiential learning activities are also available. Undergraduates who plan to teach in public schools may combine history with education courses that can lead to state certification in Massachusetts.

The Department of History offers qualified undergraduates the opportunity to pursue a combined BA/MA or BS/MA degree in five years, upon the approval of the department. Students with a minimum 3.330 cumulative GPA and minimum 3.500 GPA in required history courses may apply for admission to the five-year MA program in history.

Transferring to the Major
Same as college standards. Acceptance into the major is based on students’ ability to meet the department’s criteria for admission and the availability of space in the program.

Academic Progression Standards
Same as college standards.

- HIST 2330 Colonial and Revolutionary America 4 SH
- HIST 2370 Renaissance to Enlightenment 4 SH
- HIST 2375 Culture and Identity in Early Modern England 4 SH
- HIST 2393 Islam and Empires 4 SH
- HIST 3411 Environment in the Age of Discovery 4 SH
- HIST 3475 The Culture of Europe 4 SH

Capstone or Project
Complete one of the following courses:
- HIST 4701 Capstone Seminar 4 SH
- HIST 4911 Senior Project 1 4 SH
- HIST 4912 Senior Project 2 4 SH

INTERMEDIATE/ADVANCED HISTORY COURSE REQUIREMENT
A minimum of three courses from the above requirements must be at a course level of HIST 2303 or higher. These courses may count toward the history cluster.

EXPERIENTIAL EDUCATION REQUIREMENT
The following course:
- HIST 2301 The History Seminar 4 SH
fulfills the University’s experiential education requirement.

HISTORY MAJOR CREDIT REQUIREMENT
Complete 41 semester hours in the major.

GENERAL ELECTIVES
Additional courses taken beyond college and major course requirements to satisfy graduation credit requirements.

COOPERATIVE EDUCATION
If elected

UNIVERSITY-WIDE REQUIREMENTS

The human services program is an interdisciplinary major within the College of Arts and Sciences that includes courses in human services, psychology, sociology, political science, and other related fields. The mission of the human services program is to provide students with the theoretical and skill-based background necessary to practice in macro-, mezzo-, and microarenas such as political advocacy, community development, and direct service. Students take basic foundation and skills courses and complete an intensive fieldwork internship in community agencies and/or government organizations. The major may lead to careers in many diverse areas of the helping professions or to graduate education.

Students who major in human services select specializations in areas that they wish to pursue further. Students can pursue positions in both public and private agencies, including social service and welfare agencies, mental health settings, programs for youth, halfway houses, rape crisis and domestic violence centers, drug treatment institutions, and criminal justice settings. Students can work in a number of capacities as counselors, community organizers, administrators in human services agencies, and as fund-raisers for social programs. Students in the major have special opportunities to participate in the Human Services Organization, the student-led club.

**Prepared Specializations**
- Administration and Policy; Applied Behavior Analysis;
- Counseling Psychology; Deaf Studies; Family and Children Services; and Social Justice, Identity, and Religion.

**Transferring to the Major**
Acceptance into the major is based on completion of the internal transfer application, the program’s criteria for admission including the minimum GPA requirement, and a meeting with an advisor.

**Academic Progression Standards**
After four semesters, students must meet the minimum GPA, have earned at least 64 semester hours, and should have completed the following courses:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>SH</th>
</tr>
</thead>
<tbody>

International affairs is an interdisciplinary major in the College of Arts and Sciences. The international affairs program is designed (a) to prepare today’s students with the knowledge and skills needed to survive and to lead in this global marketplace—a marketplace not simply of products and services but also of ideas, identities, and values—and (b) to promote “global citizenship” and social responsibility among all members of the international community.

Transferring to the Major
Current Northeastern students wishing to declare international affairs as a major must have a minimum 3.000 GPA.

Academic Progression Standards
It is recommended that students majoring in international affairs maintain a minimum 3.000 GPA until the beginning of their international experience in order to be eligible for the majority of the study-abroad options.

BA in International Affairs

Note: Students double majoring in international affairs and political science may count only two political science courses toward the international affairs major.

NU CORE REQUIREMENTS
See page 26 for requirement list.

COLLEGE REQUIREMENTS FOR BA

The Jewish studies program offers students an opportunity to explore the history, culture, and religion of the Jewish people. An interdisciplinary program, it offers courses in a wide variety of areas, including Hebrew language, religion, philosophy, history, music, political science, and sociology.

The key elements shaping the Jewish studies experience—religion, ethnicity, history, nationality—are also essential to understanding our increasingly complex and diverse society. Jewish studies is an ideal vantage point from which to learn about these phenomena. The program introduces students not only to the theory behind these concepts but also to how they work in practice. Contrary to popular assumption, non-Jewish students make up the majority of Jewish studies classes. Regardless of their background, all students learn quickly that the field provides them with tools and knowledge for a more critical and analytical understanding of the world around them.

The Jewish studies program offers students a dual major in Jewish studies and religion as well as a Jewish studies minor. The dual major is designed for students looking for in-depth knowledge of Jewish studies and interested in comparative religion. It is ideal for students interested in graduate work in Jewish studies or religious studies or in careers as rabbis, cantors, or Jewish educators. The minor is available for students who wish to combine their interest in Jewish studies with a major in another area, such as business or engineering. A unique academic feature of this track is the Jewish studies module in which students integrate their work in Jewish studies into their major field. In addition, students who are interested in the field of human services can pursue the specialization in social justice, identity, and religion within the human services major. This option is well suited for those interested in careers in Jewish communal services.

A special feature of the Jewish studies program is the long-standing cooperative relationship between Northeastern University and Hebrew College. In one of the most expansive partnerships between a private university and a Jewish college, the two institutions share resources and expertise; create joint faculty appointments; allow for tuition-free cross-registration and concurrent library privileges at both institutions; and, most recently, have established a new bachelor’s-master’s degree program that allows students to earn two degrees concurrently: a BA from Northeastern University and either a Master of Arts in Jewish Studies (MAJS) or a Master of Jewish Education (MJEd) from Hebrew College.

Experiential education in the Jewish studies program includes study abroad and internships at organizations such as the Jewish Community Relations Council, Facing History and Ourselves, the Jewish Women’s Archives, and the Israeli Consulate. Scholarships are also available to support Jewish studies students interested in the study of the Holocaust.

The School of Journalism seeks to prepare students for careers in news media and related fields. The skills it emphasizes—writing, editing, video and audio production, design and graphics, and online reporting—also have broad applications in numerous other disciplines.

Students may enroll in either a five-year cooperative education program or a four-year program without co-op. The school strongly advises students to obtain cooperative education experience.

Graduates work for some of the world’s best newspapers and magazines, radio and television stations, online publications, wire services, public relations departments, and advertising agencies.

Transferring to the Major
Any student transferring to the School of Journalism must have at least a 3.000 cumulative GPA. Acceptance into the major is based on students’ meeting the department’s criteria for admission and availability of space in the programs.

Academic Progression Standards
Journalism majors must maintain a minimum GPA of 2.250. Students who remain below 2.250 for two consecutive semesters may be dropped from the major.

GPA REQUIREMENT
2.000 GPA required in the minor
The study of languages can benefit all students, regardless of their majors. The multicultural world in which we live requires increased communication among varied and often divergent cultures. Learning a new language and its culture enables students to cross cultural barriers and to achieve a more cosmopolitan, open-minded, and sensitive view of the world.

The major seeks to ensure that students become as fluent as possible in a given language and introduces them to the relevant culture of that language. For this reason, the students take a number of language classes as well as literature, cinema, and general civilization courses. In addition, students are required to participate in study abroad and are urged to consider participating in international co-op, which prepares students to function on an everyday level in a foreign country.

The major is currently available in Spanish. It is possible to minor in French or Spanish.

A major in a language can form the basis for careers in teaching at the elementary, secondary, or college level; international business relations; high-tech fields; government service; journalism; library science; world affairs; travel; and community service, especially in Spanish-speaking areas.

Linguistics is the scientific study of human language. A growing and exciting field, it has links to diverse fields including cognitive psychology, philosophy, neuroscience, computer science, artificial intelligence, sociology, language teaching, anthropology, and education. Linguistics is a key component of the emerging field of cognitive science, the study of the structure and functioning of human cognitive processes.

How do children learn to speak? How is language represented in the mind? What do all languages, including sign languages, have in common? How is language different from the communication systems used by whales, bees, and chimpanzees? What do we need to program into a computer in order to converse with it? How might we think about linguistic controversies, including debates about official languages, Ebonics, gender bias, and bilingualism in education? Linguistics attempts to answer each of these questions and covers a surprisingly broad range of topics related to language and communication. Cutting-edge work in cognitive science investigates how natural languages are learned and processed. Grammar checkers and translation programs use language parsers; search engines, browsers, and editors use results from computational linguistics. Linguistics is behind every application that recognizes or synthesizes speech. To work in a field that involves language in any way, you’ll need to know how language works, the stuff of linguistics.

Linguistics is an interdisciplinary program at Northeastern. Seven departments (African-American Studies; American Sign Language; English; Languages, Literatures, and Cultures; Philosophy; Psychology; and Sociology/Anthropology) collaborate to offer a comprehensive program with courses in core areas (syntax, phonology, semantics); in psycholinguistics; in...
sociolinguistics; and in the structure of French, Spanish, African languages, Romance languages, American Sign Language, and African-American English, among others. The major reflects the current research of our faculty: linguists, sociologists, psychologists, language educators, and teachers of second languages.

Students can pursue a major in linguistics. A linguistics minor is also available, as are two dual majors, one in linguistics and psychology, the other in linguistics and English.

Linguistics offers a variety of co-ops, including positions at local companies involved in speech recognition and production, as well as at Northeastern’s own speech perception and language processing labs. Linguistics majors can also participate in a special foreign internship opportunity, doing research at the Max Planck Institute for Psycholinguistics in the Netherlands.

Students with backgrounds in linguistics have pursued advanced degrees in fields including law, cognitive science, education, English, interpreting, business, speech pathology, computer science, developmental psychology, and linguistics itself. Other graduates have gone on to work in research, translation, special education, dictionary publishing, and robotics.

Transferring to the Major

Same as college standards. Acceptance into the major is based on students’ meeting the linguistic program’s criteria for admission and availability of space in the program.

Mathematics is of ever-increasing importance to our society and everyday life. It has long been the language of science and technology, and provides a rich source of methods for analyzing and solving problems encountered in the physical world. Today, mathematics is essential in virtually all fields of human endeavor, including business, the arts, and the social sciences.

The Bachelor of Arts degree requires at least eleven mathematics courses and two physics courses, in addition to the study of a foreign language; this program is appropriate for students who wish a broader liberal arts education. The Bachelor of Science degree requires at least fourteen mathematics courses and two physics courses but no foreign language study; it is more specialized, and it is recommended for those strongly interested in mathematics and science. The department also offers a minor degree in mathematics.

The major programs provide flexibility with elective courses. Students may take advantage of a range of interdisciplinary programs and may join a major in mathematics with one in such fields as computer science, physics, and biology.

Exceptional students are accepted into the Honors Program, and have the option to enroll in honors sections of several of their mathematics courses. All math majors may benefit from co-op opportunities in the scientific and business communities in Boston and elsewhere.

Many of the mathematics courses that we offer use computers for visualization, modeling, and numerical approximation. The math computer lab features twenty-two personal computers supported by student mentors in a pleasant physical environment.

Students planning to teach secondary-school mathematics must major in mathematics and take a specific minor in education, which includes course work and student teaching.

Mathematical training may lead to opportunities in applied research (natural sciences, engineering, economics, management, computer science) as well as in mathematical research, teaching, or industry.

Transferring to the Major
Upperclass students transferring to mathematics must have a cumulative GPA of at least 2.000. They must also have at least a 2.000 GPA in all mathematics courses and a minimum grade of C in the following courses (if already taken):
BA in Mathematics

The Department of Music approaches the study of music from a global, multicultural, and multifaceted perspective. The department offers three concentrations in the context of a broad liberal arts program.

The music industry concentration is the first such undergraduate program in Boston. It is designed for students with an interest in fields such as artist management, the music products industry, the record industry, arts administration, contracting and legal issues, the recording process, and studio techniques. Developed in collaboration with Northeastern’s College of Business Administration, the music industry concentration leads to a Bachelor of Science degree.

The music history and analysis concentration includes courses in Western classical music, American music, world music, music theory, and ear training. Students may combine this concentration with the minor in music performance, which entails an audition, private lessons, ensemble performance, and two recitals. They may also combine this concentration with a minor in music industry, ethnomusicology, or music theatre. The music history and analysis concentration leads to a Bachelor of Arts degree.

The music technology concentration teaches students to compose music using the newest electronic music technology, both hardware and software. Students are exposed to techniques such as MIDI sequencing, digital and analog recording, sound design, audio for video, and the latest methods for delivering music over the Internet. Students also study composition for both acoustic and electronic instruments. The concentration includes a thorough background in the fundamentals of music, including music theory and history, and leads to a Bachelor of Science degree.

Through an exchange program, students may attend classes at the New England Conservatory of Music. Students also share an array of high-tech and multimedia equipment.

While some music courses are designed for music majors, the department also offers elective survey courses. Several of these courses fulfill the College of Arts and Sciences core curriculum requirement.

An extensive concert series offers a variety of performances by students, faculty, and guest artists. Students also have the opportunity to participate in active choral groups, bands, chamber ensembles, and the University orchestra.

Transferring to the Major
Students who wish to transfer into the major must have a cumulative GPA of 2.750 overall. Acceptance into the major is based on students’ meeting the department’s criteria for admission and availability of space in the major. Additionally, students who wish to transfer into the music technology concentration must submit a portfolio of recent original work and complete an interview. Enrollment into this concentration is limited and highly selective. Please see the department for specific instructions.

Academic Progression Standards
Students must maintain at least a B– average in all major courses. Students must complete all required music courses with grades of at least C. Students who fail to meet the above standards will be placed on departmental probation. Students who remain on probation for two consecutive semesters will be dropped from the major.

Philosophy addresses questions and theories related to morality, society, religion, and the natural and social sciences. The study of philosophy challenges students to examine, through critical reflection, their beliefs in many areas.

Courses aim to provide students with an understanding of the methods and traditions of philosophical and religious thought. Through readings, discussion, and writing, students examine questions concerning the nature and validity of religious beliefs, moral judgments, political ideas, and scientific theories, as well as questions about values and social policy in such areas as law, medicine, and technology. Course work in philosophy can strengthen the student’s work in other areas.

The program in religion offers students the opportunity to acquire an understanding of religious experience within its social, historical, literary, and political context. Students study specific religious traditions such as Judaism, Islam, and Hinduism, and
using a comparative approach they explore themes across faith traditions. Through the major, a student has the opportunity to study a range of religions and a variety of methods of understanding the key dimensions of religious life.

Transferring to the Major
A minimum cumulative GPA of 2.000 is required to transfer to the major. Acceptance into the major is based on students’ meeting the department’s criteria for admission and availability of space in the programs.

Academic Progression Standards
A minimum cumulative GPA of 2.000 is required to remain in good standing in the major.

The Philosophy Major
Philosophy majors enter diverse careers, ranging from college-level teaching to law and business. The program strives to help students sharpen their critical abilities. The department offers three ways to major in philosophy: the standard major, the concentration in law and ethics, and the concentration in religious studies.

NORTHEASTERN UNIVERSITY
Major in Religious Studies

The religious studies major is designed to introduce students to a wide variety of religious experience and expression in the world. Through this major, students are exposed to the basic features of the world’s religions and the ethical systems that accompany them and explore diverse methodological approaches to the study of religions in general. This major is designed to give students the expertise to prepare them for graduate school in religious studies or to enhance their abilities in any career that requires a liberal arts education.

Dual Major in Jewish Studies and Religion

The dual major in Jewish studies and religion offers students an integrated program of study of two naturally complementary fields. Study of Judaism as a religion, which forms an important core of the interdisciplinary field of Jewish studies, is greatly enhanced by broad familiarity with the world’s religious traditions; conversely, in-depth knowledge of Jewish history, identity, and culture provides students of religion with valuable insight into the ways in which religion interacts with a wide variety of forces to shape the experiences of the adherents of a
particularly faith. The dual major is designed to enable students to understand the history, culture, and religion of the Jewish people; analyze and apply theoretical understanding to the interaction between religious, social, and historical factors that have shaped the experiences of the Jewish people; and demonstrate fluency in understanding the major religious traditions of the world.

Students in the dual major receive an interdisciplinary introduction to the field of Jewish studies, followed by courses in Jewish religion and thought, Jewish history, and Jewish arts and culture; electives allow for exploration of Northeastern’s Jewish studies offerings, which focus particularly on modern Jewish life and identity. Religion course work provides a grounding in the Bible, central to understanding Judaism and other Western religions, followed by broader course work in world religion and upper-level thematic courses. Capstone courses bring the two fields closely together by integrating the study of Judaism into the broader study of religion or the study of religion into the study of the broader Jewish experience. Students fulfill their language requirement with Hebrew, and they are encouraged to fulfill their experiential education requirement through study abroad or an internship or co-op in a Jewish organization.

The dual major in Jewish studies and religion is designed to prepare students for graduate work in Jewish studies, religion, or many of the other disciplines that make up Jewish studies or for work within the Jewish community or in communal organizations associated with other religions. It is an ideal foundation for the integrative five-year program through which students can earn a BA from Northeastern and an MA or MJEd from Hebrew College.

RELS 2395 Japanese Buddhism 4 SH
RELS 3390 Cults and Sects 4 SH

ELECTIVE COURSE
Complete one RELS course.

GPA REQUIREMENT
2.000 GPA required in the minor
Physics examines the fundamental principles that govern natural phenomena, ranging in scale from collisions of subatomic particles, through the behavior of solids, liquids, and biomolecules, to exploding stars and colliding galaxies. The program aims to help students experience the intellectual stimulation of studying physics and the excitement of frontline research; understand the basic principles and techniques of physics-related careers; and prepare for graduate study in physics or related fields.

The department offers several degree programs: BS in physics, applied physics, or biomedical physics; BS in applied physics/MS in electrical engineering; MS and PhD in physics. Four levels of courses are offered: descriptive courses for nonscience majors with limited mathematical background; general survey courses for students in scientific and engineering fields; advanced courses primarily intended for physics, biomedical physics, and applied physics majors; and highly advanced courses primarily intended for prospective graduate students.

A BS, MS, or a PhD degree in physics offers many career opportunities in industrial, government, and academic high-technology laboratories as scientists or engineers. Many physics majors pursue advanced degrees in physics and related fields.

BS students have the option of majoring in several programs in addition to the general physics program, including programs in applied physics and biomedical physics. These programs are expanding as the need for students trained in biotechnology and nanotechnology is rapidly growing.

The biomedical physics program seeks to understand the role of physical processes occurring on molecular, cellular, or macroscopic scales, in vital biological functions, ranging from the interaction of chemicals with DNA, to the extraction of oxygen from red blood cells, to the generation of complex electrical signals in the brain and nervous system. Biomedical physics also examines how physical principles and modern instrumentation techniques can be used in medical applications.

The program in applied physics promotes study of physical processes at nanoscale dimensions. This field has many applications, including developing new green technologies, such as improving solar light-to-electricity conversion; using sunlight to split water into hydrogen and oxygen for fuel cell technologies; building future devices for information technology such as quantum computers; and many medical applications of nanoscience to improve disease diagnosis and treatment.

An additional option is the BS/MS program in applied physics and engineering, jointly sponsored by the Department of Physics and the Department of Electrical and Computer Engineering (ECE). Students are offered strong interdisciplinary training in physics, math, and electrical engineering to achieve a BS degree in applied physics and take graduate courses in ECE in the fourth and fifth years that lead directly to an MS degree in electrical engineering.

Students also have the opportunity to combine physics with another discipline through a dual major. Current dual majors with physics include chemical engineering, computer science, electrical engineering, environmental geology, geology, mathematics, and philosophy.

Transferring to the Major

Same as college standards. Acceptance into the major is based on students’ meeting the department’s criteria for admission and availability of space in the programs.

Academic Progression Standards

Students may not continue as physics majors beyond the end of the sophomore year unless the following courses are successfully completed:

- PHYS 1161 Physics 1
- PHYS 1165 Physics 2
- PHYS 2303 Modern Physics
- PHYS 2305 Thermodynamics and Statistical Mechanics
- PHYS 2371 Electronics
- MATH 1341 Calculus 1 for Science and Engineering
- MATH 1342 Calculus 2 for Science and Engineering
- MATH 2321 Calculus 3 for Science and Engineering
- MATH 2351 Ordinary Differential Equations

or equivalent courses. Note: The following courses may be taken in place of PHYS 1161, PHYS 1162, PHYS 1165, and PHYS 1166:

- PHYS 1151 Physics for Engineering 1
- PHYS 1155 Physics for Engineering 2
- PHYS 1156 Lab for PHYS 1155

A minimum GPA of 2.500 must be achieved in these courses to remain in the major.

Students may not graduate from the physics program unless all required physics, math, and science courses are passed with a GPA of 2.500 or more. Further, no more than two grades of D+ or lower may be counted toward the graduation requirements.

BREADTH COURSES FOR PHYSICS

Mathematics
Complete the following six courses:

- MATH 1341 Calculus 1 for Science and Engineering 4 SH
- MATH 1342 Calculus 2 for Science and Engineering 4 SH
- MATH 2321 Calculus 3 for Science and Engineering 4 SH
- MATH 2331 Linear Algebra 4 SH
- MATH 2351 Ordinary Differential Equations 4 SH
- MATH 3081 Probability and Statistics 4 SH

General Engineering
Complete the following engineering course:

- GE 1111 Engineering Problem Solving and Computation 4 SH

Chemistry
Complete the following chemistry course with corresponding lab:

- CHEM 1211 General Chemistry 1 4 SH
  with CHEM 1212 Lab for CHEM 1211 1 SH

Technical Electives
Complete 8 semester hours of intermediate or advanced courses from the following list:

- BIOL 2301 to BIOL 5999
- CHEM 2311 to CHEM 5999
- CHME 2001 to CHME 4699
- CIVE 2001 to CIVE 4699

Political science majors study the art and science of politics, the structure and functions of government, political behavior, and public policymaking. Students will be exposed to the political and policy dimensions of societies, economic systems, and cultures, today and across time, both in the United States and in other nations.

Political science majors begin with a set of core courses covering American politics, comparative politics, international relations, and research methods. Building upon that base of knowledge, majors choose electives from a broad range of offerings. Electives chosen may follow a general path of interest designed by the student, or they can be structured to fit within more specialized concentrations in law and legal issues, international and comparative politics, or public policy and administration. Most majors participate in the cooperative education program, with placements in local, state, and federal government agencies; law firms; nonprofit institutions; and corporations. Many students complete either a co-op position or an internship with a congressional representative, a senator, a governor, or other elected public servant.

Students may also participate in extracurricular programs designed to expand their leadership ability, such as the Political Science Student Association/Pi Sigma Alpha, Model United Nations, Model Arab League, student government, College Democrats, College Republicans, or other student groups. Many students study in one of the college’s international programs, such as the Irish Studies program, which includes an internship in the Irish Parliament. Students also may qualify for the University Honors Program.

The major in political science is designed to help prepare students for law school, graduate school, and careers in government and the nonprofit sector, as well as for teaching, journalism, legislative or lobbying positions, public relations activities, and work in international corporations.

**Transferring to the Major**

Upperclass students transferring to the major must have a cumulative GPA of at least 2.000.

Acceptance into the major is based on students’ meeting the department’s criteria for admission and availability of space in the program.

Studies in modern psychology focus on behaviors and mental processes. Grounded in empirical research with both humans and animals, psychologists investigate and seek explanations for the behaviors and mental life of individuals in addition to developing methods for promoting psychological well-being.

The psychology curriculum explores such topics as how brain function determines behavior; how we see, hear, and learn; what constitutes abnormal personality; how people develop emotionally and cognitively; and how individuals work in groups. Through laboratory practice and experimentation, individual research projects, and small-group seminars, the program encourages critical evaluation of psychology’s accomplishments and its future.
The Department of Psychology offers honors sections of introductory psychology, as well as honors activities in other courses. All students are eligible for directed study courses, which are individualized study or research experiences under the supervision of a faculty member. Co-op placements are based in both community (often mental health) and laboratory settings.

A solid scientific background in psychology helps prepare students for careers in teaching, business, public service, or research and provides a foundation for graduate study in all areas of psychology, including clinical, as well as in law and medicine.

Note: No double majors are offered in psychology and behavioral neuroscience due to similarity in course curricula. The minor is not available for students majoring in behavioral neuroscience or any dual major that involves psychology.

Transferring to the Major
A student within the University seeking admission into the major must either (a) have a cumulative GPA of 2.500 or higher or (b) have taken at least three psychology courses at Northeastern and have a GPA of 2.500 or higher in psychology at Northeastern.

Academic Progression Standards
Students who fail to maintain a minimum GPA of 2.000 will be placed on departmental probation. Three consecutive academic terms on departmental probation will result in dismissal from the major.

Sociology and cultural anthropology provide the critical perspective needed for studying the social cultural arrangements in which people live, for understanding how societies function, for studying the conditions under which people change society, and for describing the modes and conditions of cooperation that make social life possible.

Courses in the program examine such areas as gender, race, class, globalization, cities, conflict, law and crime, multiculturalism and intercultural relations, technology and the environment, education, media, and the comparative interdisciplinary analyses of societies. Many courses are directly relevant to majors in other fields, including economics, political science, philosophy, literature, criminal justice, and business.

The major in sociology or cultural anthropology seeks to prepare students for careers in public or private service, including such fields as law, teaching, social work, administration or management, and research.

Transferring to the Major
Students transferring during the freshman year must meet college standards.

Students transferring after the freshman year must:
1. Have completed three courses in anthropology or sociology with a grade of C or better.
2. Have a cumulative GPA of at least 2.000.
3. Meet the department’s criteria for admission and availability of space in the programs.

Academic Progression Standards
Same as college standards.

The study of theatre—as performance, visual expression, text, theory, and history—at Northeastern University balances production theory and practice. In the theatre production laboratory, students (majors and nonmajors) are involved in experiential learning that synthesizes the ideas, theories, and practices studied in the classroom. All theatre majors participate in laboratory and public performances.

A theatre major may petition to enter the concentration in performance, the concentration in production, or the generalist option. Opportunities exist for independent projects, internships, and co-op experiences.

Theatre majors may pursue advanced study in graduate or professional programs, careers as theatre practitioners, or careers in theatre education.
Transferring to the Major
Acceptance into the major is based on the student’s meeting the department’s criteria for admission and on availability of space in the program.

Academic Progression Standards
Students must receive a minimum grade of 2.000 in major courses. The following courses must be taken by the end of the fourth semester (third semester for transfer students):

- THTR 1101 Art of the Theatre 4 SH
- THTR 1120 Acting I 4 SH
- THTR 1131 Technical Theatre I 4 SH
- THTR 1270 Theatrical Design 4 SH
- THTR 2300 Theatre History 4 SH
- THTR 4804 Theatre Practicum (repeatable course, 1 SH to be taken twice)

Failure to meet these standards will result in departmental probation. Three consecutive semesters on probation will result in dismissal from the major.

The programs in Bouvé College of Health Sciences combine experiential and cooperative education opportunities with highly innovative academic curricula that are designed to meet the demand for well-educated allied health professionals, nurses, and pharmacists. The college seeks to prepare students to become effective professional practitioners, enter graduate schools, and work in many areas responsible for the delivery of health care.

There are three schools within the Bouvé College of Health Sciences: the School of Nursing, the School of Pharmacy, and the School of Health Professions, which comprises the following majors: athletic training, cardiopulmonary and exercise sciences, health science, medical laboratory science, physical therapy, and speech-language pathology and audiology. The college offers students a health-care education that features a curriculum of highly relevant and closely integrated basic courses in the physical, biological, behavioral, and administrative sciences; on-site involvement in clinical patient care, including introductory and advanced pharmacy practice experiences and clinical experiences in nursing, physical therapy, and other health professions; experiential education opportunities; a cooperative education work program; and a commitment to the search for and advancement of new and progressive concepts, ideas, and philosophies of education and professional practice.

Each of the programs offered by the college is accredited by the appropriate professional group. The college is a member of the Association of Schools of Allied Health Professions, the American Association of Colleges of Nursing, and the American Association of Colleges of Pharmacy.

Academic Requirements
Students are responsible for following the curriculum plan for their major, pattern of attendance, and graduation year. Students are responsible for monitoring their own progress through the curriculum by registering for the courses stipulated by their curriculum plan, knowing course prerequisites, regularly checking the degree audit system, and knowing the sanctions for unsatisfactory academic progress. Any exceptions to a student’s curriculum plan must be approved by their academic advisor.

**COLLEGE ACADEMIC STANDARDS—PROFESSIONAL COURSES**
Students must receive a grade of C or better in professional courses.

Professional courses are required courses taught within the major/college as identified by course subject code: ATHT, CAEP, EXSC, HLTH, HSCI, MLBS, NRSG, PHMD, PHSC, PHTH, PT, SLPA, TOXC.

Courses in the above-listed subjects that are taken as electives are exempt from the C or better rule and the University’s minimum satisfactory grade will be accepted.

**COLLEGE ACADEMIC STANDARDS—PROFESSIONAL PREREQUISITES**
Students must receive a grade of C– or better in selected professional prerequisites, as delineated below:

- Athletic Training: BIOL, CHEM, MATH, PHSC, PHYS
- Cardiopulmonary and Exercise Sciences: BIOL, CHEM, MATH, PHSC, PHYS
- Health Science: BIOL, CHEM, MATH
- Medical Laboratory Science: BIOL, CHEM, MATH, PHYS
- Nursing: BIOL, CHEM, MATH, A grade of C or better is required for PSYC 3404
- Pharmacy: BIOL, CHEM, MATH, PHYS

Pharmacy students must receive a grade of C or better in professional prerequisites beginning in the second year of the curriculum.
• Physical Therapy: BIOL, CHEM, EXSC, MATH, PHYS, PSYC

Effective with the fall 2006 entering class, physical therapy students must receive a grade of C or better in professional prerequisites beginning in the second year of the curriculum.

• Speech-Language Pathology and Audiology: BIOL, MATH, PHYS, PSYC 1101

Courses in the above-listed subjects that are taken as electives are exempt from the C– or better rule and the University’s minimum satisfactory grade will be accepted.

COLLEGE ACADEMIC STANDARDS—ALL OTHER COURSES

The University’s minimum passing grade for the course will be accepted. Please note: The University requires a minimum grade of C for ENGL 1111 and ENGL 3306.

PROGRESSION WITHIN BOUVÉ

• First-year students must complete at least 27 semester hours and meet all major prerequisite course requirements in order to progress to sophomore status. First-year students who earn fewer than the semester hours stipulated by the curriculum plan for their major must make up the difference prior to graduation.

• In order to progress into the subsequent year of professional courses, students must have completed all professional prerequisites with a grade of C– or better (except for pharmacy and physical therapy, which require a C in professional prerequisites beginning in the second year).

• In order to progress into the subsequent semester of professional courses, students must have completed all professional courses with a grade of C or better.

• Effective with the fall 2009 entering class, pharmacy students must receive a grade of C or better in professional prerequisites beginning in the second year, have satisfactorily completed all courses in years one and two of the curriculum, and have an overall GPA of 2.700 or better to progress from second- to third-year status. In addition, students must demonstrate good verbal and written communication skills, understanding of the pharmacy profession, and a commitment to patient care, based on criteria set by the Doctor of Pharmacy Program.

• Physical therapy students must receive a grade of C or better in professional prerequisites beginning in the second year and have a 2.700 overall GPA at the end of summer 2 semester of the fourth year to progress to the fifth year of the program. Students must maintain an overall GPA of 3.000 during the sixth year of the program.

• Students who incur an incomplete grade in a prerequisite course must obtain approval from their academic advisor, upon consultation with the department faculty, prior to progression into the subsequent course(s).

• Students dismissed administratively from the English Language Center are not eligible for the Bouvé program to which they were conditionally admitted.

CRITERIA FOR UNIVERSITY ACADEMIC PROBATION

Note: Notation of academic probation will appear on internal record but not on permanent transcript.

Students in the Bouvé College of Health Sciences will be placed on academic probation effective the following academic semester for any of the reasons noted below:

First-year Students:

• Not earning at least 12 semester hours in the second semester of the first year.

• Not maintaining an overall cumulative GPA of at least 1.800 at the end of the two semesters of the first-year curriculum.

Upperclass and Transfer Students:

Not earning at least 12 semester hours in the semester just completed. Not maintaining an overall cumulative GPA of at least 2.000 at the end of each academic semester.

ACADEMIC DISMISSAL FROM MAJOR

Students in the Bouvé College of Health Sciences will be dismissed from their major effective the following academic semester for any of the reasons noted below:

• Failure to earn a grade of C or better in three professional courses, regardless of remediation. Lecture and clinical/lab components for the same class are considered as one professional course failure.

• Effective with the fall 2008 entering class for nursing students, failure to earn a grade of C or better in two professional/clinical courses, regardless of remediation.

• Effective with the fall 2009 entering class for pharmacy students, failure to satisfy academic progression standards.

• Failure to earn the minimum required grade in the same course twice.

Note: Students dismissed from their major but who are otherwise in good standing with the University are allowed to remain at Northeastern University for up to two semesters as a provisional Bouvé student, by the end of which the student is expected to move into a new major. Otherwise, the student will be dismissed from the University.

ACADEMIC DISMISSAL FROM UNIVERSITY

Students who remain on probation after two academic semesters may be dismissed from the University. Notation of this academic dismissal action will appear on the permanent transcript.
ACADEMIC APPEALS

Students who believe that they were erroneously, capriciously, or otherwise unfairly treated in an academic or cooperative education decision may petition to appeal the decision. Refer to the Bouvé Undergraduate Student Manual, which details the Bouvé College of Health Sciences Appeals Process, and the Northeastern University Student Handbook, which details the University Undergraduate Student Academic Appeals Procedures.

The Department of Health Sciences offers a BS degree program in health science and minors in exercise physiology and in health science.

Health Science

The rapidly changing health system is creating a demand for broadly educated graduates possessing a strong understanding of health, health care, and community-service-related issues. Individuals with these skills are needed by public and private agencies, public health services, hospitals and other nonprofit and for-profit companies, and health-related organizations. The health science major is a preprofessional program designed to provide students with the appropriate background and preparation for entry into graduate and professional programs such as: medicine, dentistry, veterinary medicine, public health, physician assistant, exercise physiology, and social work. The major is also designed for students who are seeking a general preparation for positions in health promotion, health administration, and community-based public health.

The health science curriculum is an integrated model that builds upon a foundation of the social sciences, natural sciences, and the liberal arts. All health science students have the option to complete the program with or without a co-op experience. Health science students complete an array of major courses that introduce them to the health-care system in the United States and provide them with the opportunity to develop an understanding of health policy and administration, health research, quality-of-care improvement and evidence-based health care. The curriculum includes a significant number of electives designed to enrich students’ intellectual lives. Students will have an opportunity to identify a specific area of interest and may use the electives to explore a declared focus or a formal minor that complements their health science studies. The entire academic experience is drawn together through a capstone project during the senior year. The capstone project is intended to provide students with a structured opportunity to broaden, deepen, and integrate the knowledge and skills acquired in prior courses and experiential activities.

Minor in Health Science

The minor in health science is designed for undergraduate students from any discipline across the University wishing to expand and apply their understanding in public-health-related areas. The minor comprises five courses (20 credits) selected from courses offered within the health sciences major. The selection of courses is done in consultation with the health science program faculty.

Minor in Exercise Physiology

This minor in exercise physiology is for undergraduate students from any discipline across the University wishing to expand their understanding of human physiology. Exercise physiology is a discipline that examines the short- and long-term responses to exercise and benefits of exercise training for healthy persons as well as persons with chronic diseases such as heart disease, pulmonary diseases, diabetes, obesity, etc. Undergraduate students from many disciplines could broaden their understanding of human physiology and the role of exercise in health promotion, disease prevention, and rehabilitation with a minor in exercise physiology. Students who elect a minor in exercise physiology may then apply to the MS in clinical exercise physiology upon graduation.

PHYSICAL THERAPY

The mission of the physical therapy program is to foster the development of health-care professionals who practice the values of integrity, professional duty, social responsibility, excellence, accountability, altruism, caring, and compassion. Through our unique approach to learning, which includes cooperative education, the DPT program offers a rich environment that promotes lifelong personal and professional development in which students and faculty can engage to generate new knowledge through research. Graduates of our program are prepared to become reflective, evidence-based practitioners capable of responding to the changing needs of a complex world. The physical therapy program is designed to prepare its graduates to provide quality patient care in a time of changing concepts, trends, and challenges. Students are encouraged to help clients gain independence and to recognize and manage the emotional and socioeconomic problems that affect recovery.

The program in physical therapy has three admission points: freshman, transfer, or as a graduate student with a baccalaureate degree in a field other than physical therapy. The duration of the program is six years for freshman entry, four years for transfer or postbaccalaureate entry. The terminal degree for the program is the Doctor of Physical Therapy (DPT) degree. Cooperative education is unique to and the hallmark of Northeastern University. Ongoing professional development is accomplished through integration of the combination of classroom and experiential activities. Students of physical therapy alternate semesters of academic study with semesters of cooperative education work experience. Students may be employed as physical therapy co-op students with increasing responsibilities commensurate with their academic studies, or they may perform other health-related duties. These experiences provide an opportunity for the application and reinforcement of the lessons learned in the classroom and laboratory. Prior to graduation, students have twelve months of work experience incorporated into the academic program.

Students also have the opportunity to work with faculty to conduct ongoing research and to participate in community service learning.

In addition to cooperative education, the program includes thirty weeks of clinical education. Clinical education allows the student to practice professional skills under the supervision of a
licensed physical therapist. Clinical sites across the United States, offering a wide range of specialties, participate in our clinical education program. Every effort is made to accommodate individual circumstances, but students should be prepared to travel out of state for two of the three clinical courses. Availability of a car may be required, as most sites are not accessible by public transportation. All expenses associated with clinical education, including travel and housing, are the responsibility of the student.

Physical therapists provide services to patients and clients who have impairments, functional limitations, disabilities, or changes in physical function resulting from injury, disease, or other causes. In addition, physical therapists are involved in wellness initiatives, including screenings, health promotions, and educational activities that promote healthy lifestyles. They perform administrative duties and direct and supervise support personnel. Physical therapists interact and practice in collaboration with a variety of health-care professionals, including, but not limited to, physicians, dentists, nurses, educators, social workers, occupational therapists, speech-language pathologists, and audiologists.

Physical therapists function in a variety of settings, including community and university hospitals; rehabilitation centers; private practices; educational settings; extended-care facilities; freestanding outpatient clinics; home health agencies; and community, state, and federal agencies. Students do not need to reapply to the DPT phase of the program, provided they meet the academic standards. To progress in the program, students must maintain acceptable standards of scholarship and academic performance as stated in the academic requirements section of this catalog. Students must develop appropriate motor skills, professional behavior, and emotional maturity.

The program in physical therapy is accredited by the Commission on Accreditation in Physical Therapy Education of the American Physical Therapy Association. Graduates of the Doctor of Physical Therapy program are eligible to sit for the Physical Therapy Licensure Examination. DPT—Doctor of Physical Therapy

SPEECH-LANGUAGE PATHOLOGY AND AUDIOLOGY
www.northeastern.edu/bouve/programs/bspeechpath.html

RALF W. SCHLOSSER, PHD
Professor and Chair

Speech-language pathologists and audiologists are involved with the evaluation and treatment of, and counseling and research in, human communication and its disorders. The Speech-Language Pathology and Audiology program is designed to help students develop entry-level competencies that will enable them to function in a preprofessional capacity in educational settings, medical and rehabilitation centers, and private practice clinics. Students will be exposed to a wide variety of communication disorders through observation and participation in activities at the Northeastern University Speech-Language and Hearing Center. This is a state-of-the-art facility in the new Behrakis building. Alongside their graduate student mentors, students are introduced to the basics of clinical practice and research. Externships in schools, hospitals, or other relevant settings are designed to broaden students’ exposure and help prepare them for graduate study or employment. Students may also broaden their knowledge of health care practice by taking interdisciplinary courses with their colleagues in disciplines such as physical therapy, nursing, and pharmacy.

Speech-language pathologists and audiologists provide clinical services to a full range of communicatively impaired individuals, from infants through geriatrics. Speech-language pathologists treat disorders such as developmental language and articulation disorders; voice and resonance problems; stuttering; pediatric and adult swallowing disorders; and language and cognitive impairments due to stroke, head injury, and progressive neurological diseases. Audiologists specialize in the prevention, identification, assessment, and rehabilitation of hearing disorders. Individuals with congenital and acquired hearing impairments are seen for services by audiologists. They prescribe and dispense hearing aids and instruct individuals in the use of amplification. Undergraduate students take courses in both speech-language pathology and audiology in preparation for advanced training and specialization at the graduate level.

The Bachelor of Science degree program in speech-language pathology and audiology includes an experiential learning component, a broad-based academic core, and the scientific and clinical course work necessary for understanding normal and disordered communication. The degree offers preprofessional training for individuals who want to pursue graduate education in speech-language pathology and audiology. Alternately, graduates may be hired as speech and hearing assistants in a variety of clinical settings, or they may pursue other career paths in health care and education.

The speech-language pathology and audiology curriculum is designed to facilitate critical thinking, information literacy, and oral and written communication skills. In addition to course work in the basic communication sciences, course work is required in education, allied health, computer literacy, ethics, multicultural/diversity issues, and psychology. The curriculum provides a solid foundation in speech-language pathology and audiology and basic sciences, and it is sufficiently flexible to provide students with the opportunity to minor in an area of related interest. By taking five courses in the standard curriculum, students may earn a minor in psychology.

A unique aspect of the speech-language pathology and audiology program is a five-year accelerated program. Students who have maintained a GPA of 3.250 or better, who have a
departmental endorsement, and who have satisfied all graduate program admissions requirements may seek admission to this program in their third year. Students will, if successful, earn both a BS in speech-language pathology and audiology and an MS in speech-language pathology at the end of the program and meet national certification requirements. The accelerated program is selective and a restricted number of students are admitted each year.

**Academic Progression Standards**

In order to progress from the freshman to sophomore year, the student must have a GPA of at least 1.800 and have completed 27 semester hours. In order to progress into the subsequent year of professional courses, the student must have a grade of C or better in all professional courses.

The School of Nursing offers a Bachelor of Science in nursing program designed to prepare students to become professional nurses for practice in a variety of health-care settings such as hospitals, community health centers, schools, and homes. The school aims to provide all students—including those with diverse
backgrounds and changing career goals—with a broad-based education that will foster ongoing personal and professional growth.

Successful completion of the baccalaureate program allows graduates to take the National Council Licensuring Examination (NCLEX-RN) to become registered nurses (see also “Special Requirements,” below) and also seeks to provide the educational background needed for graduate study in nursing specialties.

Nursing is both a science-based process and a caring art. The curriculum offers instruction in the sciences with opportunities in the humanities. Since nursing practice focuses on promoting, preserving, and restoring the health and well-being of individuals, families, groups, and communities across the life span, the curriculum emphasizes a community-based, primary-care approach, which builds throughout the program. This approach requires knowledge, skills, and attitudes related to health care that are comprehensive, culturally sensitive, continuous, effective, compassionate, and collaborative. Because the vast majority of people’s lives are spent in the community, a significant part of the clinical program takes place in the community where people live, work, rest, play, vote, and pray. Recognizing the equally important need to prepare nurses to care for ill patients in institutions, the program provides ample opportunities for nursing practice in hospitals, rehabilitation centers, and long-term-care facilities. The curriculum is capped by courses that enable students to put leadership and management skills into action and to synthesize the complete role of the professional nurse in a clinical practicum.

In addition to completing academic course work, students must meet the cooperative education requirement, which gives them the opportunity to integrate the theory and practice of nursing in selected settings. Through numerous community and institutional health-care agencies in Greater Boston and across the country, students gain experience in providing nursing care to a variety of patients and families. Students learn that nurses have major roles in wellness and health promotion, acute care, and long-term care.

The program is accredited by the Commission on Collegiate Nursing Education and is approved by the Board of Registration in Nursing of the Commonwealth of Massachusetts (BORN). Accreditation and approval indicate that the program meets educational standards for faculty, curriculum design, student quality, and overall University support. The school subscribes to the standards established by the American Association of Colleges of Nursing, of which it is a member.

Special Requirements
All students must receive a health clearance from University Health and Counseling Services (UHCS). This is based on documentation of evidence of immunity from infectious disease and a physical examination (this may be done by the student’s own health care provider). In addition, nursing students need a clinical clearance in order to participate in clinical courses. Clinical clearance includes verification of UHCS health clearance and also documentation of current certification in cardiopulmonary resuscitation (CPR), recent tuberculosis screening (PPD), and additional health screenings as may be required by the program. It is the responsibility of the student to stay current and to provide documentation required for clinical clearance throughout the entire nursing program.

Most clinical settings also require additional information from the student, such as a Criminal Offender Record Information (CORI) release; the school will inform the student in those instances.

Students enrolled in the clinical courses may need access to a car to travel to assigned agencies. Students are responsible for their own transportation costs.

During academic semesters, students in the School of Nursing are required to wear the approved school uniform in some clinical laboratory areas.

In Massachusetts and several other states, the registering board requires that graduates sitting for the NCLEX-RN licensure examination meet standards of “good moral character.” Students may review Licensure Policy No. 99-03 under “Rules & Regulations” on the Massachusetts BORN Web site at www.mass.gov/dpl/boards/rn/index.htm or investigate the requirements in the state where they expect to practice.

Upper-Division Transfer Track
The School of Nursing undergraduate program welcomes both transfer students and students planning a career change who have a degree in another field. Recommended entering requirements include one semester of biology, two semesters of anatomy and physiology (with lab), one chemistry course (with lab), and college algebra. Overall GPA should be a minimum of 3.00 for consideration into the program. A microbiology course (with lab) is strongly recommended. Students are accepted into this track for the fall semester only. Once accepted, the transfer student follows a fixed curriculum plan that includes cooperative education experiences. Students may complete their baccalaureate program requirements in approximately six semesters, including co-op.

RN to BSN Option
The school accepts registered nurses who wish to complete requirements for a Bachelor of Science in nursing degree into the University’s College of Professional Studies. The part-time curriculum program varies, depending on the individual’s previous educational experience and ability to achieve advancement through the development of a portfolio to validate prior learning. More information is available at www.northeastern.edu/cps/rnsbs_nursing.

COOPERATIVE EDUCATION

UNIVERSITY-WIDE REQUIREMENTS
128 total semester hours required
Minimum 2.000 GPA required
employment in drug development, marketing and research within the pharmaceutical industry, colleges of pharmacy, and professional association management. Many graduates go on to leading graduate schools, pharmacy practice residencies, and research fellowships for specialized training.

The six-year Doctor of Pharmacy curriculum at Northeastern University offers a unique program that fully integrates campus-based learning with experiential education, including the University’s signature cooperative education (Co-op) program.

To be eligible for a pharmacy degree, a student must satisfactorily complete all courses in the curriculum; have an overall 2.000 GPA; meet the introductory (co-op) and advanced pharmacy practice experiences; and satisfy all other requirements as stated in the Bouvé College of Health Sciences Undergraduate Student Information Manual. The undergraduate pharmacy program, which is fully accredited by the Accreditation Council for Pharmacy Education (info@acpe-accredit.org), subscribes to the standards established by ACPE and the American Association of Colleges of Pharmacy.

Pharmacy graduates must meet specific requirements to qualify for professional licensure in the state where they plan to practice as a registered pharmacist. These requirements include graduating from an accredited school of pharmacy, passing national and state board examinations, and completing an internship. The internship is a period of practical experience conducted under the supervision of a registered pharmacist. Massachusetts requires 1,500 internship hours, all of which are satisfied through the introductory (co-op) and advanced pharmacy practice experiences.

**Academic Progression Standards**

Students must adhere to the program plan for their year of graduation. Any deviation from the program’s curriculum requires permission and an approved plan of study from the School of Pharmacy Academic Affairs Committee. To remain in good academic standing, students must receive grades of C or better in all professional prerequisite courses beginning with the second year of the program. To progress from the second to the third (first professional) year of the pharmacy program, students must have an overall grade point average (GPA) of at least 2.700; have satisfactorily completed all courses in years one and two of the curriculum; and have successfully completed evaluations to assess verbal and written communication skills, understanding of the pharmacy profession, and commitment to patient care. To progress into any subsequent year of the program, students must have passed all professional courses with a grade of C or better.

**PharmD—Doctor of Pharmacy**

**PHARMACY MAJOR GRADE REQUIREMENT**

A grade of C or higher is required in all PHMD and PHSC courses. A GPA of 2.700 is necessary to progress from second to third year. See “Academic Requirements” on page 205 and “Academic Progression Standards” on page 220 for additional grade and progression requirements.

Toxicology—the study of injurious effects of chemicals on living organisms—has become increasingly important against a background of bioterrorism, rapid advances in DNA research, and a constant stream of new industrial chemicals in our environment.

Toxicologists are responsible for determining hazards from exposure to chemicals, setting limits of safety, identifying and measuring toxic chemicals by analysis, recommending safe use of chemicals, and determining clinical hazards and treatment of drug overdoses and chemical exposure.

Toxicology is a very diverse field, touching on drug research, pharmacology, chemical analysis, forensics, and environmental pollution, among other disciplines.

A minor in toxicology is available to students interested in environmental issues and in gaining insight into experimental approaches to evaluate drug and chemical toxicity.

Programs in the College of Business Administration are designed for students who are preparing to take on managerial responsibility. These programs help students develop the ability to recognize and solve business and organizational problems and understand the role of business in the community, the nation, and the world.

The college’s goal is to help students develop ideals that are ethically sound and socially desirable; cultivate an awareness of the social, political, and economic developments to which businesses must adapt; develop sound judgment and effective communication skills; and develop their individual interests and talents.

Modern business faces many challenges from unprecedented political change and the effects of foreign policy, high technology, affirmative action regulations, and new economic policies. These challenges have increased the demand for highly trained individuals equipped to analyze and address our economy’s complex social and legal problems.

The college offers Bachelor of Science degrees in international business and in business administration with concentrations in accounting, entrepreneurship and innovation, finance and insurance, management, supply chain management, management information systems, and marketing. The business curriculum is enhanced by courses in the sciences, humanities, and social sciences. In addition to their academic courses, all students are required to complete a cooperative education plan.

Co-op provides a learning experience beyond the classroom. Textbook examples come to life in real-world business settings. Classroom theories are applied to actual business problems. In turn, these experiences serve to stimulate inquiry and discussion back in the classroom. This interaction between college studies and cooperative education sets the stage for a lifetime of learning.

The undergraduate program of the College of Business Administration meets the standards of the American Assembly of Collegiate Schools of Business for faculty and student quality, curriculum design, and overall University support.

After graduation, students may obtain jobs in all aspects of business, both domestically and internationally.

* Freshman Core Courses refers to College Writing, Macroeconomics and Microeconomics, Calculus for Business, and Introduction to Business.

Freshmen must complete at least 24 SH in order to progress to sophomore status, although freshmen who earn fewer than 32 SH must make up the difference prior to graduation. Students beyond the freshman year must complete at least 16 SH each in-school (not on co-op) full semester and 8 SH each in-school summer half semester in order to progress to the next class standing.

Pass/Fail Option
College of Business Administration students may opt to take courses on a pass/fail basis in accordance with University policy but should be aware that this policy applies to nonbusiness courses that will count as open electives only. Business courses may not be taken pass/fail under any circumstance.

Taking Courses While on Co-op
It is College of Business Administration policy that, with permission of their academic advisor, co-op coordinator, and employer, students may take a maximum of one class while on co-op during the fall, spring, or summer term. Students should initiate this process by filling out the appropriate paperwork with their co-op coordinator.
Transferring to the College of Business Administration

Students may transfer to the College of Business Administration externally (from another institution) or internally (from another school or college at Northeastern University).

EXTERNAL TRANSFER

External transfer students are accepted from other academic institutions during the fall and spring terms. Applications and accompanying materials are submitted directly to the Admissions Office.

The College of Business Administration at Northeastern University is accredited by the Association for the Advancement of Collegiate Schools of Business (AACSB) and as such complies with the following regulations governing the transferring of credit:

Courses from an AACSB-accredited institution:

Students may transfer a maximum of 80 semester hours (SH) of credit. A combination of 60 SH of nonbusiness courses and/or 28 SH of business courses will be accepted.

Courses from a non-AACSB-accredited institution:

Students may transfer a maximum of 60 SH of credit. A combination of 52 SH of nonbusiness courses and/or 20 SH of business courses will be accepted.

Some courses are not eligible for transfer. Please check with an academic advisor in the College of Business Administration for more details.

INTERNAL TRANSFER

Students may internally transfer into the College of Business Administration through the Internal Transfer Program, the General Studies Program, or the Ujima Scholars Program. Students wishing to internally transfer into the College of Business Administration should follow the entrance criteria laid out by their respective program. Students should be aware that certain courses are not applicable to College of Business Administration curriculum and will not count toward degree requirements.

Examples of such courses include ECON 1101, mathematics below precalculus level, and study skill courses. Students who take these courses prior to matriculating into the College of Business Administration will need to take additional courses to meet graduation requirements.

Graduation Requirements

Bachelor of Science degree candidates must complete all prescribed work of the curriculum in which they seek to qualify, currently 128 semester hours. The degree not only represents the formal completion of selected courses, but also indicates professional study in the major or concentration. A GPA of C (2.000) and a C average in all business courses are required for graduation. Students must be enrolled in a full program of studies in the College of Business Administration during the final three semesters preceding graduation.

MINOR

Courses for the minor are offered for nonbusiness students. This minor is attractive to students if they are considering a career in business or pursuing an MBA. The minor consists of five courses. These include Financial Accounting, Introduction to Marketing, Financial Management, Human Resource Management, and one elective. Students who wish to enter the program should sign up in the Undergraduate Business Programs Office. Students who complete all five courses successfully and have earned at least a C (2.000) average in them will be awarded a minor in business administration at graduation.

GPA REQUIREMENT

2.000 GPA required in the minor
A concentration in accounting aims to prepare the graduate for entry into public or private firms and is one of the most critical areas of management. Accounting is an exciting field that requires people with sound technical knowledge, critical thinking skills, superior interpersonal skills, and the ability to communicate effectively. Accountants hold senior management positions in private companies in business or industry, public accounting firms, and government agencies.

To prepare for an accounting career, students take courses in financial reporting and managerial accounting, with additional elective courses available for more specialized studies in strategic cost analysis, auditing and other assurance services, income tax planning, and accounting information systems.

By combining technological and service innovation with the great incentive to enhance personal wealth, today’s entrepreneur is an important engine for growth and job creation in our economy. Entrepreneurs come in many varieties: from those who start one-person firms to those who start growth ventures that will go public and become large companies. Rather than starting their own businesses, some of our students assume responsibility for family businesses and expand them through new strategies and financing. Still other students are hired by large corporations that are trying to learn entrepreneurial thinking to create new business units and renew traditional product lines.

The entrepreneurship and innovation concentration guides students through the process of developing new business concepts, writing business plans for those concepts, and seeking venture financing. We expose students to a wide range of entrepreneurs and investors. We also demonstrate how a small, growing business should be managed, which will help some of our students better manage and expand their existing family-owned businesses. The most entrepreneurial of seniors may compete in a special undergraduate track for start-up financing in Northeastern’s Business Plan Competition.

The role of people trained in finance and insurance is expanding rapidly within the business world. Changes on the financial scene—rising securities prices, fluctuating inflation and interest rates, and globalization of markets—have created an awareness that financial knowledge is essential to the effective management of business firms.

Finance is the management and investment of money and other assets for businesses, financial institutions, nonprofit organizations, governments, and individuals. The program draws on accounting principles, economic theory, and quantitative methods to direct the way money is managed, acquired, and distributed. Students are exposed to economic and financial systems and how they operate. They also are given an opportunity to analyze economic trends and indicators and how to apply this analysis to financial decision making.

Students may specialize in one or more of the following areas: corporate finance, investment management and analysis, management of financial institutions, insurance and risk management, and real estate. The program is designed to prepare students for careers in corporate financial management, security analysis, investment management, security or insurance brokerage, underwriting, credit management, and risk management with corporations, banks, insurance companies, and other financial institutions.

Globalization of the world economy, the growth of multinational firms, and international trade have created an increasing demand for managers who are equipped to address the complexities of international business. The College of Business Administration offers the Bachelor of Science in International Business (BSIB) to meet the needs of the highly motivated student who plans a career in international business whether abroad or in the United States. The BSIB requires a student to study and work both in the United States and abroad. This program, the first of its kind in the United States, was initiated in 1994.

All students in the BSIB program must take the degree’s required courses in international business administration and must choose a second concentration from other business areas such as finance, marketing, management, supply chain management, human resources management, and management information systems. Further, the student has three BSIB program options. The first leads to proficiency in a foreign language; the second and third focus on international affairs or East Asian studies, respectively:

a. Students who opt for the BSIB with a foreign language emphasis are admitted to a French, Spanish (Spain or Mexico), German, or Italian track. They have to develop proficiency in their chosen language and study the culture of the country or countries where that language is spoken. Students are required to study in the language of their choice in a partner university abroad for at least one semester and to complete at least one six-month cooperative education work assignment abroad in order to sharpen their language proficiency, cross-cultural capabilities, and business skills. At the end of their studies, students can earn a minor in their chosen language.

b. Students who opt for the BSIB with an emphasis in international affairs or East Asian studies are required to take courses that lead to a minor in either specialty. They are required to study abroad in a partner university in Ireland or Hong Kong/China. Further, they must complete at least one six-month cooperative education work assignment abroad in order to sharpen their cross-cultural capabilities and business skills. While the international affairs or East Asian studies option has a foreign language requirement, the language of instruction abroad is English.

Students may earn both the BSIB degree from Northeastern University and the degree of our partner university if they choose to extend their study in the partner institution for their senior year as well. Students should contact the BSIB advisors for course schedules.

Note 1: The Bachelor of Science in International Business degree requires two half-summer periods of study: one abroad to improve language skills (Summer 1 semester, second year) and the second on campus to prepare for the one- or two-year study and work requirement abroad (Summer 1 semester, third year). This additional requirement brings the total semester hours to 137.

Note 2: The BSIB program does not offer a partner university degree for the Hong Kong/China—East Asian studies BSIB option at this time.

MANAGEMENT
www.cba.neu.edu/undergrad

Managing people, projects, and programs requires a considerable range of knowledge and skills. Effective managers must know the business, be interpersonally competent, behave ethically, diagnose and deal with human and organizational dynamics, and the like. To be sure, students must increase their knowledge of good management practices. For example, they need to learn principles of motivation, leadership, problem solving, conflict resolution, planning, organizational change, and their impact on business results. In addition, students must also improve their managing skills. Simply said, they need to learn “how to” manage. The aim of the management concentration is both to increase knowledge of management so that students have a strong substantive “core” and to increase management skills.

The curriculum offers courses in a range of relevant management topics. Some of the courses, including the required core course, are primarily skills-oriented; they teach “how to.” Others are more content-oriented; they teach “about management.” To enable students to gain exposure to a broad scope of management topics and issues, some of the courses consist of two topics, each of which is a half-semester course, which affords you an opportunity to learn from two different faculty experts.

In the industrial era of the past, management of materials and products was the focus. In the global Information Age, success for individuals and for companies requires the ability to manage information effectively.

The goal of the management information systems (MIS) concentration is to teach future managers how to use information systems (IS) and technology (IT) to help organizations and individuals perform more efficiently and effectively. This can lead the student in two career directions:

- To become a professional in the information systems function of a company.
- To harness the power of information systems in another functional area such as accounting, finance, marketing, etc.

Students have an opportunity to develop new, cutting-edge approaches that allow them to use the powerful resource of information systems to its greatest advantage. Understanding how to get the right information in the right form and format to the right people at the right time is essential in today’s business world, especially when companies and the individuals that do this well are achieving significant competitive advantage.

Students study database management; telecommunications; systems integration and design; and other IS topics, such as digital multimedia, expert systems, electronic business, and knowledge management.

IS can only be effectively designed and implemented when understood in the context of the individual user, the work group, the organization, and society. Therefore, the study of MIS combines a focus on technology with a focus on organizational systems within the business context. Not only do students have an opportunity to develop technical and problem-solving skills that are in high demand by employers, they are taught to identify how IS can best be used within a business organization.

Students who wish to become MIS managers will need to interact frequently with other managers throughout an organization. Therefore, students are encouraged to complete a dual concentration in MIS and another area of business. Graduates of this program enter a wide range of professions that suit their particular interests. Professional options include systems analyst, programmer, database designer and administrator, Webmaster, software help-desk expert, project specialist, consultant, network administrator, and IT specialist within other departments, such as financial services, accounting, marketing, or manufacturing.

A business not only designs and manufactures products, but also markets and sells them to manufacturers, wholesalers, retailers, and consumers. All the activities that direct the flow of goods and services from producer to consumer are classified as marketing concerns. Once an organization determines a customer’s needs and wants, its first objective is to produce goods or services to satisfy that particular customer. Essential in all types of businesses are product design, research, pricing, packaging, transportation, distribution channel, marketing communications (e.g., advertising), selling, and service strategies.

The concentration in marketing is designed to familiarize students with the marketing process and to provide them with the theoretical concepts, skills, and tools necessary to enter and advance successfully in one of the many possible career paths. Students are shown how to evaluate consumer behavior, employ marketing communication principles (including traditional advertising as well as digital marketing), develop and utilize market research and testing, and develop ways to position products and services strategically. They also are exposed to the changing economic, political, legal, ethical, and cultural contexts in which marketing strategies must be developed.

Students may select courses that lead to one of many career paths within marketing: product or brand management, marketing research, advertising management, retail management, sales management, or international marketing management.

From the Fortune 500 manufacturer to the small firm that produces, sells, or distributes products, all such companies have a supply chain management function that must be effectively managed if they are to be competitive. A supply chain manager is typically involved in making critical decisions about such matters as the modes of transportation used to move the company’s materials and products, inventory policies, warehousing needs, customer service standards, and the location of facilities.

As companies become increasingly involved in global markets as both buyers and sellers, supply chain managers play a major role not only in assessing the feasibility of international activity, but also in developing supply and distribution networks to support that involvement. The policies that these managers help formulate are major determinants of a company’s success in the international arena.

The academic work of the program flows from introductory courses that address the decisions outlined above through advanced study of the formulation of supply chain strategies. The program culminates in a senior seminar that not only introduces the students to industry leaders in the field, but also focuses on development of individual research and presentation skills.
Because supply chain managers frequently interact with those involved in other areas of management, many supply chain management students have chosen to complete a second concentration in such areas as marketing, finance, or international business.

In addition to finding career opportunities with manufacturers, retailers, and distributors, supply chain management students may find similar opportunities with companies that sell supply chain services or transportation services in the marketplace. Consulting firms and government agencies at the federal, state, and local levels provide other career options.

SCHOOL OF TECHNOLOGICAL ENTREPRENEURSHIP
www.ste.neu.edu

PAUL M. ZAVRACKY, PhD
Professor and Dean

In the spring of 2004, the School of Technological Entrepreneurship (STE) was approved by the Northeastern University Board of Trustees. Commencing with the 2004–2005 academic year, STE began offering an undergraduate minor and elective courses for full-time undergraduate students.

History has demonstrated that successful technological entrepreneurs possess a combination of skills that include a unique style of leadership, a desire to create enterprises, and a strong internal drive to pursue ideas they know will change the world. The scientists and engineers among this dynamic group often developed an understanding of basic business practices on the job; while their colleagues from business administration similarly developed an understanding of the unique character of technology-based ventures. Now, undergraduate students interested in becoming technological entrepreneurs have the opportunity to acquire skills in a more formal program. Students intrigued with the possibilities and who possess a passion for learning and a very strong desire to succeed should consider the minor offered by the STE.

The process needed to establish technology-based ventures differs from that of nontechnical businesses. It typically begins with an advancement in science and engineering that could lead to a technology-based product or process. Obtaining patents and copyrights to protect a company’s products and processes is especially important. Equally important is the careful and strategic disclosure of intellectual property while forming key relationships with other, often larger companies. Crude prototypes or demonstration vehicles are often created to demonstrate the potential of a new idea. At this point, young technological entrepreneurs learn that they need to uncover a compelling use for their new invention in order to find market success. Markets don’t always exist for truly new technologies and therefore must be created, making the commercialization process long and difficult. The technological entrepreneur has to probe different applications.
to find those that provide fertile ground for sales growth and ultimately for commercial and corporate success.

From an academic perspective, the field of technological entrepreneurship is at the intersection of science and engineering and business administration. The STE was established to develop educational programs that provide potential entrepreneurs with an opportunity to study the unique aspects of product development, marketing, and business practices that are associated with technology-based ventures. The school provides a new learning environment in which science, engineering, and business students are introduced to the unique aspects associated with the commercialization of technology-based products.

A hallmark of STE is interdisciplinary instruction and a focus on creative practices. A major highlight of the school is faculty collaboration and team teaching. Faculty from engineering and science bring to the school precise knowledge in many technical areas, experience with the product life cycle, and an understanding of the complexities associated with advanced technologies. The business faculty bring a working knowledge of marketing, finance, accounting, and project management. It is the integration of these two areas that defines technological entrepreneurship, and it is achieving this integration that makes STE classes exciting and rewarding for students.

**ADDITIONAL PROGRAMS**

**BS in Computer Science and Business Administration**

See page 261.

**BS in Information Science and Business Administration**

See page 272.
The invention of powerful computers and the development of complex software programs have fundamentally transformed the way people work and live. Computers are now essential tools in business, industry, science, medicine, and human services. Computers also enhance the efforts of individuals and volunteer groups to meet their goals. In addition, the most sophisticated work in music, film, and video often makes use of computer technology. The College of Computer and Information Science believes that computing is one of the most exciting fields of study and that its applications are limitless.

The college offers undergraduate degree programs in computer science (BS and BA) and information science (BS) and dual majors with business administration, cognitive psychology, biology, mathematics, physics, environmental science, digital art, multimedia studies, and music technology, as well as a dual major in computer science and information science. The BS in computer science emphasizes strong technical competence in computer science, mathematics, science, and electrical engineering while the BA in computer science combines computer science with a broad-based liberal arts education. The BS in information science integrates studies in computer science, information science, business, psychology, and social science. Each of the dual majors offers the opportunity for intense study in two disciplines. The BS in computer science follows the ACM-IEEE Curriculum 2001 recommendations and is accredited by the Computing Accreditation Commission of ABET.

Academic Progression Standards
The following are the minimum requirements for freshmen to achieve sophomore status.

- At least 25 SH of credit
- A minimum overall GPA of 1.800
- A minimum computer science GPA of 1.800
- Successful completion of the following required courses:
  - CS 1800 and CS 2500, each with a grade of at least C–
  - ENGL 1111 or equivalent ENGL 1102
  - An arts and sciences core course

The minimum overall GPA values required for students to advance to the next rank and to graduate are:

- Middler 2.000
- Junior 2.000
- Senior 2.000
- To graduate 2.000

In addition, students must achieve a minimum overall GPA of 2.000 and a minimum overall GPA in CS/IS courses of 2.000 for graduation.

Program Length
Normally, the undergraduate program is five years, with seven full academic semesters and two to three six-month periods of cooperative education. Some students may complete the program in four years with a reduced cooperative education component. The college is strongly committed to the cooperative education program since it believes that the opportunity to integrate academic learning with practical experience in industry can greatly contribute to a student’s personal and professional development.

Computer science involves the application of theoretical concepts in the context of software development to the solution of problems that arise in almost every human endeavor. Computer science as a discipline draws its inspiration from mathematics, logic, science, and engineering. From these roots, computer science has fashioned paradigms for program structures, algorithms, data representations, efficient use of computational resources, robustness and security, and communication within computers and across networks. The ability to frame problems, select computational models, design program structures, and develop efficient algorithms is as important in computer science as software implementation skill. Computer science is concerned with bringing together all of the intellectual resources needed to enable the rapid and effective development of software to meet the needs of business, research, and end users.
The goal of the undergraduate program in computer science is to teach students the conceptual and practical skills that will enable them to contribute to the development of computational principles and to play a productive role in the software community. To that end, the undergraduate program focuses on the fundamentals of program design including object-oriented design, software development, computer organization, systems and networks, theory of computation, principles of languages, and advanced algorithms and data. The program also offers a variety of electives at the upper undergraduate and beginning graduate levels ranging from more theoretical courses to those that focus on important applications.

**BSCS—Bachelor of Science in Computer Science**

**COMPUTER SCIENCE MAJOR REQUIREMENTS**

**Computer Science Overview**
Freshmen or freshmen transfers complete the following two courses:
- CS 1200 Computer/Information Science Overview 1 1 SH
- CS 1210 Computer/Information Science Overview 2 1 SH

Upper-level transfer students complete the following course:
- CS 1220 Computer/Information Science Co-op Preparation 1 SH

**Computer Science Fundamental Courses**
Complete the following four courses with corresponding labs, as indicated. A grade of C– or higher is required in each course:
- CS 1800 Discrete Structures 4 SH
- CS 2500 Fundamentals of Computer Science 1 4 SH with CS 2501 Lab for CS 2500 1 SH
- CS 2510 Fundamentals of Computer Science 2 4 SH with CS 2511 Lab for CS 2510 1 SH
- CS 2800 Logic and Computation 4 SH with CS 2801 Lab for CS 2800 1 SH

**ELECTIVES OUTSIDE COMPUTER AND INFORMATION SCIENCE**

**Depth or Breadth Elective Requirement**

Complete three courses from either the depth option or the breadth option.

**DEPTH**

Complete three courses in one department outside computer science and information science. *Note:* For the purposes of this requirement, all business courses are considered to be in a single department.

**BREADTH**

Complete three courses in arts, humanities, or social sciences.

**Remaining Electives**

Complete 20 semester hours of elective course work. Two of these electives must be used to satisfy the NU Core arts/humanities level 1 requirement and the NU Core social science level 1 requirement. If the NU Core comparative study of cultures requirement is to be satisfied by taking a course, then it must also be one of the general electives.

**MAJOR GPA REQUIREMENT**

Minimum 2.000 GPA required in all CS and IS courses.

SOCL 4528 Computers and Society 4 SH

UPPER-DIVISION ELECTIVE
Computer Science or Mathematics Upper-Division Elective
Complete one upper-division course in computer science, information science, or mathematics. With advisor approval, a directed study, project study, or an appropriate graduate-level course may also be taken as a computer science elective.
CS 2990 to CS 4993
IS 4200 Information Retrieval 4 SH
IS 4300 Human Computer Interaction 4 SH
MATH 2230 to MATH 4581

REQUIRED GENERAL ELECTIVES
Complete ten general electives. One of these electives must be used to satisfy the NU Core social science level 1 requirement. One of the electives must be an arts course from the NU Core arts/humanities level 1 domain, and one must be a humanities course from the NU Core arts/humanities level 1 domain. If the NU Core comparative study of cultures requirement is to be satisfied by taking a course, then it must also be one of the general electives. Note: For this requirement, an arts course is defined to be any course in the NU Core arts/humanities level 1 domain with one of the following subject codes: ARCH, ARTD, ARTE, ARTF, ARTG, ARTH, ARTS, MUSC, MUSI, MUST, or THTR. A humanities course is defined to be any course in the NU Core arts/humanities level 1 domain that is not an arts course.

MAJOR GPA REQUIREMENT
Minimum 2.000 GPA required in all CS and IS courses

NU CORE REQUIREMENTS
See page 26 for requirement list.

COLLEGE REQUIREMENTS FOR BA
Complete the College of Arts and Sciences college requirements for the BA degree, including the three required foreign language courses. See page 41 for requirement list.

GENERAL ELECTIVES
Additional courses taken beyond college and major course requirements to satisfy graduation credit requirements.

COOPERATIVE EDUCATION
UNIVERSITY-WIDE REQUIREMENTS
134 total semester hours required
Minimum 2.000 GPA required

BS/MS in Computer Science
Undergraduate students apply to the combined program through the graduate school. Once admitted, students may count a limited amount of graduate credit toward the undergraduate degree. Consult the department for information on this program.
Minor in Computer Science
The requirements for the minor in computer science are shown below. Students who wish to take a particular course must have taken its prerequisites listed in the catalog. Note: Electrical and computer engineering students should contact the College of Computer and Information Science about course substitutions that ease completion of the minor in computer science.

REQUIRED COURSES
Complete the following two courses with corresponding labs. A grade of C– or higher is required:
- CS 2500 Fundamentals of Computer Science 1 4 SH
  with CS 2501 Lab for CS 2500 1 SH
- CS 2510 Fundamentals of Computer Science 2 4 SH
  with CS 2511 Lab for CS 2510 1 SH

COMPUTER SCIENCE ELECTIVES
Complete three courses from the following list:
- CS 2000 to CS 4989
- IS 4200 Information Retrieval 4 SH
- IS 4300 Human Computer Interaction 4 SH

GPA REQUIREMENT
2.000 GPA required in the minor

INFORMATION SCIENCE
Making the most of information technology—ensuring that it serves the goals and needs of users, clients, and society—is a tremendous challenge, one that requires a unique blend of knowledge and skills. The field of information science (IS) focuses on the relationship between computers, the people who use them, and the contexts in which they operate. IS seeks to further our understanding of: (1) information itself: where it comes from, how it is organized, and how it is used; (2) the design of computer applications that are usable, socially acceptable, and achieve the goals for which they were created; (3) the impact of information technology (IT) on human life and work; and (4) how the nature of the information, the goals of the users, and the relevant social policies and laws both influence and are influenced by the technical aspects of computer systems.

Information science majors have an opportunity to acquire a strong technical foundation by taking classes in mathematics, logic, and computer science and to acquire a strong foundation in behavioral science by taking classes in cognitive psychology, economics, and statistics. A course in the principles of information science introduces students to important intellectual frameworks such as decision theory, general systems theory, and social informatics, and to topics of current importance such as digital copyright, trusted systems, and Internet privacy policy. Building on these foundations, the IS core develops expertise in the design, management, and evaluation of information technology-based resources and systems. Elective courses cover topics such as text/hypertext retrieval, artificial intelligence, information security, e-commerce, and data mining.

COMPUTER SCIENCE COURSES
Computer Science Overview
Freshmen or freshmen transfers complete the following two courses:
- CS 1200 Computer/Information Science Overview 1 1 SH
- CS 1210 Computer/Information Science Overview 2 1 SH

Upper-level transfer students complete the following course:
- CS 1220 Computer/Information Science Co-op Preparation 1 SH

Computer Science Fundamental Courses
Complete the following four courses, with corresponding labs, as indicated. A grade of C– or higher is required in each course:
- CS 1800 Discrete Structures 4 SH
- CS 2500 Fundamentals of Computer Science 1 4 SH
  with CS 2501 Lab for CS 2500 1 SH
- CS 2510 Fundamentals of Computer Science 2 4 SH
  with CS 2511 Lab for CS 2510 1 SH
- CS 2800 Logic and Computation 4 SH
  with CS 2801 Lab for CS 2800 1 SH

Computer Science Required Courses
Complete the following four courses:
- CS 2600 Computer Organization 4 SH
- CS 3200 Database Design 4 SH
- CS 3500 Object-Oriented Design 4 SH
- CS 3600 Systems and Networks 4 SH

INFORMATION SCIENCE COURSES
Required Courses in Information Science
Complete the following five courses:
- IS 2000 Principles of Information Science 4 SH
- IS 3500 Information System Design and Development 4 SH
- IS 4300 Human Computer Interaction 4 SH
- IS 4800 Empirical Research Methods 4 SH
- IS 4900 Information Science Senior Project 5 SH

Managing Information
Complete the following course:
- MISM 3305 Information Resource Management 4 SH

Computers and Society
Complete the following course:
- SOCL 4528 Computers and Society 4 SH

Information Science Electives
Complete two courses from the following list:
- IS 2990 to IS 4993
- CS 2600 Computer Organization 4 SH
- CS 2990 to CS 4993
- ACCT 1209 Financial Accounting and Reporting 4 SH
- ACCT 3403 Accounting Information Systems 4 SH

PSYC 4612 Laboratory in Cognition 4 SH
PSYC 4622 Laboratory in Sensation and Perception 4 SH

MATHEMATICS REQUIREMENTS

Calculus
Complete the following course with a grade of C– or higher:
MATH 1341 Calculus 1 for Science and Engineering 4 SH
or MATH 1340 Intensive Calculus for Engineers 6 SH

Statistics
Complete the following course:
ECON 2350 Statistics 4 SH

BEHAVIORAL SCIENCE FOUNDATIONS

Economics
Complete the following course:
ECON 1116 Principles of Microeconomics 4 SH

Psychology
Complete the following two courses:
PSYC 1101 Foundations of Psychology 4 SH
PSYC 3466 Cognition 4 SH

Organizational Behavior
Complete the following course:
ORGB 3209 Organizational Behavior 4 SH

REQUIRED GENERAL ELECTIVES

Science Electives
One general elective must be a science course chosen from the NU Core science/technology level 1 domain. This course may not be a technology course. Corresponding lab must be taken with lecture where applicable. Note: For this requirement, a science course is defined to be any course in the NU Core science/technology level 1 domain that is not in the College of Computer and Information Science or in the College of Engineering.

Additional General Electives
Complete six additional general electives. One of these electives must be used to satisfy the NU Core arts/humanities level 1 requirement. If the NU Core comparative study of cultures requirement is to be satisfied by taking a course, then it must also be one of the general electives.

MAJOR GPA REQUIREMENT
Minimum 2.000 GPA required in all CS and IS courses

INFORMATION SCIENCE MAJOR CREDIT REQUIREMENT
Complete 73 semester hours in CS and IS for the major.

NU CORE REQUIREMENTS
See page 26 for requirement list.

GENERAL ELECTIVES
Additional courses taken beyond college and major course requirements to satisfy graduation credit requirements.

COOPERATIVE EDUCATION

UNIVERSITY-WIDE REQUIREMENTS
133 total semester hours required

CS 2510 Fundamentals of Computer Science 2 4 SH
with CS 2511 Lab for CS 2510 1 SH
IS 2000 Principles of Information Science 4 SH

INFORMATION SCIENCE ELECTIVES
Complete two courses from the following list:
CS 3200 Database Design 4 SH
IS 2000 to IS 4989

GPA REQUIREMENT
2.000 GPA required in the minor
DUAL MAJORS

The college offers dual majors with business administration, cognitive psychology, biology, mathematics, physics, environmental science, digital art, multimedia studies, and music technology, as well as a dual major in computer science and information science. Each of the dual majors offers the opportunity for intense study in two disciplines with appropriate breadth in the liberal arts. Students take eight to twelve courses in each discipline and two or three integrative courses that bind the disciplines together. These programs offer an excellent educational opportunity for the ambitious student.

COMPUTER SCIENCE COURSES

Computer Science Overview
Freshmen or freshmen transfers complete one of the following sets of courses:

CS 1200 Computer/Information Science 1 SH
with CS 1210 Computer/Information Science Overview 2
or BIOL 1000 Biology/Biochemistry at Northeastern 1 SH
with BIOL 1106 Introduction to Experiential Education 1 SH

Upper-level transfer students complete the following course:

CS 1220 Computer/Information Science Co-op 1 SH
Preparation

Computer Science Fundamental Courses
Complete the following four courses with a grade of C– or higher:

CS 1800 Discrete Structures 4 SH
CS 2500 Fundamentals of Computer Science 1 4 SH
with CS 2501 Lab for CS 2500 1 SH
CS 2510 Fundamentals of Computer Science 2 4 SH

CS 2800 Logic and Computation 4 SH
with CS 2801 Lab for CS 2800 1 SH

Computer Science Required Courses
Complete the following three courses:

CS 3200 Database Design 4 SH
CS 3500 Object-Oriented Design 4 SH
CS 4500 Software Development 4 SH

Senior Seminar
Complete the following course:

CS 4000 Senior Seminar 1 SH

Computer Science Integrative Courses
Complete the following two courses:

CS 3800 Theory of Computation 4 SH
CS 4800 Algorithms and Data 4 SH

BIOLOGY COURSES

Required Biology
Complete one course with corresponding lab for Biology 1, Biology 2, and Genetics and Molecular Biology:

BIOLOGY 1
BIOL 1101 Principles of Biology 1 4 SH
with BIOL 1102 Lab for BIOL 1101 1 SH
BIOL 1111 General Biology 1 4 SH
with BIOL 1112 Lab for BIOL 1111 1 SH

BILOGY 2
BIOL 1103 Principles of Biology 2 4 SH

BIOL 1113 General Biology 2 4 SH
with BIOL 1114 Lab for BIOL 1113 1 SH

GENETICS AND MOLECULAR BIOLOGY
BIOL 2301 Genetics and Molecular Biology 4 SH
with BIOL 2302 Lab for BIOL 2301 1 SH

Biology Capstone
Complete the following course:

BIOL 4701 Biology Capstone 4 SH

Biology Integrative Course
Complete one of the following courses with corresponding lab, as indicated:

BIOL 5521 Experimental Design Marine Ecology 4 SH
with BIOL 5522 Lab for BIOL 5521 1 SH
BIOL 6308 Bio IT Methods 1—Genome and Proteome Analysis 4 SH
BIOL 6309 Bio IT Methods 2—Protein Structure and Systems 4 SH

Intermediate and Advanced Biology Electives
Complete two biology courses (with labs, if offered, 9–10 semester hours total) at level 2311 or above. One course (with corresponding lab, 5 semester hours total) must be from the following list:

BIOL 2311 Ecology 4 SH
with BIOL 2312 Lab for BIOL 2311 1 SH
BIOL 2313 Plant Biology 4 SH
with BIOL 2314 Lab for BIOL 2313 1 SH
BIOL 2315 Invertebrate Zoology 4 SH
with BIOL 2316 Lab for BIOL 2315 1 SH
BIOL 2317 Vertebrate Zoology 4 SH
with BIOL 2318 Lab for BIOL 2317 1 SH
BIOL 2319 Regulatory Cell Biology 4 SH
with BIOL 2320 Lab for BIOL 2319 1 SH
BIOL 2321 Microbiology 4 SH
with BIOL 2322 Lab for BIOL 2321 1 SH
BIOL 2323 Biochemistry 4 SH
with BIOL 2324 Lab for BIOL 2323 1 SH

An additional course (with lab, if offered, 4–5 semester hours total) must be in the following range:

BIOL 2311 to BIOL 4989

Chemistry Courses
Complete the following four courses with corresponding labs:

CHEM 1211 General Chemistry 1 4 SH
with CHEM 1212 Lab for CHEM 1211 1 SH
CHEM 1214 General Chemistry 2 4 SH
with CHEM 1215 Lab for CHEM 1214 1 SH
CHEM 2311 Organic Chemistry 1 4 SH  
with CHEM 2312 Lab for CHEM 2311 1 SH  
CHEM 2313 Organic Chemistry 2 4 SH  
with CHEM 2314 Lab for CHEM 2313 1 SH

**MATHEMATICS REQUIREMENTS**  
Complete the following two calculus courses with a grade of C– or higher, and complete the probability and statistics course:  

**Calculus**  
MATH 1251 Calculus and Differential Equations for Biology 1 4 SH  
MATH 1252 Calculus and Differential Equations for Biology 2 4 SH

**Probability and Statistics**  
MATH 3081 Probability and Statistics 4 SH

**COMPUTERS AND SOCIETY**  
Complete the following course:  
SOCL 4528 Computers and Society 4 SH

**REQUIRED GENERAL ELECTIVES**  
Complete six general electives. One of these electives must be used to satisfy the NU Core arts/humanities level 1 requirement and one must be used to satisfy the NU Core social science level 1 requirement. If the NU Core comparative study of cultures requirement is to be satisfied by taking a course, then it must also be one of the general electives.

CS 2800 Logic and Computation 4 SH  
with CS 2801 Lab for CS 2800 1 SH

**Computer Science Required Courses**  
Complete the following six courses:  
CS 2600 Computer Organization 4 SH  
CS 3200 Database Design 4 SH  
CS 3500 Object-Oriented Design 4 SH  
CS 3600 Systems and Networks 4 SH  
CS 3800 Theory of Computation 4 SH  
CS 4500 Software Development 4 SH

**Computer Science Senior Seminar**  
Complete the following course:  
CS 4000 Senior Seminar 1 SH

**Upper-Division CS/IS Elective**  
Complete one upper-division CS/IS elective. With advisor approval, a directed study, project study, or appropriate graduate-level course may also be taken as a computer science elective:  
CS 3200 to CS 4993  
IS 4200 Information Retrieval 4 SH  
IS 4300 Human Computer Interaction 4 SH

**BUSINESS COURSES**

**Required Business Courses**  
Complete the following seven courses:  
ACCT 1201 Financial Accounting and Reporting 4 SH  
ACCT 2301 Managerial Accounting 4 SH  
FINA 2201 Financial Management 4 SH  
MGSC 1201 Business Statistics 4 SH  
MKTG 2201 Introduction to Marketing 4 SH  
ORGB 3201 Organizational Behavior 4 SH  
STRT 4501 Strategy in Action 4 SH

**BUSINESS CONCENTRATION**  
Complete a four-course business concentration from the following list:

**Concentration in Accounting**  
Complete the following two courses:  
ACCT 3401 Financial Reporting and Analysis 1 4 SH  
ACCT 4501 Financial Reporting and Analysis 2 4 SH  
and two electives from the following list:  
ACCT 3403 Accounting Information Systems 4 SH  
ACCT 3416 Strategic Cost Analysis for Decision Making 4 SH
ACCT 4412 Auditing and Other Assurance Services 4 SH
ACCT 4414 Income Tax Determination and Planning 4 SH

Concentration in Entrepreneurship and Innovation
Complete the following four courses:
ENTR 2201 The Entrepreneurial Universe 4 SH
ENTR 3301 Opportunity Assessment and Entrepreneurship Marketing 4 SH
ENTR 3401 Small Business Management, Operations, and Growth 4 SH
ENTR 4501 Venture Creation and Entrepreneurial Finance 4 SH
or ENTR 4503 Small Business Service and Retail Creation 4 SH

Concentration in Finance
Complete the following two courses:
FINA 3301 Corporate Finance 4 SH
FINA 3303 Investments 4 SH
and two additional FINA courses.

Concentration in Management
Complete the following course:
MGMT 3303 Building Your Management Skills 4 SH
and three additional MGMT courses.

Concentration in Marketing
Complete the following two courses:
MKTG 3301 Marketing Management 4 SH
MKTG 3401 Marketing Research 4 SH
and two additional MKTG courses.

Concentration in Supply Chain Management
Complete the following four courses:
SCHM 2201 Supply Chain Management 4 SH
SCHM 3301 Global Supply Chain Management 4 SH
SCHM 3310 The Transportation Industries 4 SH
SCHM 4401 Advanced Problems in Supply Chain Management 4 SH

INFORMATION RESOURCE MANAGEMENT
Information Resource Management
Complete the following course. Note: MISM 3305 is an integrative course:
MISM 3305 Information Resource Management 4 SH

MATHEMATICS AND GENERAL REQUIREMENTS
Mathematics
Complete one of the following courses:
MATH 1231 Calculus for Business and Economics 4 SH
MATH 1340 Intensive Calculus for Engineers 6 SH
MATH 1341 Calculus 1 for Science and Engineering 4 SH

Economics
Complete the following two courses:
ECON 1115 Principles of Macroeconomics 4 SH
ECON 1116 Principles of Microeconomics 4 SH

Computers and Society
Complete the following course:
SOCL 4528 Computers and Society 4 SH

REQUIRED GENERAL ELECTIVES—CS/IS AND BUSINESS
Complete three general electives. One of these electives must be used to satisfy the NU Core arts/humanities level 1 requirement. If the NU Core comparative study of cultures requirement is to be satisfied by taking a course, then it must also be one of the general electives. Note: Computer science/business administration dual majors may satisfy the latter requirement by completing the following course:
INTB 1203 International Business and Global Social Responsibility 4 SH

MAJOR GPA REQUIREMENT
Minimum 2.000 GPA required in all CS and IS courses

NU CORE REQUIREMENTS
See page 26 for requirement list.

GENERAL ELECTIVES
Additional courses taken beyond college and major course requirements to satisfy graduation credit requirements.

COOPERATIVE EDUCATION
UNIVERSITY-WIDE REQUIREMENTS

College of Computer and Information Science

CS 2510 Fundamentals of Computer Science 2 4 SH
with CS 2511 Lab for CS 2510 1 SH
CS 2800 Logic and Computation 4 SH
with CS 2801 Lab for CS 2800 1 SH

**Computer Science Required Courses**
Complete the following five courses:
- CS 3500 Object-Oriented Design 4 SH
- CS 3800 Theory of Computation 4 SH
- CS 4100 Artificial Intelligence 4 SH
- CS 4500 Software Development 4 SH
- IS 4300 Human Computer Interaction 4 SH

**Computer Science Senior Seminar**
Complete the following course:
- CS 4000 Senior Seminar 1 SH

**Computer Science Elective Courses**
Complete two upper-division computer science courses. With advisor approval, directed study, project study, and appropriate graduate-level courses may also be taken as computer science electives:
- CS 2600 Computer Organization 4 SH
- CS 3200 to CS 4993
- IS 4200 Information Retrieval 4 SH

**PSYCHOLOGY COURSES**

**Required Courses**
Complete the following four courses:
- PSYC 1101 Foundations of Psychology 4 SH
- PSYC 2320 Statistics in Psychological Research 4 SH
- PSYC 3464 Psychology of Language 4 SH
- PSYC 3466 Cognition 4 SH

**Advanced Psychology**
Complete one course from the following list:
- PSYC 3452 Sensation and Perception 4 SH
- PSYC 3458 Psychobiology 4 SH

**Laboratory in Psychology**
Complete one course from the following list:
- PSYC 4610 Laboratory in Psycholinguistics 4 SH
- PSYC 4612 Laboratory in Cognition 4 SH
- PSYC 4622 Laboratory in Sensation and Perception 4 SH

**Seminar in Psychology**
Complete one course from the following list:
- PSYC 4658 Seminar in Psycholinguistics 4 SH
- PSYC 4660 Seminar in Cognition 4 SH
- PSYC 4668 Seminar in Sensation and Perception 4 SH

**Psychology Electives**
Complete two courses from the following list: *Note: Courses satisfying the categories above cannot be reused:*
- PSYC 3402 Social Psychology 4 SH
- PSYC 3450 Learning and Motivation 4 SH
- PSYC 3452 Sensation and Perception 4 SH
- PSYC 3458 Psychobiology 4 SH
- PSYC 3526 Categorization and Reasoning 4 SH

- PSYC 4520 Language and the Brain 4 SH
- PSYC 4522 Psychology of Reading 4 SH
- PSYC 4524 Cognitive Development 4 SH
- PSYC 4610 Laboratory in Psycholinguistics 4 SH
- PSYC 4612 Laboratory in Cognition 4 SH
- PSYC 4622 Laboratory in Sensation and Perception 4 SH
- PSYC 4652 Seminar in Ethics in Psychology 4 SH
- PSYC 4658 Seminar in Psycholinguistics 4 SH
- PSYC 4660 Seminar in Cognition 4 SH
- PSYC 4668 Seminar in Sensation and Perception 4 SH
- PSYC 4970 Junior/Senior Honors Project 1 4 SH
  with PSYC 4971 Junior/Senior Honors Project 2 4 SH

**ADDITIONAL REQUIREMENTS**

**Calculus**
Complete the following course:
- MATH 1341 Calculus 1 for Science and Engineering 4 SH

**Computers and Society**
Complete the following course:

**REQUIRED GENERAL ELECTIVES**
Complete eight general electives. One of these electives must be used to satisfy the NU Core arts/humanities level 1 requirement. If the NU Core comparative study of cultures requirement is to be satisfied by taking a course, then it must also be one of the general electives.

**MAJOR GPA REQUIREMENT**
Minimum 2.000 GPA required in all CS and IS courses

**NU CORE REQUIREMENTS**
See page 26 for requirement list.

**GENERAL ELECTIVES**
Additional courses taken beyond college and major course requirements to satisfy graduation credit requirements.

**COOPERATIVE EDUCATION**

**UNIVERSITY-WIDE REQUIREMENTS**
133 total semester hours required
Minimum 2.000 GPA required

**BS in Computer Science and Digital Art**

**COMPUTER SCIENCE COURSES**

**Computer Science Overview**
Freshmen or freshmen transfers complete the following two courses:
- CS 1200 Computer/Information Science 1 SH Overview 1
- CS 1210 Computer/Information Science 1 SH Overview 2
Upper-level transfer students complete the following course:

CS 1220  Computer/Information Science Co-op  1 SH

Preparation

Computer Science Fundamental Courses
Complete the following four courses with corresponding labs, as indicated. A grade of C– or higher is required in each course:

CS 1800  Discrete Structures  4 SH

with CS 2501  Lab for CS 2500  1 SH

CS 2500  Fundamentals of Computer Science 1  4 SH

CS 2510  Fundamentals of Computer Science 2  4 SH

with CS 2511  Lab for CS 2510  1 SH

CS 2800  Logic and Computation  4 SH

with CS 2801  Lab for CS 2800  1 SH

Computer Science Required Courses
Complete the following four courses:

CS 3200  Database Design  4 SH

CS 3500  Object-Oriented Design  4 SH

CS 3800  Theory of Computation  4 SH

CS 4500  Software Development  4 SH

Computer Science Senior Seminar
Complete the following course:

CS 4000  Senior Seminar  1 SH

Integrative Courses
Complete the following two courses:

CS 4300  Computer Graphics  4 SH

IS 4300  Human Computer Interaction  4 SH

Computer Science Elective Courses
Complete two upper-division computer science courses. With advisor approval, directed study, project study, and appropriate graduate-level courses may also be taken as computer science electives:

CS 2600  Computer Organization  4 SH

CS 3200 to CS 4993

IS 4200  Information Retrieval  4 SH

DIGITAL ART COURSES

Required Digital Art Courses
Complete the following four courses with corresponding tools courses, as indicated:

ARTF 1122  2D Foundation  4 SH

with ARTF 1123  2D Tools: Imaging Basics  1 SH

ARTF 1124  3D Foundation  4 SH

with ARTF 1125  3D Tools: Form Basics  1 SH

ARTF 2220  4D Foundation  4 SH

with ARTF 2221  4D Tools: Motion Basics  1 SH

ARTF 2223  Interactive Foundation  4 SH

with ARTF 2224  Interactive Tools  1 SH

Digital Art Electives
Complete six courses with corresponding tools courses, as indicated, from the six categories below. Normally, students are expected to complete all prerequisites for courses they wish to take. For exceptions based on some form of alternate experience, seek permission of instructor:

ARTD 4530  Contemporary Directions in Digital Art

Digital Art Capstone Requirement
Complete the following course:

ARTD 4670  Digital Art Degree Project  4 SH

GENERAL REQUIREMENTS

Social Science Level 1
Complete the following course, which satisfies the NU Core social science level 1 requirement:

PSYC 1101  Foundations of Psychology  4 SH

Mathematics
Complete the following course:

MATH 2331  Linear Algebra  4 SH

Computers and Society
Complete the following course:

SOCL 4528  Computers and Society  4 SH

REQUIRED GENERAL ELECTIVES
Complete four general electives. If the NU Core comparative study of cultures requirement is to be satisfied by taking a course, then it must be one of the general electives.

MAJOR GPA REQUIREMENT
Minimum 2.000 GPA required in all CS and IS courses

NU CORE REQUIREMENTS
See page 26 for requirement list.

COMPUTER SCIENCE COURSES

Computer Science Overview
Freshmen or freshmen transfers complete the following two courses:
CS 1200 Computer/Information Science 1 SH
CS 1210 Computer/Information Science 1 SH

Upper-level transfer students complete the following course:
CS 1220 Computer/Information Science Co-op Preparation 1 SH

Computer Science Fundamental Courses
Complete the following four courses with corresponding labs, as indicated. A grade of C– or higher is required in each course:
CS 1800 Discrete Structures 4 SH
with CS 1801 Recitation for CS 1800 0 SH
CS 2500 Fundamentals of Computer Science 1 4 SH
with CS 2501 Lab for CS 2500 1 SH
CS 2510 Fundamentals of Computer Science 2 4 SH
with CS 2511 Lab for CS 2510 1 SH
CS 2800 Logic and Computation 4 SH
with CS 2801 Lab for CS 2800 1 SH

Computer Science Required Courses
Complete the following five courses:
CS 3200 Database Design 4 SH
CS 3500 Object-Oriented Design 4 SH
CS 3800 Theory of Computation 4 SH
CS 4500 Software Development 4 SH
IS 4800 Empirical Research Methods 4 SH

Computer Science Senior Seminar
Complete the following course:
CS 4000 Senior Seminar 1 SH

ENVIRONMENTAL SCIENCE COURSES

Environmental Science Required Courses
Complete the following four courses with corresponding labs, as indicated:
ENVR 1200 Dynamic Earth 4 SH
with ENVR 1201 Lab for ENVR 1200 1 SH
ENVR 1202 History of Earth and Life 4 SH
with ENVR 1203 Interpreting Earth History 1 SH
or ENVR 2310 Earth Materials 4 SH
with ENVR 2311 Lab for ENVR 2310 1 SH
ENVR 4900 Earth and Environmental Science Capstone 1 SH
ENVR 5210 Environmental Planning 4 SH
or ENVR 5250 Geology and Land-Use Planning 4 SH

Environmental Science Integrative Courses
Complete at least two of the following courses. If the course has a corresponding lab, the lab must also be completed:
ENVR 3300 Geographic Information Systems 4 SH
with ENVR 3301 Lab for ENVR 3300 1 SH
ENVR 3302 Introduction to Remote Sensing 4 SH
with ENVR 3303 Lab for ENVR 3302 1 SH
ENVR 3418 Geophysics 4 SH
ENVR 4500 Applied Hydrogeology 4 SH
with ENVR 4501 Lab for ENVR 4500 1 SH
ENVR 5280 Groundwater Modeling 4 SH

Environmental Science Electives
Complete four courses. If a course has a corresponding lab, the lab must also be completed. If you complete more than two courses from the environmental science integrative courses (above), these courses count as environmental science electives:
ENVR 1101 Environmental Science 4 SH
ENVR 2340 Earth Landforms and Processes 4 SH
with ENVR 2341 Lab for ENVR 2340 1 SH
ENVR 3400 Field Geology 4 SH
ENVR 3410 Environmental Geochemistry 4 SH
ENVR 4106 Coastal Processes 4 SH
with ENVR 4107 Lab for ENVR 4106 1 SH
ENVR 4504 Environmental Pollution 4 SH
ENVR 4505 Wetlands 4 SH
ENVR 4563 Advanced Spatial Analysis 4 SH
ENVR 5190 Soil Science 4 SH
ENVR 5201 Geologic Field Seminar 4 SH
ENVR 5230 Structural Geology 4 SH
with ENVR 5231 Lab for ENVR 5230 1 SH
ENVR 5240 Sedimentary Basin Analysis 4 SH
with ENVR 5241 Lab for ENVR 5240 1 SH
ENVR 5242 Ancient Marine Life 4 SH
with ENVR 5243 Lab for ENVR 5242 1 SH
ENVR 5244 Sedimentation 4 SH
ENVR 5248 Marine Geology 4 SH
ENVR 5270 Glacial and Quaternary History 4 SH
with ENVR 5271 Lab for ENVR 5270 1 SH
ENVR 5282 Groundwater Geochemistry 4 SH
INTL 4937 Dialogue of Civilizations: Science and Technology 4 SH

ADDITIONAL REQUIREMENTS

Calculus
Complete the following two courses:
MATH 1251 Calculus and Differential Equations for Biology 1 4 SH
or MATH 1341 Calculus 1 for Science and Engineering 4 SH
Academic Programs and Curriculum Guide

NORTHEASTERN UNIVERSITY

MATH 1252 Calculus and Differential Equations 4 SH
for Biology 2

or MATH 1342 Calculus 2 for Science and Engineering 4 SH

Chemistry
Complete the following two courses with corresponding labs:
CHEM 1211 General Chemistry 1 4 SH
with CHEM 1212 Lab for CHEM 1211 1 SH
CHEM 1214 General Chemistry 2 4 SH
with CHEM 1215 Lab for CHEM 1214 1 SH

COMPUTER SCIENCE COURSES

Computer Science Overview
Freshmen or freshmen transfers complete the following two courses:
CS 1200 Computer/Information Science 1 SH
Overview 1
CS 1210 Computer/Information Science 1 SH
Overview 2
Upper-level transfer students complete the following course:

**CS 1220** Computer/Information Science Co-op 1 SH

**Preparation**

**Computer Science Fundamental Courses**
Complete the following four courses with corresponding labs, as indicated. A grade of C– or higher is required in each course:

- **CS 1800** Discrete Structures 4 SH
- **CS 2500** Fundamentals of Computer Science 1 4 SH with **CS 2501** Lab for CS 2500 1 SH
- **CS 2510** Fundamentals of Computer Science 2 4 SH with **CS 2511** Lab for CS 2510 1 SH
- **CS 2800** Logic and Computation 4 SH with **CS 2801** Lab for CS 2800 1 SH

Complete the following course:

- **CS 4000** Senior Seminar 1 SH

**Computer Science Integrative Course**
Complete the following course:

- **IS 4300** Human Computer Interaction 4 SH

**Computer Science Elective Courses**
Complete two upper-division computer science courses. With advisor approval, directed study, project study, and appropriate graduate-level courses may also be taken as computer science electives:

- **CS 2600** Computer Organization 4 SH
- **CS 3200** to CS 4993
- **IS 4200** Information Retrieval 4 SH

**MUSIC TECHNOLOGY COURSES**

**Music Theory**
Complete the following two courses. Music Theory and Musicianship should be taken concurrently, as indicated:

- **MUSC 1201** Music Theory 1 4 SH
- **with MUSC 1241** Musicianship 1 1 SH
- **MUSC 1202** Music Theory 2 4 SH
- **with MUSC 1242** Musicianship 2 1 SH

**Music Literature and History**
Complete the following two courses. *Note:* MUSC 2308 is a prerequisite to MUST 2315:

- **MUSC 2308** Principles of Music Literature 4 SH
- **MUST 2315** History of Electronic Music 4 SH

**Music Technology**
Complete the following four courses in the order indicated:

- **MUST 1220** Music and Technology 1 4 SH
- **MUST 1221** Music and Technology 2 4 SH
- **MUST 3422** Music Composition Seminar 2 4 SH
- **MUST 4520** Interactive Real-Time Performance 4 SH

**Electronic Composition and Performance**
Complete the following two courses in the order indicated:

- **MUST 4610** Composition for Electronic Instruments 4 SH
- **MUST 4611** Music Technology Capstone/Senior Recital 4 SH

**Music Technology Integrative Course**
Complete the following course:

- **MUST 3421** Digital Audio Processing 4 SH

**Music Lessons**
Complete the following (repeatable) course four times:

- **MUSC 1903** Composition Lessons 1 SH

**Music Elective Requirements**
Complete two additional courses from the following list with corresponding musicianship courses, as indicated. *Note:* MUSC 2303 is a prerequisite for MUSC 2304; MUSC 2308 is a prerequisite for MUSC 2311, MUSC 2312, and MUSC 2313:

- **IDSC 4699** Advanced Television Production 4 SH
- **MMST 3350** Programming for Multimedia 4 SH
- **MUSC 2303** Music Theory 3 4 SH
- **with MUSC 2343** Musicianship 3 1 SH
- **MUSC 2304** Music Theory 4 4 SH
- **with MUSC 2344** Musicianship 4 1 SH
- **MUSC 2311** Historical Traditions 1: America 4 SH
- **MUSC 2312** Historical Traditions 2: Classical 4 SH
- **MUSC 2313** Historical Traditions 3: World 4 SH
- **MUSI 2233** Music Production for Radio and Web 4 SH
- **MUST 2320** Sound Design 4 SH

**GENERAL REQUIREMENTS**

**Foundations of Psychology**
Complete the following course:

- **PSYC 1101** Foundations of Psychology 4 SH

**Computers and Society**
Complete the following course:

- **SOCL 4528** Computers and Society 4 SH

**REQUIRED GENERAL ELECTIVES**
Complete four general electives. If the NU Core comparative study of cultures requirement is to be satisfied by taking a course, then it must be one of the general electives.

**MAJOR GPA REQUIREMENT**
Minimum 2.000 GPA required in all CS and IS courses

**NU CORE REQUIREMENTS**
See page 26 for requirement list.

**GENERAL ELECTIVES**
Additional courses taken beyond college and major course requirements to satisfy graduation credit requirements.

**COOPERATIVE EDUCATION**

**UNIVERSITY-WIDE REQUIREMENTS**
139 total semester hours required
Minimum 2.000 GPA required
BS in Computer Science and Physics

COMPUTER SCIENCE COURSES

Computer Science Overview
Freshmen or freshmen transfers complete the following two courses:

- CS 1200 Computer/Information Science Overview 1 1 SH
- CS 1210 Computer/Information Science Overview 2 1 SH

Upper-level transfer students complete the following course:

- CS 1220 Computer/Information Science Co-op Preparation 1 SH

Computer Science Fundamental Courses
Complete the following four courses with corresponding labs, as indicated. A grade of C– or higher is required in each course:

- CS 1800 Discrete Structures 4 SH
- CS 2500 Fundamentals of Computer Science 1 4 SH
  with CS 2501 Lab for CS 2500 1 SH
- CS 2510 Fundamentals of Computer Science 2 4 SH
  with CS 2511 Lab for CS 2510 1 SH
- CS 2800 Logic and Computation 4 SH
  with CS 2801 Lab for CS 2800 1 SH

Computer Science Required Courses
Complete the following four courses:

- CS 3500 Object-Oriented Design 4 SH
- CS 3800 Theory of Computation 4 SH
- CS 4500 Software Development 4 SH
- CS 4800 Algorithms and Data 4 SH

Computer Science Senior Seminar
Complete the following course:

- CS 4000 Senior Seminar 1 SH

Computer Science Elective Course
Complete one upper-division computer science course. Either this course or one physics elective must satisfy the NU Core capstone requirement. With advisor approval, a directed study, project study, or appropriate graduate-level course may also be taken as a computer science elective:

- CS 2600 Computer Organization 4 SH
- CS 3200 to CS 4993
- IS 4200 Information Retrieval 4 SH
- IS 4300 Human Computer Interaction 4 SH

PHYSICS COURSES

Required Courses
Complete the following two courses with corresponding labs:

- PHYS 1161 Physics 1 4 SH
  with PHYS 1162 Lab for PHYS 1161 1 SH
- PHYS 1165 Physics 2 4 SH
  with PHYS 1166 Lab for PHYS 1165 1 SH

Intermediate Physics
Complete the following three courses:

- PHYS 2303 Modern Physics 4 SH
- PHYS 2305 Thermodynamics and Statistical Mechanics 4 SH
- PHYS 2371 Electronics 4 SH

Advanced Physics
Complete the following two courses:

- PHYS 3600 Advanced Physics Laboratory 1 4 SH
- PHYS 3602 Electricity and Magnetism 4 SH

Physics Elective
Complete two upper-division courses from the physics department. One of these courses or one computer science elective must satisfy the NU Core capstone requirement:

- PHYS 2990 to PHYS 9999

MATHEMATICS INTEGRATIVE COURSES

Calculus
Complete the following three courses with a grade of C– or higher in MATH 1341 and MATH 1342:

- MATH 1341 Calculus 1 for Science and Engineering 4 SH
- MATH 1342 Calculus 2 for Science and Engineering 4 SH
- MATH 2321 Calculus 3 for Science and Engineering 4 SH

Additional Math Requirements
Complete the following two courses:

- MATH 2351 Ordinary Differential Equations 4 SH
- MATH 4525 Applied Analysis 4 SH

COMPUTERS AND SOCIETY

Complete the following course:

- SOCL 4528 Computers and Society 4 SH

REQUIRED GENERAL ELECTIVES
Complete six general electives. One of these electives must be used to satisfy the NU Core arts/humanities level 1 requirement and one must be used to satisfy the NU Core social science level 1 requirement. If the NU Core comparative study of cultures requirement is to be satisfied by taking a course, then it must also be one of the general electives.

MAJOR GPA REQUIREMENT
Minimum 2.000 GPA required in all CS and IS courses

NU CORE REQUIREMENTS
See page 26 for requirement list.

GENERAL ELECTIVES
Additional courses taken beyond college and major course requirements to satisfy graduation credit requirements.

Complete three additional MGMT courses.
**Concentration in Marketing**

**MARKETING REQUIRED COURSES**
Complete the following two courses:
- MKTG 3301 Marketing Management 4 SH
- MKTG 3401 Marketing Research 4 SH

**MARKETING ELECTIVE COURSES**
Complete two additional MKTG courses.

**Concentration in Supply Chain Management**
Complete the following four courses:
- SCHM 2201 Supply Chain Management 4 SH
- SCHM 3301 Global Supply Chain Management 4 SH
- SCHM 3310 The Transportation Industries 4 SH
- SCHM 4401 Advanced Problems in Supply Chain Management 4 SH

**MATHEMATICS AND GENERAL REQUIREMENTS**

**Mathematics**
Complete one of the following courses:
- MATH 1231 Calculus for Business and Economics 4 SH
- MATH 1341 Calculus 1 for Science and Engineering 4 SH

**Economics**
Complete the following two courses:
- ECON 1115 Principles of Macroeconomics 4 SH
- ECON 1116 Principles of Microeconomics 4 SH

**Computers and Society**
Complete the following course:
- SOCL 4528 Computers and Society 4 SH

**REQUIRED GENERAL ELECTIVES**
Complete three general electives. One of these electives must be used to satisfy the NU Core arts/humanities level 1 requirement. If the NU Core comparative study of cultures requirement is to be satisfied by taking a course, then it must also be one of the general electives. *Note:* Computer science/business administration and information science/business administration dual majors may satisfy the latter requirement by completing the following course:
- INTB 1203 International Business and Global Social Responsibility 4 SH

**MAJOR GPA REQUIREMENT**
Minimum 2.00 GPA required in all CS and IS courses

**NU CORE REQUIREMENTS**
See page 26 for requirement list.

College of Criminal Justice

The College of Criminal Justice was established in 1967 as one of the first schools of its kind devoted to matters of crime and justice. Since its founding, the college has become a leading force in education, research, and policymaking in both the public and private sectors of the criminal justice field.

The College of Criminal Justice seeks to prepare students for professional and research careers in criminal justice, criminology, and related fields by applying multidisciplinary and comparative social science to understand, predict, and explain crime and contribute to the development of public policy. Using an active learning approach, the college seeks to develop its students intellectually and ethically, while providing them with a keen appreciation of the complexities of crime, and of the public and private efforts to make communities safer and ensure justice.

The world of criminal justice is much more than the police officer, corrections official, criminal defense lawyer, or security and loss prevention personnel. At the College of Criminal Justice, the boundaries of criminal justice have expanded beyond traditional views of the field to include emphases on law and justice, organizations and leadership, global criminology, and crime policy. Criminal justice education today is about more than the criminal; it involves understanding the victim and the community: repairing harm, reducing fear, rebuilding safe communities, and assuring justice in spirit and act.

The College of Criminal Justice has had a long-standing attachment and commitment to improving justice system agencies, including private security. The college actively engages external partners in an ongoing conversation about research, community service, and salient policy questions. Part of this dialogue is supported by an ongoing program of applied and social science research. Much of this research focuses on evaluating existing government crime-control programs and policies to determine whether they work, as well as inquiries about the etiology and prevention of crime. In addition, much of our research examines the unintended consequences of policy: institutionalized racism, exclusion of certain groups, and so forth. In every case, the research conducted at Northeastern is approached with ethical sensitivity and scientific rigor.

Criminal justice and criminology, as social sciences, began in the early part of the twentieth century. Nearly one hundred years old, the criminal justice field has blossomed in large part through the ingenuity of several notable scholars. The College of Criminal Justice is pleased to be home to many of the country’s preeminent contemporary scholars. CCJ faculty members regularly present at scholarly conferences, national and international seminars, and to policymakers worldwide.

Academic Progression Standards

Students are required to maintain the following overall grade-point average and minimum earned semester hours to advance to the next class standing and to graduate.

Graduation Requirements

Degree candidates must complete all prescribed work, a total of 132 semester hours of credit. Students are also urged to meet the requirements of the Department of Cooperative Education.

Transfer Credit

A student transferring from another college or university must be in residence at Northeastern at least 32 of the final 40 semester hours to receive a degree.

BS in Criminal Justice

BREADTH COURSES FOR CRIMINAL JUSTICE

Computer Science

Complete the following course:

CS 1100  Computer Science and Its Applications  4 SH

Mathematics

Complete the following course:

MATH 1215  Mathematical Thinking  4 SH
Psychology
Complete the following course:
PSYC 1101 Foundations of Psychology 4 SH

Sociology
Complete the following course:
SOCL 1101 Introduction to Sociology 4 SH

CRIMINAL JUSTICE SEQUENCE REQUIREMENT
AND REQUIRED ELECTIVES OUTSIDE CRIMINAL JUSTICE
44 semester hours must be earned from the combination of the criminal justice sequence requirement and required electives outside criminal justice.

Criminal Justice Sequence Requirement
Complete three courses from the same department, two of which must be at the 2000-level or above.

Required Electives Outside Criminal Justice
Complete courses in departments outside criminal justice such that 44 semester hours are earned from the combination of these courses and the criminal justice sequence requirement.

CRIMINAL JUSTICE MAJOR REQUIREMENTS
Criminal Justice Core Requirements
Complete the following five courses:
CRIM 1100 Introduction to Criminal Justice 4 SH
CRIM 2100 Criminal Due Process 4 SH
CRIM 2200 Criminology 4 SH
CRIM 3600 Criminal Justice Research Methods 4 SH
CRIM 3700 Criminal Justice Statistics 4 SH

**GPA REQUIREMENT**

2.000 GPA required in the minor
The mission of the College of Engineering is to provide a teaching, learning, and research environment that results in the highest-quality education for our students. Consistent with our goal of providing the highest-quality, practice-oriented program, the College of Engineering seeks to prepare students to contribute to the accumulation and application of technical knowledge. The college further seeks to help students master the fundamental mathematical and scientific principles underlying a particular branch of engineering; develop and demonstrate competence in analysis and design appropriate to an engineering specialization; reason clearly and communicate effectively; and recognize the need to continue professional development.

Through laboratory exercises, senior design projects, professional association activities, and cooperative work assignments, students put theory into practice and clarify their professional goals.

The college offers a Bachelor of Science degree with specializations in chemical, civil, computer, electrical, industrial, and mechanical engineering. The five-year Bachelor of Science degree program, which includes eighteen months of cooperative education work experience, is the standard and most popular program. Four-year programs with and without co-op experience are also available.

The college encourages students to study the arts, sciences, business, and other areas outside of engineering, for they provide an awareness of the social, economic, political, aesthetic, and philosophical influences that shape the world in which graduates will practice their professions. Students may complete a minor in areas such as business, computer science, biomedical engineering, math, or music. In many cases, the minor can be completed without course overloads.

In addition to a full array of University services, special advising and other support services (including tutoring) are provided. Students may qualify to participate in honors sections of many courses. Active student chapters of many national professional engineering organizations and honor societies are supported by the college as an enriching addition to academic studies and co-op experience.

The Bachelor of Science degree programs with specification in chemical, civil, electrical, industrial, and mechanical engineering are accredited by the Engineering Accreditation Commission of ABET, 111 Market Place, Suite 1050, Baltimore, MD 21202-4012, telephone 410.347.7700.

Bachelor of Science/Master of Science Joint-Degree Program

The Departments of Electrical and Computer Engineering, Mechanical and Industrial Engineering, and Civil and Environmental Engineering offer programs leading to both the bachelor’s and master’s degrees in five years. All students begin with the common first-year engineering program. Upon successful completion, students may petition to enter the BS/MS Program. Degree candidates must maintain a 3.400 cumulative GPA, carry extra courses, and reduce the number of cooperative education semesters to complete the course requirements.
Academic Standards

ACADEMIC PROGRESSION STANDARDS
In addition to meeting University progression standards, it is expected that full-time engineering students enroll in four courses with appropriate labs and successfully complete at least 12 semester hours each academic semester with an acceptable GPA as noted below. Any exceptions to the course load requirement must be approved by the student’s academic advisor, in writing, prior to the start of each semester.

GPA REQUIREMENTS FOR GRADUATION
A minimum cumulative GPA requirement of 2.000 in major (department) courses and a minimum cumulative GPA requirement of 2.000 overall is required for graduation.

CRITERIA FOR ACADEMIC PROBATION
Full-time students in the College of Engineering will be placed on academic probation effective for the following academic semester for any of the reasons noted below:

First-year Students:
• Not maintaining an overall cumulative GPA of at least 1.800 or not earning at least 24 semester hours at the end of the two semesters of the first-year curriculum, or
• Not earning at least 12 semester hours in the second academic semester.

Upperclass and Transfer Students:
• Not earning at least 12 semester hours in the full semester just completed, or
• Not maintaining an overall cumulative GPA of at least 2.000 at the end of each full academic semester, or
• Not maintaining a GPA of at least 2.000 in major at the end of the fourth full academic semester of the curriculum and at the end of each full academic semester thereafter, or
• Not maintaining satisfactory progress through the curriculum by:
  − Accumulating three outstanding course deficiencies (grades of F, I, W, NE, U, * or missing grades), or
  − Earning a current full-semester GPA of 1.600 or lower, or
  − Not following a program of study approved by the student’s academic advisor.

A notation of the academic probation action will appear on the internal record but not on the permanent transcript.

CRITERIA FOR ACADEMIC DISMISSAL
Full-time students on probation in the College of Engineering are eligible for academic dismissal from the University for any of the reasons noted below:

• Not following a program of study approved by the student’s academic advisor
• Remaining on academic probation after two full academic semesters

Notation of this academic dismissal will appear on the permanent transcript.

GRADUATION REQUIREMENTS
The college reserves the right to amend programs, courses, and degree requirements to fulfill its educational responsibility to respond to relevant changes in the field.

Students must complete all of the requirements in the degree program in which they are candidates. Degree requirements are based upon the year of graduation, determined by the date of entry or reentry into the College of Engineering. Degree requirements and the year of graduation for a degree candidate who fails to make normal academic progress will be subject to review and possible change.

INTERDISCIPLINARY MINOR

Materials Science and Engineering
The study of materials science and engineering has spurred breakthroughs in applications ranging from artificial limbs and organs, to space travel vehicles, to personal MP3 players. For example, the discovery of buckyballs and carbon nanotubes has led to the development of an unprecedented reduction in size of prototype electronic components and points the way to tomorrow’s electronic technologies. Porous nanostructures of biocompatible materials are studied for targeted drug delivery within the body. The integration of polymers and semiconductors is used to create efficient, usable solar cells to reduce our dependence on fossil fuels. There are many more examples of both existing technologies and current research areas involving materials science and engineering that impact everyday life both today and in the future.

The minor in materials science and engineering is open to all students of the College of Engineering whose science and technical interests involve the design, processing, and optimization of engineering materials. Since the materials interests may vary across the engineering disciplines, the minor is composed of an interdisciplinary selection of courses that offer a high degree of flexibility to the student. The fundamental goals of the program are to offer the students a broad interdisciplinary program that includes a basic background in the relevant aspects of materials science and the engineering applications of materials. The objectives are to serve the needs of the chemical, civil, electrical, and mechanical engineering departments in providing a vehicle to expose students to materials science and engineering. Particular focus areas include: electronic materials and processing for device

GPA REQUIREMENT
2.000 GPA required in the minor

The chemical engineering program offers students a broad education built on fundamentals in science, mathematics, and engineering, which are then applied to a variety of contemporary problems using modern tools, such as computational software and computer-aided design. Chemical engineers have traditionally been employed in chemical, petrochemical, agricultural chemicals, pulp and paper, plastics, cosmetics, and textiles industries and in consulting and design firms. Today, chemical engineers also play an integral role in emerging biological and advanced materials fields, including nanotechnology. For example, chemical engineers are creating new materials needed for space exploration, alternative energy sources, and faster, self-powered computer chips. In biotechnology and bioengineering, chemical engineers are working to understand human diseases, developing new therapies and drug delivery systems, and producing new medicines through cell culture techniques. Chemical engineers employ nanotechnology to revolutionize sensors, security systems, and medical diagnostics and treatments. In addition to creating important products, chemical engineers are also involved in protecting our environment by exploring ways to reduce acid rain and smog, to recycle and reduce wastes, to develop new sources of environmentally clean energy, and to design inherently safe, efficient, and “green” processes. The role of chemical engineers is to develop new products and to design the processes while reducing costs, increasing production, and improving the quality and safety of new products.

The educational objectives of the chemical engineering program are that all students will develop and apply: (1) a fundamental knowledge and understanding of the underlying science, mathematics, and engineering subjects needed to function effectively and efficiently in the many fields of chemical engineering practice; (2) an ability to identify problems, to identify, acquire, and critically analyze needed information and data, to draw appropriate conclusions, and to make decisions based on those conclusions; (3) interpersonal and communicative skills to function effectively in a diverse workplace and work confidently and effectively within intra- and interdisciplinary work groups; and (4) an ability to incorporate practice-based and information-based knowledge of contemporary societal issues and ethical and professional responsibilities as part of engineering solutions and business activities.
The faculty of the chemical engineering program is committed to providing a practice-oriented education through active learning and by drawing connections between classroom learning and co-op experiences. The educational curriculum provides fundamentals in mathematics, physical sciences, and engineering science as well as real-world design and laboratory experiences. Through the University’s general education requirements, students gain awareness of the impact of engineering decisions in a broader societal and ethical context. Cooperative education offers students the opportunity to integrate practical workplace knowledge with classroom learning so the educational experiences are synergistic and deepen the learning process. The chemical engineering community encourages professional development through active participation and leadership in student organizations, professional societies, and departmental activities. As a result, the chemical engineering program prepares successful students for industrial careers, graduate programs, or professional medical, law, and business schools.

Through faculty expertise and scholarship, a rigorous set of academic courses, and real-world cooperative education experiences, the chemical engineering program seeks to enable students to identify and solve chemical engineering problems; understand, analyze, and design chemical processes; be proficient in the use of modern engineering tools; be proficient in oral and written communication of their work and ideas; become independent learners and workers; participate effectively in intradisciplinary and interdisciplinary groups; design and perform laboratory experiments to acquire data and evaluate theories; understand the environmental and safety impact of their work as chemical engineers; understand the global and societal impact of engineering problems and solutions; understand professional behavior, culture, expectations, and contemporary issues; conduct themselves in accordance with the highest ethical and professional standards; and be prepared for lifelong learning and continuing education.

The chemical engineering curriculum shown below is periodically evaluated and revised to ensure that graduates of the program are given every opportunity for future success as professional chemical engineers and are prepared for graduate or professional school.

GPA REQUIREMENT
2.000 GPA required in the minor
and participation in the activities of the award-winning student chapter of the American Society of Civil Engineers help students meet this goal.

The civil engineering program is designed to provide students with a broad education appropriate for a variety of career choices and lifelong learning. Experience tells us that civil engineering graduates will enter almost every field imaginable. The knowledge and skills acquired—understanding science, critical thinking, effective communication, and understanding the social context, among them—form an excellent foundation for a host of careers, as well as for a fulfilling life outside the world of work. The civil engineering program has been designed with five general electives that permit students to explore or acquire further depth in other fields of interest. Students can use these electives to earn a minor in business, architectural history, music, computer science, or any number of other fields.

The co-op program parallels the academic program in level of responsibility and sophistication. A beginning job might involve layout at a construction site or laboratory testing; in senior-level co-op assignments, students are often working alongside engineers on design teams.

**BSCE—Bachelor of Science in Civil Engineering**

**MATHEMATICS/SCIENCE REQUIREMENT**

Complete 34 semester hours in mathematics and science as indicated below.

**Required Mathematics/Science**

Complete each of the following courses, with corresponding labs, as indicated:

- CHEM 1151 General Chemistry for Engineers 4 SH
- or CHEM 1211 General Chemistry 1 4 SH
- or CHEM 1214 General Chemistry 2 4 SH
- MATH 1341 Calculus 1 for Science and Engineering 4 SH
- MATH 1342 Calculus 2 for Science and Engineering 4 SH
- MATH 2321 Calculus 3 for Science and Engineering 4 SH
- MATH 2341 Differential Equations and Linear Algebra for Engineering 4 SH
- PHYS 1151 Physics for Engineering 1 4 SH
- with PHYS 1152 Lab for PHYS 1151 1 SH
- or PHYS 1161 Physics 1 4 SH
- with PHYS 1162 Lab for PHYS 1161 1 SH

**PROFESSIONAL DEVELOPMENT REQUIREMENT**

Complete 5 semester hours in professional development as indicated below.

**Professional Development**

Complete the following three courses:

- **GE 1000** Introduction to the Study of Engineering
- **CIVE 2000** Introduction to Engineering Co-op Education
- **CIVE 3000** Professional Issues in Engineering

**Further Credit**

1 semester hour from each of the following courses counts toward the professional development requirement:

- **GE 1110** Engineering Design
- **GE 1111** Engineering Problem Solving and Computation

**ADDITIONAL NU CORE COURSES/SCIENCE ELECTIVE**

Complete 20 semester hours in NU Core course work and science elective as indicated below.

**Writing**

Complete the following two courses with a grade of C or higher in each course:

- **ENGL 1111** College Writing
- **ENGL 3302** Advanced Writing in the Technical Professions

**Arts/Humanities Level 1**

Complete 4 semester hours from the NU Core arts/humanities level 1 domain, as described on page 26.

**Social Science Level 1—Macroeconomics or Microeconomics**

Complete one of the following courses, thus satisfying the NU Core social science level 1 domain requirement:

- **ECON 1115** Principles of Macroeconomics
- **ECON 1116** Principles of Microeconomics

**Science Elective**

Complete one of the following courses:

- **Biol 1111** General Biology 1
- **BIOL 1121** Basic Microbiology
- **BIOL 1151** Introduction to Marine Biology

The Department of Electrical and Computer Engineering offers two distinct Bachelor of Science programs: Bachelor of Science in electrical engineering (BSEE) and Bachelor of Science in computer engineering (BSCompE). An integrated dual major is available in electrical and computer engineering for students who complete the requirements of both majors. In addition, a minor in electrical engineering, a minor in computer engineering, and a minor in biomedical engineering are available to qualified students throughout the University, including majors within the department.

Successful engineers need to organize and adapt information to solve problems. They also must work effectively in teams and communicate well. Therefore, the goal of the electrical engineering and computer engineering programs is to help students develop these skills and provide the appropriate technical preparation.
Many electrical engineers work in the traditional areas of communications, computation, and control, and components required to realize such systems. They are involved in design and product development, testing and quality control, sales and marketing, and manufacturing. Others use their problem-solving skills in diverse areas such as bioengineering, health care, electronic music, meteorology, and experimental psychology. Some graduates draw on their electrical engineering backgrounds to launch successful careers as physicians, financial analysts, attorneys, and entrepreneurs.

As specified below, the BSEE degree requires a sequence of core courses and advanced study in one or more technical elective areas: electronic circuits and devices; signals and systems; fields, waves, and optics; power engineering; or computer engineering. General electives and electives in the arts and humanities and social sciences are also required.

BSEE—Bachelor of Science in Electrical Engineering

**ENGINEERING CATEGORICAL REQUIREMENT**
Students must complete a minimum of semester hours in the categories of math/science and engineering topics. Completing all courses in the prescribed curriculum satisfies these requirements without any additional consideration. However, any student with transfer credit or course substitutions must meet with an academic advisor to plan appropriate course work to assure that these requirements are fully satisfied.

**MATHEMATICS/SCIENCE REQUIREMENT**
Complete 35 semester hours in mathematics and science as indicated below.

**Required Mathematics/Science**
Complete each of the following courses with corresponding labs, as indicated:

- **CHEM 1151** General Chemistry for Engineers 4 SH
- **MATH 1341** Calculus 1 for Science and Engineering 4 SH
- **MATH 1342** Calculus 2 for Science and Engineering 4 SH
- **MATH 2341** Calculus 3 for Science and Engineering 4 SH
- **MATH 2341** Differential Equations and Linear Algebra for Engineering 4 SH
- **PHYS 1151** Physics for Engineering 1 4 SH

**Electrical Engineering**
The components of the Information Age—global communication systems, computers and computer chips, and the software that runs them, as well as pacemakers, magnetic resonance imaging, and interplanetary space missions—are possible because of the efforts of electrical engineers. Today, electrical engineers are developing concepts and working to translate these ideas into the next generation of products, from computers and safe, energy-efficient vehicles, to radar that can detect unexploded land mines from the air, to microrobots that diagnose disease from inside the body.
2 semester hours from the following lecture/lab combination count toward the mathematics/science requirement:

CS 1500  Algorithms and Data Structures for Engineering  4 SH
with CS 1501  Lab for CS 1500  1 SH

Minor in Electrical Engineering

A minor in electrical engineering is open to all students in the University with the prerequisite calculus and physics background. The minor is designed for students who would like a coherent background in the theory and laboratory practice of electrical engineering, particularly for majors in math, science, computer
engineering, or other engineering departments. The completion of a minor in electrical engineering will be recognized by a notation on the student’s transcript.

**Minor in Electrical Engineering**
Students must file a petition with the coordinator of undergraduate services in 404 Dana to declare the minor prior to taking any course work. A minimum of 20 semester hours of EECE courses is required with a minimum GPA of 2.000.

**Computer Engineering**
The use of computer technology is exploding, driven by applications in wireless communications, multimedia, portable devices, and Internet computing. At the core of these technological advances are computer engineers who research, design, and develop hardware and software. With a degree in computer engineering you might develop a full-featured multimedia phone, design the next-generation microprocessor, program computer-guided cameras to inspect nanomanufacturing facilities, or start your own software company.

The computer engineering major acquires a strong foundation in engineering principles and the physical sciences in addition to a powerful mix of theory and practice in hardware and software design. The core of the computer engineering curriculum comprises courses in computer organization and architecture, computer networks, computer-aided design, programming languages, optimization theory, and software design.

As specified below, the BSCompE degree requires a sequence of core courses, technical electives, general electives, and electives in the arts and humanities and social sciences.

**BSCompE—Bachelor of Science in Computer Engineering**

Minor in Biomedical Engineering
Medical imaging and biomedical electronics are important areas of biomedical engineering that are within the province of electrical engineering. The minor in biomedical engineering is open to all students in the University with the prerequisite calculus and physics background. The minor is particularly designed for majors in electrical or computer engineering, biology, health science fields, or other engineering departments who would like a background in relevant aspects of biology and electrical engineering, with the opportunity to complete an interdisciplinary biomedical engineering (capstone) design project. Course work in anatomy and physiology and other health science topics is combined with technical engineering courses related to biomedical imaging and instrumentation. Specific curriculum information about the biomedical engineering minor may be obtained from the Department of Electrical and Computer Engineering office, 411 Dana Research Center, from the department Web site, or by calling 617.373.2165.

Minor in Biomedical Engineering
Students must file a petition with the coordinator of undergraduate services in 404 Dana to declare the minor prior to taking any course work. A minimum of 26 semester hours is required with a minimum GPA of 2.000.

GPA REQUIREMENT
2.000 GPA required in the minor

Integrated Dual Major in Electrical and Computer Engineering

Students may choose to major in both electrical and computer engineering by following the integrated dual-major program leading to a Bachelor of Science in Electrical Engineering or Bachelor of Science in Computer Engineering. Students take the required courses for both majors along with technical electives distributed among the areas of computer engineering; fields, waves, and optics; signals and systems; power engineering; and electronic circuits and devices. A general elective and electives in the arts and humanities and social sciences are also required.

BSEE or BSCompE—Bachelor of Science in Electrical/Computer Engineering

ENGINEERING CATEGORICAL REQUIREMENT
Students must complete a minimum of semester hours in the categories of math/science and engineering topics. Completing all courses in the prescribed curriculum satisfies these requirements without any additional consideration. However, any student with transfer credit or course substitutions must meet with an academic advisor to plan appropriate course work to assure that these requirements are fully satisfied.

MATHEMATICS/SCIENCE REQUIREMENT
Complete 39 semester hours in mathematics and science as indicated below.

**Required Mathematics/Science**

Integrated Dual Major in Electrical Engineering and Physics
This intercollege dual major serves students who would like to explore their interest in physics while earning the benefit of an accredited Bachelor of Science degree in engineering. The dual major combines a major in physics from the Department of Physics in the College of Arts and Sciences with the Bachelor of Science in Electrical Engineering degree from the Department of Electrical and Computer Engineering.

Because of the large body of shared knowledge between electrical engineering and physics, an integrated dual major between these two disciplines is a logical course of study and can be accomplished within a student’s usual five-year program (including three co-op placements) without requiring course overloading in any semester. A student graduating from this program will have studied both the physical fundamentals and the applications of electronic devices and systems. The program is a particularly appropriate course of study for students who wish to pursue a career in solid-state devices, microelectromechanical systems, or nanotechnology.

Students interested in this program should contact the electrical and computer engineering department or the physics department as early as possible, preferably prior to registering for freshman courses.

See page 184.
Our mission is to educate persons for professional and technical excellence; to perform research to advance the science and practice of engineering; to engage in service activities that advance the department, the University, and the profession; and to instill in ourselves and our students habits and attitudes that promote ethical behavior, professional responsibility, and careers that advance the well-being of society.

The goal is for graduates from our undergraduate programs to demonstrate technical excellence in their chosen fields, anticipate and respond to societal changes, and develop careers with depth and flexibility, while retaining a professional and intellectual thrust throughout.

Specifically, we have established the following educational objectives for our undergraduate programs:

1a. Mechanical engineers will show proficiency in the analysis, modeling, and design of thermal and mechanical systems.
1b. Industrial engineers will show proficiency in the design, analysis, optimization, and improvement of integrated systems that include people, materials, information, equipment, and energy.

2. Graduates will successfully integrate their academic preparation with engineering practice.

3. Graduates will effectively utilize management skills to design projects and/or programs, to lead their implementation, and to present technical information, as appropriate to their field.

4. Graduates will engage in continuing education for professional development and career planning, including success in graduate education and research for those who choose to do so.

**Industrial Engineering**

Industrial engineering involves the design and analysis of systems that include people, equipment, and materials and their interactions and performance in the workplace. The industrial engineer collects this information and evaluates alternatives to make decisions that best advance the goals of the enterprise.

The program in industrial engineering offers students a base of traditional engineering courses, such as work design, human-machine systems, probability, statistics, and engineering economy, while emphasizing such contemporary areas as digital simulation, computer information and database systems, quality assurance, logistics and supply chain management, operations research, and facilities planning. Students integrate the knowledge acquired in these courses in a two-semester capstone design project.

Industrial engineers work in manufacturing firms, hospitals, banks, public utilities, transportation, government agencies, insurance companies, and construction firms. Among the projects they undertake are design and implementation of a computer-integrated manufacturing system, facilities planning for a variety of industries, design of a robotics system in a manufacturing environment, long-range corporate planning, development and implementation of a quality-control system, simulation analyses to improve processes and make operational decisions, design of workstations to enhance worker safety and productivity, and development of computer systems for information control.

More than 90 percent of department undergraduate students take advantage of the cooperative education program. Cooperative education assignments generally increase in level of responsibility as students gain theoretical and technical knowledge through their academic work. A sophomore might begin as a computer analyst evaluating the performance of a manufacturing system and progress to designing manufacturing engineering workstations by the senior year.

Mechanical Engineering
Mechanical engineering involves the design, development, and manufacture of machinery and devices to transmit power or to convert energy from thermal to mechanical form in order to power the modern world and its machines. Its current practice has been heavily influenced by recent advances in computer hardware and software.

Mechanical engineers use computers to formulate preliminary and final designs of systems or devices, to perform calculations that predict the behavior of the design, and to collect and analyze performance data from system testing or operation.

Traditionally, mechanical engineers have designed and tested devices, such as heating and air-conditioning systems, machine tools, internal-combustion engines, and steam power plants. Today they also play primary roles in the development of new technologies in a variety of fields—energy conversion, solar energy utilization, environmental control, prosthetics, transportation, manufacturing, and new-materials development.

The curriculum in mechanical engineering focuses on three areas: applied mechanics, thermofluids engineering, and materials science. Applied mechanics is the study of the motion and deformation of structural elements acted on by forces in devices that range from rotating industrial dynamos to dentists’ drills. Thermofluids engineering deals with the motion of fluids and the transfer of energy, as in the cooling of electronic components or the design of gas turbine engines. Materials science is concerned with the relationship between the structure and properties of materials and with the control of structure, through processing, to achieve the desired properties. Practical applications are in the development of composite materials and in metallurgical process industries.

Courses in each area form the foundation for advanced analytical and creative design courses that culminate in a two-semester capstone design project. Faculty encourages students throughout the curriculum to use computer-aided design tools and high-performance computer workstations.

More than 90 percent of department undergraduate students take advantage of the cooperative education program. Cooperative education assignments increase in responsibility and technical challenge as students progress through the program. Initial positions may involve computer-intensive CAD/CAM assignments or programming tasks, while more advanced jobs will place students in charge of quality-control systems and performance testing of equipment.

**COOPERATIVE EDUCATION**

**UNIVERSITY-WIDE REQUIREMENTS**
141 total semester hours required
Minimum 2.000 GPA required

**Minor in Mechanical Engineering**

**REQUIRED COURSES**
Complete the following two courses:
ME 2350 Engineering Mechanics and Design 4 SH
ME 2380 Thermodynamics 4 SH

**MECHANICAL ENGINEERING TECHNICAL ELECTIVES**
Complete two courses from the following list:
ME 2340 Introduction to Material Science 4 SH
ME 2355 Mechanics of Materials 4 SH
ME 3455 Dynamics and Vibrations 4 SH
ME 3475 Fluid Mechanics 4 SH
or ME 3480 International Applications of Fluid Mechanics 4 SH
ME 4508 Mechanical Engineering Computation and Design 4 SH
ME 4550 Mechanical Engineering Design 4 SH
ME 4555 System Analysis and Control 4 SH
ME 4570 Thermal Systems Analysis and Design 4 SH

**GPA REQUIREMENT**
2.000 GPA required in the minor

**Minor in Biomechanical Engineering**

**REQUIRED BIOLOGY**
Complete the following two courses with corresponding labs:
BIOL 1111 General Biology 1 4 SH
with BIOL 1112 Lab for BIOL 1111 1 SH
BIOL 1117 Integrated Anatomy and Physiology 1 4 SH
with BIOL 1118 Lab for BIOL 1117 1 SH
REQUIRED MECHANICAL ENGINEERING
Complete the following three courses with a biomedical engineering component:
ME 5665 Musculoskeletal Biomechanics 4 SH
MEIE 4701 Capstone Design 1 1 SH
MEIE 4702 Capstone Design 2 5 SH

TECHNICAL ELECTIVE
Complete one technical elective from the following list (additional electives may be approved by your academic advisor):
IE 4520 Stochastic Modeling 4 SH
IE 4522 Human Machine Systems 4 SH
ME 4640 Mechanical Behavior and Processing of Materials 4 SH
ME 5650 Advanced Mechanics of Materials 4 SH
ME 5655 Dynamics and Mechanical Vibration 4 SH
PHYS 4621 Biological Physics 1 4 SH

GPA REQUIREMENT
2.000 GPA required in the minor

The Northeastern University Undergraduate Catalog (Full-Time Day Programs) contains the University’s primary statements about these academic programs and degree requirements, as authorized by the president or the Board of Trustees. For information about other academic policies and procedures; student responsibilities; student academic and cocurricular life; faculty rights and responsibilities; or general personnel policies, benefits, and services, please refer to the Academic Operations Manual, Undergraduate Student Handbook, Cooperative Education Handbook, Faculty Handbook, Benefits and Services Handbook, and related procedural guides, as appropriate.

Accreditation. Northeastern University is accredited by the New England Association of Schools and Colleges, Inc.

Delivery of Services. Northeastern University assumes no liability for delay or failure to provide educational or other services or facilities due to causes beyond its reasonable control. Causes include, without limitation, power failure, fire, strikes by University employees or others, damage by natural elements, and acts of public authorities. The University will, however, exert reasonable efforts, when it judges them to be appropriate, to provide comparable services, facilities, or performance; but its inability or failure to do so shall not subject the University to liability.

The Northeastern University Undergraduate Catalog contains current information about the University calendar, admissions, degree requirements, fees, and regulations; however, such information is not intended and should not be regarded to be contractual.

Northeastern University reserves the sole right to promulgate and change rules and regulations and to make changes of any nature in its program; calendar; admissions policies, procedures, and standards; degree requirements; fees; and academic schedule whenever necessary or desirable, including, without limitation, changes in course content and class schedule, the cancellation of scheduled classes and other academic activities, and the substitution of alternatives for scheduled classes and other academic activities. In any such case, the University will give whatever notice is reasonably practical.

Northeastern University will endeavor to make available to its students a fine education and a stimulating and congenial environment. However, the quality and rate of progress of an individual’s academic career and professional advancement upon completion of a degree or program are largely dependent on his or her own abilities, commitment, and effort. In many professions and occupations, there are also requirements imposed by federal and state statutes and regulatory agencies for certification or entry into a particular field. These requirements may change while a student is enrolled in a program and may vary from state to state or country to country. Although the University stands ready to help its students find out about requirements and changes in them, it is the student’s responsibility to initiate the inquiry.

Tuition Default Policy. In cases where the student defaults on his/her tuition, the student shall be liable for the outstanding tuition and all reasonable associated collection costs incurred by the University, including attorneys’ fees.

Emergency Closing of the University. Northeastern University has made arrangements to notify students, faculty, and staff by radio and television when it becomes necessary to cancel classes because of extremely inclement weather. AM stations WBZ (1030), WILD (1090), and WRKO (680), and FM stations WBUR (90.9) and WFNX (101.7) are the radio stations authorized to announce the University’s decision to close. Television stations WBZ-TV4, WCVB-TV5, and WBDH-TV7 will also report cancellations. Since instructional television courses originate from live or broadcast facilities at the University, neither the classes nor the courier service operates when the University is closed. Please listen to the radio or television to determine whether the University will be closed.

If a storm occurs at night, the announcement of University closing is given to the radio stations at approximately 6 AM. Classes are generally canceled for that entire day and evening at all campus locations unless stated otherwise. When a storm begins late in the day, cancellations of evening classes may be announced. This announcement is usually made between 2 and 3 PM.

Equal Opportunity Policy. Northeastern University does not discriminate on the basis of race, color, religion, sex, sexual orientation, age, national origin, disability, or veteran status in admission to, access to, treatment in, or employment in its programs and activities. In addition, Northeastern University will not condone any form of sexual harassment. Handbooks containing the University’s nondiscrimination policies and its grievance procedures are available in the Office of Institutional Diversity and Equity, 125 Richards Hall. Inquiries regarding the University’s nondiscrimination policies may be directed to:

Donnie Perkins
Office of Institutional Diversity and Equity
125 Richards Hall
Northeastern University
Boston, Massachusetts 02115
617.373.2133

Inquiries concerning the application of nondiscrimination policies may also be referred to the Regional Director, Office for Civil Rights, U.S. Department of Education, J.W. McCormack Building, Post Office Court House, Room 222, Boston, Massachusetts 02109-4557.

Disability Resource Center. The Disability Resource Center provides a variety of disability-related services and accommodations to Northeastern University’s students and employees with disabilities.

Northeastern University’s compliance with Section 504 of the Rehabilitation Act of 1973 and the Americans with Disabilities Act of 1990 are coordinated by the dean and director of the Disability Resource Center. Persons requiring information regarding the Disability Resource Center should contact the center at 617.373.2675 or 617.373.2730 (TTY).

Family Educational Rights and Privacy Act. In accordance with the Family Educational Rights and Privacy Act of 1974, Northeastern University permits its students to inspect their records wherever appropriate and to challenge specific parts of them when they feel it is necessary to do so. Specific details of the law as it applies to Northeastern are printed in the Undergraduate and Graduate Student Handbook and are distributed annually at registration for the University’s colleges and graduate schools.

Persistence Rates under the Student Right-to-Know Act. In the fall of 2008, the persistence rate for students who entered in the fall 2007 cohort was 92.7 percent.

Mission Statement:
To educate students for a life of fulfillment and accomplishment.
To create and translate knowledge to meet global and societal needs.
